Ethics and Values in Applied Social Research Allan Kimmel,1989 With the primary objective of raising ethical sensibility this volume details the ethical problems and dilemmas faced by applied social science researchers Issues such as the use of deception the participant s right to privacy and informed consent and the potential harm of public disclosure are confronted The author discusses the need to review ethical problems and their implications in the context of current ethical standards in both society and the scientific community Case studies illustrate unanticipated ethical dilemmas which might emerge during a research project Issues are presented and interpreted clearly so that their complexity can be penetrated and potential solutions envisioned The volume also includes specific methodolo

Implementing IT governance in the public sector by use of bootstrap algorithms Petter Ogland,2017-11-29 It has been argued that the reason seventy percent of all IT projects fail is due to lack of a formal system for guiding and monitoring IT decisions Organisations having explicit IT governance systems are generally twice as successful as those with poor governance given the same strategic objectives but implementing IT governance can be difficult In this book Dr Ogland looks at the public sector and argues that the implementation of IT governance has to be done through bootstrapping The bootstrap algorithm BA is a time tested approach that is known to work but it is an approach that breaks with much of the logic of the public sector bureaucracy and is expected to be met with resistance By analysing patterns in a study of trying to convince a Norwegian public sector organisation to implement IT governance through the use of the BA the book is able to provide rich insights on what causes failure and how to make the implementation process succeed
