Race, Politics, and Economic Development. James Jennings, 1992-12-17. In April 1992 the world witnessed a renewal in South Central Los Angeles of the urban violence that had exploded there over a quarter of a century earlier. As in the Watts rebellion of 1965 the spark that ignited the firestorm was Black rage over police brutality. But in both eras the tinder was prepared by decades of social neglect and political disenfranchisement that have left the predominantly non-white urban poor trapped and virtually without hope. *Race, Politics and Economic Development* examines the underlying causes of Black urban poverty and recommends means to escape the seemingly endless cycle of retributive violence that it spawns. The book brings together Black activists and scholars including two former mayors of American cities to analyze the theoretical and practical problems facing the Black community in the United States. The essays argue that political influence, power and wealth are major factors in determining social welfare policies; that both liberal and conservative policies are no longer effective in alleviating a growing human service crisis among Blacks; and that political mobilization of the Black community is absolutely critical in resolving the problem of poverty in urban America. Drawing on work in the social sciences, political theory and economics and also on the contributors' activist experiences, these essays present an agenda for the participation of grassroots Black leaders in developing and implementing urban policy. *Entrepreneurship and Self-Help Among Black Americans*. John Sibley Butler, 1991-01-01. In this book author John Sibley Butler traces the unique development of business enterprises and other community organizations among Black Americans from before the Civil War into the present. He compares these efforts to other strong traditions of self-help among groups such as Japanese Americans, Jewish Americans and Greek Americans. The author also shows how the higher education of Black children is already a valued tradition among Black self-help groups such that today their offspring are more likely to be third and fourth generation college graduates. Butler challenges the myth that nothing can be done to salvage America's underclass without a massive infusion of public dollars and offers a fresh perspective on those community-based organizations and individuals who act to solve local social and economic problems. **Understanding American Economic Decline**. Michael Alan Bernstein, David E. Adler, 1994-07-29. The public has long been painfully aware of the economy's stagnation. The contemporary recession has brought to the foreground problems which have been germinating for decades. Falling real wages, slow productivity growth

and the loss of international competitiveness in major industries all are outgrowths of long term developments that predate this crisis As the United States moves from a position of global economic leadership to one of economic interdependence we need alternative approaches to explain the dramatic changes in the US economy This collection of essays written by leading scholars presents a systematic analysis of the nation s economic woes The authors furnish more than hard hitting criticisms of the US economy They provide hope as they offer solutions to America s most pressing economic problems      Race and Society: The Essentials Kathleen J. Fitzgerald,2020-12-04 *Race and Society The Essentials* explains the basic theories and concepts related to the sociology of race and ethnicity covering topics such as prejudice and discrimination immigration and assimilation structural and institutional racism privilege intersectionality color blind racism interracial relationships multiracial families biracial multiracial identities and indigeneity It is designed to provide a foundation for students so they can have productive and necessary discussions about race racism and privilege and understand how to move towards a more racially just society Unlike many texts for this course it does not contain chapters on individual racial and ethnic minorities or on race within the context of social institutions Perfect for instructors who assign other kinds of materials for their race ethnicity courses research monographs journals articles published anthologies scholarly and trade books or for shorter courses this text will provide students with a solid theoretical and conceptual grounding in the field      Law and Economics Dana Gold,2009-05-08 Explores the relationship between law and economics principles and the promotion of social justice This title includes chapters that invoke the lens of corporate law theory or the corporate context as part of their analysis of the intersection of economics and social justice      *W.E.B. Du Bois and Race* Chester J. Fontenot,Mary Alice Morgan,2001 This collection of essays emerged from a symposium held at Mercer University which examined the ways in which W E B Du Bois s theories of race have shaped racial discussion and public policy in the twentieth century The essays also examine the application of Du Bois s theories to the new millennium as well as his contributions to the study of the humanities      *Race, Poverty, and American Cities* John Charles Boger,Judith Welch Wegner,1996 Precise connections between race poverty and the condition of America s cities are drawn in this collection of seventeen essays Policymakers and scholars from a variety of disciplines analyze the plight of the urban poor since the riots of the 1960s an      **Advertising Diversity** Shalini Shankar,2015-04-03 In *Advertising Diversity* Shalini Shankar explores how racial and ethnic differences are created and commodified through advertisements marketing and public relations Drawing from periods of fieldwork she conducted over four years at Asian American ad agencies in New York San Francisco and Los Angeles Shankar illustrates the day to day process of creating and producing broadcast and internet advertisements She examines the adaptation of general market brand identities for Asian American audiences the ways ad executives make Asian cultural and linguistic concepts accessible to their clients and the differences between casting Asian Americans in ads for general and multicultural markets Shankar argues that as a form of racialized communication advertising shapes the political and social status of Asian Americans

transforming them from model minorities to model consumers Asian Americans became visible in the twenty first century United States through a process Shankar calls racial naturalization Once seen as foreign their framing as model consumers has legitimized their presence in the American popular culture landscape By making the category of Asian American suitable for consumption ad agencies shape and refine the population they aim to represent

**Selling Social Justice** Jennifer C. Pan,2025-05-06 The national racial reckoning that began in 2020 promised to radically restructure American society from the bottom up But five years on it has mainly served to strengthen the ruling class and deliver the rich an opportunity to rehabilitate a profoundly unequal economic order precisely at a moment when the stability of the system and the public s trust in it are drastically deteriorating Corporations have used antiracism to consolidate their political power and evade government regulation Employers have surveilled and undermined workers through counterproductive diversity equity and inclusion trainings Affluent professionals and Democratic politicians have exacerbated a stark class divide by pushing half baked racial equity policies that come at the expense of the majority of working people And the right has reacted to these developments by stoking a toxic culture war against wokeness that serves only as a distraction from the increasing economic hardship faced by Americans of all races Selling Social Justice investigates the rise and spread of contemporary antiracist ideology and shows how the rich came to embrace this particular form of justice In this provocative and thoroughly researched account Jennifer C Pan explores why in a twenty first century economy of increasing scarcity antiracism is the wrong frame for understanding and fighting inequality

**Recognizing Race and Ethnicity, Student Economy Edition** Kathleen Fitzgerald,2019-07-05 To better reflect the current state of research in the sociology of race ethnicity this book places significant emphasis on white privilege the social construction of race and theoretical perspectives for understanding race and ethnicity

**America in Perspective** David Sokol,Adam Brandon,2022-07-26 America in Perspective argues without hesitation that America s best days are ahead if only we can continue to embrace the ideas and values that got us here in the first place When faced with challenges and conflict our system of government allows us to self correct and self heal and world history shows that this approach is uniquely American Today essential American values are being discredited such as the American Dream and our meritocratic spirit America in Perspective reviews American history warts and all and presents a path forward for modern America to secure a free and prosperous future for the next generation of Americans
