Seapower A Guide For The Twenty First Century:

Seapower Geoffrey Till, 2004 At the beginning of the 21st century much has remained the same in naval terms but much has changed Geoffrey Till's study is an exploration of how change will impact upon the world's navies **Seapower** Geoffrey Till, 2018-06-19 This is the fourth revised and updated edition of Geoffrey Till's *Seapower A Guide for the Twenty first Century* The rise of the Chinese and other Asian navies worsening quarrels over maritime jurisdiction and the United States maritime pivot towards the Asia Pacific region reminds us that the sea has always been central to human development as a source of resources and as a means of transportation information exchange and strategic dominion It has provided the basis for mankind's prosperity and security and this is even more true in the early twenty first century with the emergence of an increasingly globalised world trading system Navies have always provided a way of policing and sometimes exploiting the system In contemporary conditions navies and other forms of maritime power are having to adapt in order to exert the maximum power ashore in the company of others and to expand the range of their interests activities and responsibilities While these new tasks are developing fast traditional ones still predominate Deterrence remains the first duty of today's navies backed up by the need to fight and win if necessary How navies and their states balance these two imperatives will tell us a great deal about our future in this increasingly maritime century This book investigates the consequences of all this for the developing nature composition and functions of all the world's significant navies and provides a guide for anyone interested in the changing and crucial role of seapower in the twenty first century *Seapower* is essential reading for all students of naval power maritime security and naval history and highly recommended for students of strategic studies international security and international relations **Seapower** Geoffrey Till, 2026-02-11 This is the 5th revised and updated edition of *Seapower A Guide for the Twenty First Century* The sea has always provided the basis for humankind's prosperity and security With the emergence of an increasingly globalized world trading system in the early part of the 21st century this became ever more obvious Contemporary conditions have therefore required navies to adapt and to expand the range of their interests activities and responsibilities The Houthi assault on international shipping in the Red Sea and the need to monitor sanctions and dark fleet operations shows that these tasks are important and developing fast Even so and especially with the re emergence of potentially destabilising great power competition traditional hard power naval concerns still predominate This book investigates the consequences of all this for the developing nature composition and functions of the world's navies and provides a guide for the changing but crucial role of seapower in the 21st century This edition contains new material on the Russo Ukraine and Gaza wars tensions in the Indo Pacific the Arctic and North Atlantic the emerging concept of seabed control as well as the extent that technological innovations and other recent strategic developments are challenging traditional concepts of maritime strategy and the roles of navies This book is essential reading for students of naval power maritime security and naval history and highly recommended for students of strategic studies international security and

International Relations *Twenty-First Century Seapower* Peter Dutton, Robert Ross, Øystein Tunsjø, 2013-05-02 This book offers an assessment of the naval policies of emerging naval powers and the implications for maritime security relations and the global maritime order Since the end of the Cold War China Japan India and Russia have begun to challenge the status quo with the acquisition of advanced naval capabilities The emergence of rising naval powers is a cause for concern as the potential for great power instability is exacerbated by the multiple maritime territorial disputes among new and established naval powers This work explores the underlying sources of maritime ambition through an analysis of various historical cases of naval expansionism It analyses both the sources and dynamics of international naval competition and looks at the ways in which maritime stability and the widespread benefits of international commerce and maritime resource extraction can be sustained through the twenty first century This book will be of much interest to students of naval power Asian security and politics strategic studies security studies and IR in general China, the United States, and 21st-Century Sea Power Andrew S. Erickson, Lyle J Goldstein, Nan Li, 2010-12-01 China's reaction to the United States new maritime strategy will significantly impact its success according to three Naval War College professors Based on the premise that preventing wars is as important as winning wars this new U S strategy they explain embodies a historic reassessment of the international system and how the United States can best pursue its interests in cooperation with other nations The authors contend that despite recent turbulence in U S China military relations substantial shared interests could enable extensive U S China maritime security cooperation as they attempt to reach an understanding of competitive coexistence But for professionals to structure cooperation they warn Washington and Beijing must create sufficient political and institutional space **Indian Naval Strategy in the Twenty-first Century** James R. Holmes, Andrew C. Winner, Toshi Yoshihara, 2009-04-02 This is the first academic study of India's emerging maritime strategy and offers a systematic analysis of the interplay between Western military thought and Indian maritime traditions By a quirk of historical fate Europe embarked on its Age of Discovery just as the main Asian powers were renouncing the sea ushering in centuries of Western dominance In the 21st century however Asian states are once again resuming a naval focus with both China and India dedicating some of their new found wealth to building powerful navies and coast guards and drawing up maritime strategies to govern the use of these forces The United States like the British Empire before it is attempting to manage these rising sea powers while preserving its maritime primacy This book probes how India looks at the sea what kind of strategy and seagoing forces New Delhi may craft in the coming years and how Indian leaders may use these forces It examines the material dimension but its major premise is that navies represent a physical expression of a society's history philosophical traditions and culture This book then ventures a comprehensive appraisal of Indian maritime strategy This book will be of interest to students of sea power strategic studies Indian politics and Asian Studies in general James R Holmes is an Associate Professor of Strategy at the U S Naval War College and a former U S Navy surface warfare officer Toshi Yoshihara is an Associate Professor in the Strategy and Policy

