Parker,Finley O. Graves,2013-12-04 This bibliography provides the reader with a comprehensive reference tool that will enhance understanding of methodological issues and enable the user to employ research methods appropriate to their subject of study It also provides accounting historians a comprehensive data base for the development of papers addressing methodological issues in an accounting history context Access to this type of resource is particularly crucial to the development of accounting history research since the number of papers dealing with methodological issues published in accounting history literature is very small Hence the references in this bibliography are drawn from the literature of general history economic and business history legal and social history and philosophy The scope and range of its contents are broad references are taken from texts as well as papers published in over 450 journals **Research Methodology in History and Historiography** I. L. Lal,2018 Research Methodology and Techniques in History ,2014 Researching History Education Linda S. Levstik,Keith C. Barton,2018-02-06 The authors research is well known and among the most important American works being done on how children learn history It is thus a great idea to gather this pivotal research in one place The volume offers a new perspective through the authors reflections on the research process It is profound without pomposity ideal for the intended audience the tone is just right There really isn t another book that does what this one does Stephen J Thornton University of South Florida Researching History Education combines a selection of Linda Levstik s and

Keith Barton's previous work on teaching and learning history with their reflections on the process of research. These studies address students' ideas about time, evidence, significance, and agency, as well as classroom contexts of history education and broader social influences on students and teachers' thinking. These pieces, widely cited in history and social studies education and typically required reading for students in the area, were chosen to illustrate major themes in the authors' own work and trends in recent research on history education. In a series of new chapters written especially for this volume, the authors introduce and reflect on their empirical studies and address three issues suggested in the title of the volume: theory, method, and context. Although research on children's and adolescents' historical understanding has been the most active area of scholarship in social studies in recent years, as yet there is little in-depth attention to research methodologies or to the perspectives on children's history and historical thinking that these methodologies represent. This book fills that need. The authors hope is that it will help scholars draw from the existing body of literature in order to participate in more meaningful conversations about the teaching and learning of history. *Researching History Education* provides a needed resource for novice and experienced researchers and will be especially useful in research methodology courses both in social studies and more generally because of its emphasis on techniques for interviewing children, the impact of theory on research, and the importance of cross-cultural comparisons.

**Research Methodology of History**, 2018 **Hand Book of Research Methodology in History** Murty K Satya, 1997 **On Research Methodology in Ancient and Byzantine History** Jarmila Bednaříková, Anna Žáková, 2015 *Church History* James E. Bradley, Richard A. Muller, 2016-03-22. In their acclaimed much used *Church History*, James Bradley and Richard Muller lay out guidelines, methods, and basic reference tools for research and writing in the fields of church history and historical theology. Over the years, this book has helped countless students define their topics, locate relevant source materials, and write quality papers. This revised, expanded, and updated second edition includes discussion of Internet-based research, digitized texts, and the electronic forms of research tools. The greatly enlarged bibliography of study aids now includes many significant new resources that have become available since the first edition's publication in 1995. Accessible and clear, this introduction will continue to benefit both students and experienced scholars in the field.

**Research Methods for History** Simon Gunn, 2011-11-30. Providing a lively critical survey of methods for historical research at all levels, this textbook covers well-established sources and methods together with those that are less widely known. It reflects current theoretical and technical approaches to history.

**Methodology of History** Y. Topolski, 2011-11-11. No discipline has been more praised or more criticized than the writing of history. Cioero claimed that history teaches men how to live. Aris totle denied it the very name of science and regwded poetry as the higher wisdom. At various times history has been assigned a commanding or a demeaning status in the hierarchy of sciences. Today one can admire the increasing precision and sophistication of the methods used by historians. On the other hand, Thucydides' *History of the Peloponnesian War* still serves as the ideal model of how to reconstruct the historical past. Even those who deny the

possibility of an objective reconstruction of the past would themselves like to be recorded by historians objectively or not. Dislike of history and fear of its verdict are not incompatible with reverence and awe for its practitioners, the historians. So man's attitude to history is ambiguous. The controversy about history continues. Widely differing issues are at stake. Historians themselves, however, are the least engaged in the struggle. Rarely does a historian decide to open the door of his study and join in the melee about the meaning of history. More often he slams it shut and returns to his studies, oblivious of the fact that with the passage of time the gap between his scientific work and its audience might widen. The historian does not shun the battle; he merely chooses his own battleground.

**The Primacy of Method in Historical Research** Jonas Ahlskog, 2021

How does history relate to the past? According to leading historical theorists, the relation to the past in history is reducible to evidential, psychological, practical, and retrospective concerns. In contrast, this volume claims that historical relations to the past are irreducible products of the logical commitments of history as method. Ahlskog argues that the method of history shapes and enables relations to the past in historical research by invoking past perspectives of meaning for rendering reality intelligible. The book provides a much needed philosophical clarification of key concepts in one of the most fundamental debates within the humanities today.
