Challenging the Growth Machine Barbara Ferman, 1996 Economic development and urban growth are the contested grounds of urban politics Business elites and politicians tend to forge pro growth coalitions centered around downtown development while progressive and neighborhood activists counter with a more balanced approach that features a strong neighborhood component Urban politics is often shaped by this conflict which has intellectual as well as practical dimensions In some cities neighborhood interests have triumphed in others the pro growth agenda has prevailed In this illuminating comparative study Barbara Ferman demonstrates why neighborhood challenges to pro growth politics were much more successful in Pittsburgh than they were in Chicago Operating largely in the civic arena Pittsburgh's neighborhood groups encountered a political culture and institutional structure conducive to empowering neighborhood progressivism in housing and economic development policymaking In contrast the pro growth agenda in Chicago was challenged in the electoral arena which was dominated by machine ward based politicians who regarded any independent neighborhood organizing as a threat Consequently neighborhood demands for policymaking input were usually thwarted Besides revealing why the development policies of two important American cities diverged Ferman's unique comparative approach to this issue significantly expands the scope of urban analysis Among other things it provides the first serious study to incorporate the civic sector neighborhood politics as an important component of urban regimes Ferman also emphasizes institutional and cultural factors often ignored or relegated to residual roles in other studies and expounds on their influence in shaping local politics and policy To add an analytical and normative dimension to urban analysis she focuses on the non elite actors not just the economic and political elites who compose governing coalitions Ultimately Ferman takes a more holistic and balanced view of large cities than is typical for urban studies as she argues that neighborhoods are an important integral part of what cities are and can be For that reason especially her work will have a profound impact upon our understanding of urban politics

*Japanese Auto Transplants in the Heartland* Robert Perrucci, 2017-09-29 The idea for this book was formed during the early 1980s when the author was studying the impact of plant closings on displaced workers and communities In one community workers who were displaced by a plant closing expected to receive retraining funds through the Job Training and Partnership Act JTPA only to find that the state had committed all the JTPA funds to train new workers for a Japanese transplant Soon it became apparent that deindustrialization job loss and economically depressed communities were linked with the escalating interstate competition to provide multi million dollar incentive packages for businesses to settle in their

state When Japanese automobile companies considered coming to the United States they fueled the interstate competition for these large projects which promised thousands of jobs and economic growth

**Comparative Civic Culture** Laura A. Reese,Raymond A. Rosenfeld,2016-05-23 The quest for a theoretical framework for understanding urban policy making has been a recurring focus of research into local governments Civic culture is a means for understanding how municipal policy makers weigh the interests of different groups govern the local community frame local goals engage in decision making and ultimately select and implement public policies While it seems that culture matters in local policy making how to measure culture in a valid and replicable fashion presents a significant challenge which the authors address in this book They present their findings of a large multi city research project to explore the nature of civic culture in cities in the US and Canada The focus of their analysis is on three overarching systems of community power system the community value system and the community decision making system The authors address a number of questions around the nature of civic culture and the relationships between the three systemic elements of civic culture to refine and apply a more sophisticated theory of urban policy making

Explorations in Economic Sociology Richard Swedberg,1993-08-19 Since the mid 1980s as public discourse has focused increasingly on the troubled economy many social scientists have argued the need for more analysis of the social relationships that undergird economic life The original essays in Explorations in Economic Sociology represent the most important work in this renewed field and employ a rich variety of research methods theoretical ethnographic and historical to illustrate its key concerns Explorations in Economic Sociology forges innovative social theories of such economic institutions as money markets and industry Although traditional economists have identified markets as driven solely by the forces of supply and demand social factors frequently intervene Sales at auction are determined not simply by a seller s personal knowledge of customers Shareholder attitudes and employee organization influence everything from the way firms borrow money to the way corporate performance is measured Firms themselves operate in social networks in which trust is a crucial factor in settling the terms for cooperation or competition Throughout the essays in this volume the contributors point the way to developing a more healthy economy by fostering productive industrial networks avoiding disintegration at management levels and anticipating the consequences of the shift from manufacturing to service industries Explorations in Economic Sociology is a pioneering work that bridges the gap between social theory and economic analysis and demonstrates the importance of this union in achieving an effective understanding of economic issues The book should stimulate new interest in economic sociology by bringing together many of its most fundamental voices
