**Social and Environmental Disclosure by Chinese Firms** Yingjun Lu, Indra Abeysekera, 2024-11-01 Given the increased social and environmental problems in China this book looks into the social and environmental disclosure practices of socially responsible Chinese listed firms by constructing a stakeholder driven three dimensional disclosure index The book contains a three part study the first part explores the current status of social and environment disclosure practices The second part empirically examines the relationship between corporate social and environmental disclosure and various influencing factors i e stakeholders power and corporate characteristics The third part empirically examines the link between

corporate social responsibility CSR reporting i.e publishing a CSR report and the quality of the CSR report and socially responsible reputation The book finds that the CSR report provided more stakeholder relevant social and environmental disclosure than the annual report It also finds that corporate characteristics such as firm size profitability and industry classification are all statistically significant factors influencing the social and environmental disclosure of the Chinese firms studied Shareholders significantly influenced firms social and environmental disclosure and creditors significantly influenced firms disclosure related to their environmental performance The final part of the study reports that publishing a CSR report and CSR reporting quality had a positive influence on firms socially responsible reputations and that the CEO chairman duality negatively influenced firms socially responsible reputation This book will be of interest to those who are keen to learn more about corporate social responsibilities in the context of Chinese firms

**Contemporary Developments in Green Human Resource Management Research** Douglas W.S. Renwick, 2018-01-12 This book examines a new topic in Human Resource Management HRM green or environmental HRM analysing the role humans play in environmental management at work and environmental behaviours at workplaces around the world The book begins with a focus on negative workplace green behaviours e.g toxic chemical leaks air pollution contaminated waste etc and what such environmental problems mean for workers managers and society as a whole This book outlines relevant underpinning academic theory and research literature on how HRM is going green and details real life organisational examples derived from original and secondary empirical research to illuminate the implications of adopting Green HRM practices for relevant stakeholders In doing so the book offers a new academic contribution to both the HRM and environmental management literatures

**Trust, Control, and the Economics of Governance** Philipp Herold, 2019-06-05 In today's world we cooperate across legal and cultural systems in order to create value However this increases volatility uncertainty complexity and ambiguity as challenges for societies politics and business This has made governance a scarce resource It thus is inevitable that we understand the means of governance available to us and are able to economize on them Trends like the increasing role of product labels and a certification industry as well as political movements towards nationalism and conservatism may be seen as reaction to disappointments from excessive cooperation To avoid failures of cooperation governance is important control through e.g contracts is limited and in governance economics trust is widely advertised without much guidance on its preconditions or limits This book draws on the rich insight from research on trust and control and accommodates the key results for governance considerations in an institutional economics framework It provides a view on the limits of cooperation from the required degree of governance which can be achieved through extrinsic motivation or building on intrinsic motivation Trust Control Economics thus inform a more realistic expectation about the net value added from cooperation by providing a balanced view including the cost of governance It then becomes clear how complex cooperation is about governance accretion where limited trustworthiness is substituted by control and these control instances need to be governed in turn

Trust Control and the Economics of Governance is a highly necessary development of institutional economics to reflect progress made in trust research and is a relevant addition for practitioners to better understand the role of trust in the governance of contemporary cooperation structures It will be of interest to researchers academics and students in the fields of economics and business management institutional economics and business ethics Note that this work is the first of its kind that explicitly reflects on the societal realities how these drive the assumption setting process and how these assumptions influence the theory outcome **ECRM 2017 16th European Conference on Research Methods in Business and Management** Dr Anthony Buckley,2017