Department at the Naval War College Andrew C Winner is Professor in the Strategic Research Department at the U S Naval War College

Asian Maritime Power in the 21st Century Vijay Sakhuja, 2011 Maritime power has been a key defining parameter of economic vitality and geostrategic power of nations This book explores how the first decade of the 21st century has witnessed the rise of China and India as confident economic powers pivoting on high growth rates exponential expansion of science technology and industrial growth

China as a Twenty-First Century Naval Power Michael A McDevitt, 2020-10-15 Xi Jinping has made his ambitions for the People s Liberation Army PLA perfectly clear there is no mystery what he wants first that China should become a great maritime power and secondly that the PLA become a world class armed force by 2050 He wants this latter objective to be largely completed by 2035 China as a Twenty First Century Naval Power focuses on China s navy and how it is being transformed to satisfy the world class goal Beginning with an exploration of why China is seeking to become such a major maritime power author Michael McDevitt first explores the strategic rationale behind Xi s two objectives China s reliance on foreign trade and overseas interests such as China s Belt and Road strategy In turn this has created concerns within the senior levels of China s military about the vulnerability of its overseas interests and maritime life lines is a major theme McDevitt dubs this China s sea lane anxiety and traces how this has required the PLA Navy to evolve from a near seas focused navy to one that has global reach a blue water navy He details how quickly this transformation has taken place thanks to a patient step by step approach and abundant funding The more than 10 years of anti piracy patrols in the far reaches of the Indian Ocean has acted as a learning curve accelerator to blue water status McDevitt then explores the PLA Navy s role in the South China Sea and the Indian Ocean He provides a detailed assessment of what the PLAN will be expected to do if Beijing chooses to attack Taiwan potentially triggering combat with America s first responders in East Asia especially the U S Seventh Fleet and U S Fifth Air Force He conducts a close exploration of how the PLA Navy fits into China s campaign plan aimed at keeping reinforcing U S forces at arm s length what the Pentagon calls anti access and area denial A2 AD if war has broken out over Taiwan or because of attacks on U S allies and friends that live in the shadow of China McDevitt does not know how Xi defines world class but the evidence from the past 15 years of building a blue water force has already made the PLA Navy the second largest globally capable navy in the world This book concludes with a forecast of what Xi s vision of a world class navy might look like in the next fifteen years when the 2035 deadline is reached

Chinese Naval Strategy in the 21st Century James R. Holmes, Toshi Yoshihara, 2012-09-10 Alfred Thayer Mahan has been called America s nineteenth century evangelist of sea power and the intellectual father of the modern US Navy His theories have a timeless appeal and Chinese analysts now routinely invoke Mahan s writings exhorting their nation to build a powerful navy Economics is the prime motivation for maritime reorientation and securing the sea lanes that convey foreign energy supplies and other commodities now ranks near or at the top of China s list of military priorities This book is the first systematic effort to test the interplay between Western military

thought and Chinese strategic traditions vis vis the nautical arena It uncovers some universal axioms about how theories of sea power influence the behaviour of great powers and examines how Mahanian thought could shape China s encounters on the high seas Empirical analysis adds a new dimension to the current debate over China s rise and its importance for international relations The findings also clarify the possible implications of China s maritime rise for the United States and illuminate how the two powers can manage their bilateral interactions on the high seas Chinese Naval Strategy in the 21st Century will be of much interest to students of naval history Chinese politics and security studies

