practice the book will be of interest to all of those who seek to better understand the image and identity of the architect This book was published as a double special issue of Architectural Theory Review **The Brickbuilder** ,1893 **Out of Architecture** Jake Rudin,Erin Pellegrino,2022-11-10 Out of Architecture is both a call to reassess the architecture profession and its education and a toolkit for graduates and working architects to untangle their skills passions and value from traditional architectural practice and consider alternate pathways Written by design professionals and expert career consultants this book is informed by numerous client accounts as well as the authors own stories and routes out of architecture The initial chapters follow the narrative of a typical architecture training in the US highlighting the many highs and lows skills honed and ultimately the huge disconnect that can occur between architectural education and practice Subsequent chapters explore a disillusionment with the profession unhealthy work cultures mentorship working with lead architects toxic perfectionism and the notion of a calling Authors then present the hopeful accounts of many architects who escaped a profession known for its grueling working conditions to find fulfilling well paying creative jobs that better utilize the skills of architecture than the architectural profession itself Written in a unique combination of storytelling and analysis this patchwork of client and author stories makes for an immersive provocative and enjoyable read A wide range of architecture students graduates educators and professionals will recognize themselves within the pages of this book and find prompts to reassess their working practices teaching styles and the profession itself It will be of particular value to those students skeptical of joining the architecture workforce as well as those further along and considering a career change
