Federally Funded Research, 1991 Federally Funded Research United States. Congress. Office of Technology Assessment, 1991 Federally Funded Research: Decisions for a Decade, 1991 Proceedings of 2023 7th Chinese Conference on Swarm Intelligence and Cooperative Control Guo-Ping Jiang, Mengyi Wang, Zhang Ren, 2024-07-11 This book includes original peer reviewed research papers from the 2023 7th Chinese Conference on Swarm Intelligence and Cooperative Control CCSICC2023 held in Nanjing China on November 17 19 2023 The topics covered include but are not limited to reviews and discussions of swarm intelligence basic theories on swarm intelligence swarm communication and networking swarm perception awareness and location swarm decision and planning cooperative control cooperative guidance swarm simulation and assessment The papers showcased here share the latest findings on theories algorithms and applications in swarm intelligence and cooperative control making the book a valuable asset for researchers engineers and university students alike Handbook of Research on Estimation and Control Techniques in E-Learning Systems Mkrttchian, Vardan, 2015-12-22 Improvements in the application of online learning technologies are continually on the rise as the expectation for individuals to obtain a higher education grows and more people are seeking alternative modes of education As more institutions implement e learning systems it has become increasingly important to explore the advancements and obstacles of these technologies The Handbook of Research on Estimation and Control Techniques in E Learning Systems presents the latest research in online learning and educational technologies for a diverse range of students and educational environments Featuring comprehensive coverage on the implementation and usage of e education systems this publication explores a variety of pertinent topics including but not limited to ubiquitous computer technology e learning environments and challenges in implementing these technologies serving as a crucial reference source for researchers professionals academicians students government officials and technology developers interested in the adoption and implementation of e learning systems **Proceedings of 2023 7th Chinese Conference on Swarm Intelligence and Cooperative Control** Yongzhao Hua, Yishi Liu, Liang Han, 2024-06-14 This book includes original peer reviewed research papers from the 2023 7th Chinese Conference on Swarm Intelligence and Cooperative Control CCSICC2023 held in Nanjing China on November 17 19 2023 The topics covered include but are not limited to reviews and discussions of swarm intelligence basic theories on swarm intelligence swarm communication and networking swarm perception awareness and location swarm decision and planning cooperative control cooperative guidance swarm simulation and assessment The papers showcased here share the latest findings on theories algorithms and applications in swarm intelligence and cooperative control making the book a valuable asset for researchers engineers and university students alike Proceedings of 4th 2024 International Conference on Autonomous Unmanned Systems (4th ICAUS 2024) Lianqing Liu, Yifeng Niu, Wenxing Fu, Yi Qu, 2025-05-05 This book includes original peer reviewed research papers from the 4th ICAUS 2024 which provides a

unique and engaging platform for scientists engineers and practitioners from all over the world to present and share their most recent research results and innovative ideas The 4th ICAUS 2024 aims to stimulate researchers working in areas relevant to intelligent unmanned systems Topics covered include but are not limited to Unmanned Aerial Ground Surface Underwater Systems Robotic Autonomous Control Navigation and Positioning Architecture Energy and Task Planning and Effectiveness Evaluation Technologies Artificial Intelligence Algorithm Bionic Technology and their Application in Unmanned Systems The papers presented here share the latest findings in unmanned systems robotics automation intelligent systems control systems integrated networks modelling and simulation This makes the book a valuable resource for researchers engineers and students alike

Advances in Mobility-as-a-Service Systems Eftihia G. Nathanail, Giannis Adamos, Ioannis Karakikes, 2020-11-03 This book gathers together innovative research and practical findings relating to urban mobility transformation It is especially intended to provide academicians researchers practitioners and decision makers with effective strategies and techniques that can support urban mobility in a sustainable way The chapters which report on contributions presented at the 5th Conference on Sustainable Urban Mobility held virtually on June 17 19 2020 from Greece cover the thematic areas of social networks and traveler behavior applications of technologies in transportation and big data analytics transport infrastructure and traffic management and transportation modeling and impact assessment Special attention is given to public transport and demand responsive systems electromobility micromobility and automated vehicles The book addresses the challenges of the near future highlighting the importance of knowledge transfer and it is intended to foster communication among universities industries and public administration

Proceedings of the Eighth International Conference on Management Science and Engineering Management Jiuping Xu, Virgílio António Cruz-Machado, Benjamin Lev, Stefan Nickel, 2014-05-06 This is the Proceedings of the Eighth International Conference on Management Science and Engineering Management ICMSEM held from July 25 to 27 2014 at Universidade Nova de Lisboa Lisbon Portugal and organized by International Society of Management Science and Engineering Management ISMSEM Sichuan University Chengdu China and Universidade Nova de Lisboa Lisbon Portugal The goals of the conference are to foster international research collaborations in Management Science and Engineering Management as well as to provide a forum to present current findings A total number of 138 papers from 14 countries are selected for the proceedings by the conference scientific committee through rigorous referee review The selected papers in the first volume are focused on Intelligent System and Management Science covering areas of Intelligent Systems Decision Support Systems Manufacturing and Supply Chain Management

Toward Sustainable Transitions in Healthcare Systems Jacqueline Broerse, John Grin, 2017-03-16 Health systems have long been considered key determinants of well being within modern societies a valuable resource which have faced a series of reform initiatives throughout the past decades These reforms have been used to manage the cost of development measure

the tenability of health systems in globalizing economies and promote the increasing importance of health problems related to lifestyle and living conditions yet they have failed to provide a true resolution to the persistent economical and logistical problems facing modern day health systems This rich interdisciplinary work explores the hypothesis that many of these problems cannot be adequately addressed without structural changes to our health systems and examines the embedded features of our health systems that underlie contemporary challenges as well as how and under what conditions our health systems can be made more sustainable Combining and building upon theoretical approaches from transition and innovation studies for analysing health system deficits **Toward Sustainable Transitions in Healthcare Systems** raises fundamental questions about how new research new needs and exogenous trends are transforming current health innovation systems Providing an original and substantial analysis of the complex structural features of the health innovation system this book will be of interest to students and practitioners of the politics of health social epidemiology medical sociology and those with an interest in transition theory