Maritime Diplomacy in the 21st Century Christian Le Mièrre, 2014-04-24 This book aims to redefine maritime diplomacy for the modern era Maritime diplomacy encompasses a spectrum of activities from co operative measures such as port visits exercises and humanitarian assistance to persuasive deployment and coercion It is an activity no longer confined to just navies but in the modern era is pursued by coast guards civilian vessels and non state groups As states such as China and India develop they are increasingly using this most flexible form of soft and hard power Maritime Diplomacy in the 21st Century describes and analyses the concept of maritime diplomacy which has been largely neglected in academic literature The use of such diplomacy can be interesting not just for the parochial effects of any activity but because any event can reflect changes in the international order while acting as an excellent gauge for the existence and severity of international tension Further maritime diplomacy can act as a valve through which any tension can be released without resort to conflict Written in an accessible but authoritative style this book describes the continued use of coercion outside of war by navies while also situating it more clearly within the various roles and effects that maritime forces have in peacetime This book will be of much interest to students of seapower naval history strategic studies diplomacy and international relations

Sea Power and the Asia-Pacific Geoffrey Till, Patrick Bratton, 2012-02-07 This volume examines the rise and fall of sea powers in the Asia Pacific region

The UK as a Medium Maritime Power in the 21st Century Christopher Martin, 2016-11-30 This book argues that the UK as a post modern globalised state will require means to have influence over events and opponents that threaten the UK s interests in the 21st century and that its means is the Royal Navy However unlike other studies this research emphasizes the role of logistics especially afloat support logistics and the Royal Fleet Auxiliary In doing so the author rejects the current theory underpinning military operations at distance that distance degrades capability and posits an alternative theory that time is the key factor for maritime based forces The UK must reengage with its maritime status and maintain a maritime based capability to protect its interests in the new maritime century as a leader within the international community The book will be of use to scholars and researchers interested in naval history and defence policy

War in Space Bowen Bleddyn E. Bowen, 2020-06-18 Applying strategic theory to outer space and drawing out the implications for international relations Offers a definitive and original vision of space warfare that theorises often overlooked aspects of contemporary space activities based in the discipline of Strategic Studies This original research draws out the implications of spacepower

for wider debate in grand strategy and IR Applies the theory in a topical and contentious area within contemporary grand strategy anti access and area denial warfare in the Taiwan Strait between China and America Key principles are summarised in seven propositions to make the key take aways of theory applicable and memorable for researchers and practitioners This book presents a theory of spacepower and considers the implications of space technology on strategy and international relations The spectre of space warfare stalks the major powers as outer space increasingly defines geopolitical and military competition As satellites have become essential for modern warfare strategists are asking whether the next major war will begin or be decided in outer space Only strategic theory can explore the decisiveness and effects of war in space upon grand strategy and international relations The author applies the wisdom of military strategy to outer space and presents a compelling new vision of Earth orbit as a coastline rather than an open ocean or an extension of airspace as many have assumed Rooted in the classical military works of Clausewitz Mahan and Castex to name a few this book presents comprehensive principles for strategic thought about space that explain the pervasive and inescapable influence of spacepower on strategy and the changing military balance of the 21st century

Empire, Technology and Seapower

Howard J. Fuller, 2014-01-03 This book examines British naval diplomacy from the end of the Crimean War to the American Civil War showing how the mid Victorian Royal Navy suffered serious challenges during the period Many recent works have attempted to depict the mid Victorian Royal Navy as all powerful innovative and even self assured In contrast this work argues that it suffered serious challenges in the form of expanding imperial commitments national security concerns precarious diplomatic relations with European Powers and the United States and technological advancements associated with the armoured warship at the height of the so called Pax Britannica Utilising a wealth of international archival sources this volume explores the introduction of the monitor form of ironclad during the American Civil War which deliberately forfeited long range power projection for local coastal command of the sea It looks at the ways in which the Royal Navy responded to this new technology and uses a wealth of international primary and secondary sources to ascertain how decision making at Whitehall affected that at Westminster The result is a better balanced understanding of Palmerstonian diplomacy from the end of the Crimean War to the American Civil War the early evolution of the modern capital ship including the catastrophic loss of the experimental sail and turret ironclad H M S Captain naval power projection and the nature of empire technology and seapower This book will be of great interest to all students of the Royal Navy and of maritime and strategic studies in general
