Improving Business Reporting Giovanni Frattini, 2007

Accounting Research Methods and Research Fields Musbau Kolawole Kayode, 2015 Seminar paper from the year 2015 in the subject Business economics Banking Stock Exchanges Insurance Accounting grade A Atlantic International University School of Business and Economics language English abstract Research method is a critical human practice that offers exclusive access to valid and accurate knowledge and has an exclusive lead against errors that are not found and exist in other human activities Moreover it is challenging to define accounting research since it shifts over time Traditional accounting research was mainly normative this is argument for the correct accounting intervention or what should be However with the introduction of the Journal of Accounting Research developments or progresses in finance have been established such as creation of huge data sets and the statistical capabilities for its analysis computer advances the efficient market hypothesis and analyzing what is instead of what should be Even though these shifts have had some critics they have led to a major increase in research contribution and various new journals Libby et al 2012 Additionally accounting research contributes an integral part in new knowledge creation The hard sciences have generated different forms of testing and research that may be applied over a range of disciplines such as accounting research With the application of these

accounting models with evidence from experiments surveys stock prices financial statements mathematical proofs and computer simulations users can acquire a scientific perspective This paper therefore discusses accounting methods and accounting research fields i e financial managerial auditing and taxation **Towards Ecological Taxation** David

Russell,2016-02-24 Governments around the world are struggling to meet their commitments to achieve targets relating to reductions in greenhouse gases Many writers advocating ways to achieve these targets offer radical but often impractical approaches that do not offer a way forward within the existing economic model In contrast Towards Ecological Taxation is a pragmatic consideration of realistic possibilities by an author from the world of accounting Based on his research into the implications of changes in the UK motor taxation regime for company cars David Russell considers the broader efficacy of taxation policy as a mechanism for reducing demand for fossil fuels and encouraging a shift towards carbon neutral energy production He incorporates the findings of a number of studies into his analysis along with a wider consideration of tax regimes Dr Russell suggests a way forward that will attract the interest of researchers policy makers and decision makers wanting a better understanding of how taxation could be used innovatively but within the existing economic status quo to deliver specific and measurable reductions in CO2 Such a distinctive approach makes this book a valuable addition to the literature on environmental issues and the always thought provoking titles in the Corporate Social Responsibility Series

ECRM 2019 18th European Conference on Research Methods in Business and Management Prof. Anthony Stacey,2019-06-20 **Social and Environmental Disclosure by Chinese Firms** Yingjun Lu,Indra Abeysekera,2014-03-26 Given the increased social and environmental problems in China this book looks into the social and environmental environmental disclosure practices of socially responsible Chinese listed firms by constructing a stakeholder driven three dimensional disclosure index The book contains a three part study the first part explores the current status of social and environment disclosure practices The second part empirically examines the relationship between corporate social and environmental disclosure and various influencing factors i e stakeholders power and corporate characteristics The third part empirically examines the link between corporate social responsibility CSR reporting i e publishing a CSR report and the quality of the CSR report and socially responsible reputation The book finds that the CSR report provided more stakeholder relevant social and environmental disclosure than the annual report It also finds that corporate characteristics such as firm size profitability and industry classification are all statistically significant factors influencing social and environmental disclosure of the Chinese firms studied Shareholders significantly influenced firms social and environmental disclosure and creditors significantly influenced firms disclosure related to their environmental performance The final part of the study reports that publishing a CSR report and CSR reporting quality had a positive influence on firms socially responsible reputation and that the CEO chairman duality negatively influenced firms socially responsible reputation The book also highlights that financial performance and firm size were the two corporate characteristics that had a positive influence on

corporate socially responsible reputation This book will be of interest to those who are keen to learn more about corporate social responsibilities in the context of Chinese firms
