The Ukraine war and its food security implications for India SJ, Balaji,Babu, Suresh Chandra,2022-09-26 Russia's war on Ukraine shows no signs of subsidence Its economic and societal adversities have already been felt worldwide but keep evolving with food and energy being the most affected Low income food deficit nations importing from these two countries many of which are in Northern Africa and Western and Central Asia face critical challenges The South Asian region which has grappled with surging commodity prices and supply constraints even before the war is likely to witness further inflation with rising food and oil prices India is home to around 18% of the world's population and accounts for 74% of the South Asian population It is predicted to be the fastest growing big economy this year The country's central bank RBI predicts that GDP will grow by 7.5% in FY 2022-23 RBI 2022 while many international organizations forecast growth between 6.4% and 8.2% ADB 2022 IMF 2022 United Nations 2022 World Bank 2022 Still in the wake of the ill effects of COVID-19 the country's dependence on imports such as oil fertilizers and edible oils and given surging domestic food and nonfood inflation in recent months raises concerns about economic stability and possible interventions that might curtail fragility The country consumes

around 5 million barrels of crude oil daily but imports over 89% of its requirement from overseas Crude oil prices have increased by 27% in just four months since the start of the war February June 2022 Edible oils have similarly increased with palm and soybean oil prices rising by around 14% and 18% respectively The price of sunflower seed oil has increased by 42% of which 86% originates from Ukraine and Russia Fertilizer import dependency from the conflict regions is also sizeable Russia was the 5th largest supplier of fertilizers to India in 2021 22 and Ukraine and Belarus were the 9th and 10th largest suppliers The rise in prices of both finished fertilizers and fertilizer inputs has prompted the Government to double the fertilizer subsidy budgeted earlier this year This policy brief investigates India s susceptibility to the war s disruptions and higher prices for commodities where import dependence is high It then discusses potential income food and nutritional impacts on farmers the poor and the vulnerable It also evaluates the Government s policy measures such as subsidization social safety nets and trade diversification to reduce the impact of the war Finally it explores the market opportunities the conflict has created and the required structural reforms that would equip the country to handle such shocks in the future

Nuclear Terrorism and Global Security Alan J. Kuperman, 2013-04-17 This book examines the prospects and challenges of a global phase out of highly enriched uranium and the risks of this material otherwise being used by terrorists to make atom bombs Terrorist groups such as Al Qaeda have demonstrated repeatedly that they seek to acquire nuclear weapons Unbeknownst even to many security specialists tons of bomb grade uranium are trafficked legally each year for ostensibly peaceful purposes If terrorists obtained even a tiny fraction of this bomb grade uranium they could potentially construct a nuclear weapon like the one dropped on Hiroshima that killed tens of thousands Nuclear experts and policymakers have long known of this danger but so far have taken only marginal steps to address it This volume begins by highlighting the lessons of past successes where bomb grade uranium commerce has been eliminated such as from Argentina s manufacture of medical isotopes It then explores the major challenges that still lie ahead for example Russia s continued use of highly enriched uranium HEU in dozens of nuclear facilities Each of the book s thirteen case studies offers advice for reducing HEU in a specific sector These insights are then amalgamated into nine concrete policy recommendations for U S and world leaders to promote a global phase out of bomb grade uranium This book will be of much interest to students of nuclear proliferation global governance international relations and security studies *The Evolution of International Security Studies* Barry Buzan, Lene Hansen, 2009-08-27 The first intellectual history of International Security Studies since 1945 providing an unparalleled survey for students and scholars **The Oxford Handbook of Space Security** Saadia M. Pekkanen, P. J. Blount, 2024 The Oxford Handbook of Space Security focuses on the interaction between space technology and international and national security processes Saadia M Pekkanen and P J Blount have gathered a group of key scholars who bring a range of analytical and theoretical perspectives to take an analytically eclectic approach to assessing space security from an international relations IR theory perspective Bringing together scholarship from a group of leading experts this
