**Digital Media and Reporting Conflict** Daniel Bennett, 2013-07-18 This book explores the impact of new forms of online reporting on the BBC s coverage of war and terrorism Informed by the views of over 100 BBC staff at all levels of the corporation Bennett captures journalists shifting attitudes towards blogs and internet sources used to cover wars and other conflicts He argues that the BBC s practices and values are fundamentally evolving in response to the challenges of immediate digital publication Ongoing challenges for journalism in the online media environment are identified maintaining impartiality in the face of calls for more open personal journalism ensuring accuracy when the power of the former audience allows news to break at speed and overcoming the limits of the scale of the BBC s news operation in order to meet the demands to present news as conversation While the focus of the book is on the BBC s coverage of war and terrorism the conclusions are more widely relevant to the evolving practice of journalism at traditional media organizations as they grapple with a revolution in publication

lab A step by step guide to designing building and using a digital forensics lab A comprehensive guide for all roles in a digital forensics laboratory Based on international standards and certifications      Content Production for Digital Media Jay Daniel Thompson, John Weldon, 2022-02-11 This book provides an introduction to digital media content production in the twenty first century It explores the kinds of content production that are undertaken in professions that include journalism public relations and marketing The book provides an insight into content moderation and addresses the legal and ethical issues that content producers face as well as how these issues can be effectively managed Chapters also contain interviews with media professionals and quizzes that allow readers to consolidate the knowledge they have gathered through their reading of that chapter      **The BBC's management of digital media initiative** Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2011-04-07 This report examines the management of the contract with Siemens and the BBC s in house development of the Digital Media Initiative Programme The Programme is designed to transform the way in which BBC staff create use and share video and audio material It involves the development of new technology to allow staff to manage content efficiently on their desktops in order to give greater accessibility of digital content for audiences on TV online and radio The BBC has made good progress in delivering the programme in house since it terminated its contract with Siemens It is now on course to deliver the complete technology by summer 2011 With hindsight the BBC should not have let the contract for its Digital Media Initiative to Siemens without testing the contractor against other suppliers especially as there was a high degree of innovation involved The Programme is no longer expected to deliver the overall net financial benefit of 17.9 million originally anticipated The BBC approved the Programme on the basis that it would cost 81.7 million and deliver benefits of 99.6 million but now forecasts costs of 133.6 million and benefits of 95.4 million a net cost of 38.2 million The Committee welcomes the Trust s assurance that it would now take a more challenging approach when considering procurements but are concerned with the ease with which the BBC found over 50 million in savings to make up for the losses it suffered through late delivery of the project and its own increased delivery costs This suggests the need for a more vigilant approach to value for money      **Global Journalism Practice and New Media Performance** Yusuf Kalyango, Jr., D.
