The Othering Museum Carrie Westwater, 2024-05-23 The term othering refers to a persistent Us and Them dynamic between museums and their participating public To reframe this historically paternalistic subject positioning over the last decade or so many museums have made firm attempts to address this by attempting to move from being providers of engagements to facilitating access to cultural right by embedding co curatorial techniques and participation Through the analysis of three co curated participatory case studies this book examines how power performs in co curatorial museum practice It discusses how it is not just how the participatory process is enacted that is necessary to create this shift to a more socially just profile but systemic pressures of vulnerability and responsibility found in the political economy of the museum and its participants This book will chart how this dynamic performs in museums when working with different groups of people such as volunteers community participants and professional artists presented with differing levels of co curatorial decision making The book further investigates whether performances of power are relational to who the participants are how the processes of participation are constructed and where the participation takes place what language is used when conducting these relationships and what the funded institutional responsibilities do to the co curators the community and museum staff when traditional co curation and co curation in transition to non selective curation is applied Grounding this discussion is the development of this test method of non selective curation which further illuminates some of these challenges and aims to successfully mitigate them through a radically open and inclusive approach to co curation

Psychoanalysis in Hong Kong Diego Busiol, 2016-10-04 How is it possible that a phenomenon like psychoanalysis which has dominated the cultural and intellectual life of the last century in Europe North and South America has seemingly had little to no resonance in Hong Kong This book attempts to explain this phenomenon Addressing the subject from an East to West approach this book proposes an experience of displacement as it is argued that the opportunity for psychoanalysis today is not just to be exported to the East but rather to be re invented after an encounter with a radically different culture This encounter allows the Western practitioner to question their experience and highlights the assumptions of Western thought and knowledge Following this what remains of psychoanalysis as we know it How can psychoanalysis be re thought and re formed today in a format independent of different theoretical orientations and schools The book addresses key issues such as Is there psychoanalysis in Hong Kong How does one do research on psychoanalysis in Hong Kong Why was the Freudian Unconscious not discovered in China How can we describe the core of psychoanalysis and how can this description be understood in different cultural contexts Can psychoanalytic research be led by adopting a quantitative or statistical methodology Founded on the belief that psychoanalysis should be re invented in light of its encounter with non Western cultures this book highlights an opportunity to undertake this as an intellectual cultural and artistic challenge It will enrich researchers and students understanding of psychoanalysis and inform

broader views of psychoanalysis in non Western contexts Practicing psychoanalysts students of psychoanalysis and those seeking to understand psychanalysis in different cultural contexts will be particularly interested readers **Sexuality and Public Space in India** Carmel Christy,2017-03-16 The topic of sexuality and gender within the South Asian context is timely and widely discussed across a variety of academic disciplines Since the end of the last century there have been debates in the cultural sphere in India on issues concerning Lesbian Gay Bisexual Transgender people s rights gender sex workers rights and caste There has also been an explicit visibility for sexuality in the form of discussion around intimate scenes in films advertisements and moral concerns around pre marital heterosexual relationships and same sex relationships This book brings out the modalities through which explicit visibility of sexuality gets constituted in the public space of India after the 1990s The specificities through which relations of gender sexuality and caste get constituted and performed in regional media provide significant entry points to an understanding of larger structures and the ever present fissures through which these larger structures emerge Focussing on the southern state of Kerala the book investigates women s sexuality and caste through a number of case studies the Suryanelli rape case neology in the media and the debates around the life narratives of Nalini Jameela a sex worker The book does not stop at representational practices as it also looks at the negotiations between the subject and her represented figures which is a significant addition to the existing body of work in the field of media and gender studies **Sexuality and Public Space in India** is a careful interrogation of the mass mediatized space of contemporary public discourse around sexuality It will be of interest to academics in South Asian Studies Sociology Anthropology and Gender Studies **Alternative and Mainstream Media** Linda Jean Kenix,2011-11-01 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Historically alternative media have been viewed as fundamental albeit at times culturally peripheral forces in social change In this book however Kenix argues that these media do not uniformly subvert the hierarchies of access that are so central to mainstream media in fact their journalistic norms and routines have always been based on the professional standards of the mainstream Kenix goes on to posit the perception of mainstream and alternative as a misconception She argues that although alternative media can and do construct distinct alternative communications they have always existed on the same continuum as the mainstream and the two will continue to converge Through comparative analysis this book argues that many alternative and mainstream media are merging to create a continuous spectrum rooted in commercial ideology Indeed much of what is now considered alternative media actually draws very little from principles of the independent press whereas many contemporary mainstream media now use communication techniques more commonly associated with media that do not operate for financial gain This book puts forward a controversial but convincing argument around the relationship between alternative and mainstream media drawing on examples from the UK US Australia and New Zealand to strengthen and develop the central premise **What Media Classes Really Want to Discuss** Greg Smith,2010-09-13 What Media Classes Really Want

To Discuss focuses on topics that introductory textbooks generally ignore although they are prominent in students minds Using approachable prose this book provides students with a solid starting point for discussing their assumptions critically and encourages the reader to argue with the book furthering the discussion on media in everyday life and in the classroom
