The Manual of Below-Grade Waterproofing Systems Justin Henshell, 2000 As the arsenal of weapons against leakage has grown so has confusion among architects and engineers attempting to select the best below grade waterproofing systems and materials Manufacturers literature offers little assistance during the selection process as well as being biased in favor of a particular product The first guide devoted exclusively to the subject The Manual of Below Grade Waterproofing Systems picks up where manufacturers manuals leave off Written by an architect with more than twenty years of experience designing habitable underground spaces it provides frank unbiased appraisals of various waterproofing materials and systems This manual presents architects and engineers with expert guidance on selecting designing with and specifying waterproofing materials and systems Justin Henshell walks you step by step through the entire waterproofing process from determining waterproofing needs to selecting and specifying waterproofing systems to preparing detailed drawings for construction documents And throughout he offers architectural details which illustrate general design principles as well as high quality photographs of waterproofing failures that help you to more clearly comprehend common design errors and problems associated with various waterproofing materials The Manual of Below Grade Waterproofing Systems is an indispensable working resource for architects civil engineers contractors specifiers materials manufacturers landscape architects and all other professionals involved with the design and construction of habitable underground spaces

Repairing and Extending Nonstructural Metals H.L. Simmons, 1990-07-31 To spite a national trend toward renovation restoration and remodeling construction products producers and their associations are not universally eager to publish recommendations for repairing or extending existing materials There are two major reasons First there are several possible applications of most building materials and there is an even larger number of different problems that can occur after products are installed in a building Thus it is difficult to produce recommendations that cover every eventuality Second it is not always in a building construction product producer's best interest to publish data that will help building owners repair their product Producers whose income derives from selling new products do not necessarily applaud when their associations spend their money telling architects and building owners how to avoid buying their products Finally in the Building Renovation and Restoration Series we have a reference that recognizes that problems frequently occur with materials used in building projects In this book and in the other books in this series xiii xlv Series Foreword Simmons goes beyond the promotional hyperbole found in most product literature and explains how to identify common problems He then offers informed inside recommendations on how to deal with each of the problems Each chapter covers certain materials or family

of materials in a way that can be understood by building owners and managers as well as construction and design professionals

The Manual of Below-Grade Waterproofing Justin Henshell, 2016-06-23 The ever evolving technology of waterproofing presents challenges and risks for architects and engineers who do not specialize in the field The revised edition of *The Manual of Below Grade Waterproofing Systems* provides the education and product information to enable designers to take a sound fundamental approach to these contemporary challenges Building designers specify waterproofing systems and materials that are often based on limited and subjective manufacturers literature or past experience with systems that work under specific conditions but will fail in other installations Leakage usually leads to litigation This book gives you the tools to prevent that This manual covers the history and science of waterproofing materials the considerable distinctions between waterproofing roofs and plazas and below grade surfaces the critical procedures for protecting waterproofing materials during construction diagnosing and remediating leaks writing specifications and detailing waterproofing components The pros and cons of every waterproofing material and system are comprehensively covered You will learn how to weigh positive versus negative side waterproofing systems weigh dampproofing versus waterproofing coordinate with all the professionals in the waterproofing delivery chain follow environmental protection and government regulations This book is an essential resource for architects civil engineers contractors designers materials manufacturers and all other professionals involved with the design and construction of underground spaces
