Hayre, Xiaoming Zheng, 2021-09-28 This book provides an holistic picture of the application of research in radiography and focuses on multivariant methodological approaches and practices It will provide readers insight into both contemporary and innovative methods within radiography research backed up with evidence based literature This book may also be translated into other health disciplines as it introduces research to the reader by detailing terms that can often be confusing for students These remain central in understanding the importance of research in radiography and how the generation of new knowledge is obtained This will be supported with subsequent chapters concerning the literature formation of research questions and

detail the early beginnings of a research proposal Chapters will include a wide range of topics such as quantitative and qualitative methodologies and data collection tools pertinent to radiographic research whilst discussing data analysis and need for rigor The authors draw from our experiences published outputs and clinical work supported with alternate philosophies and methods used in diagnostic radiography Each chapter will examine the multifaceted use and application of each sub theme pertinent to research in radiography which is presented in a single text for students and perhaps practitioners The targeted audience for this book is interdisciplinary but clearly focuses on those studying undergraduate radiography in response to the limited texts available We also anticipate it to provide a useful tool for academics delivering undergraduate radiography programmes and those supporting postgraduate research The key features will explore important research approaches and concepts within diagnostic radiography provide contemporary evidence based practice regarding mixed method approaches provide a how to guide for understanding key research principles in a wide range of radiographic settings evaluate the impact of research on patients and the radiographer patient relationship Dr Christopher Hayre is a Senior Lecturer in Diagnostic Radiography at Charles Sturt University in New South Wales Australia Dr Xiaoming Zheng has been teaching medical radiation science courses at Charles Sturt University since 1998

Handbook of Qualitative Research Methods in Entrepreneurship Helle Neergaard, John P. Ulhøi, 2007 the Handbook of Qualitative Research Methods in Entrepreneurship is an important contribution to the field and should be referenced in any paper using qualitative methodologies to investigate the entrepreneurial phenomenon Craig S Galbraith Journal of Enterprising Communities There is no hiding behind the ramparts of dry scholarship here The credibility of the theory being spoken of is not the stuff of constructed proofs but alignments of critical insight and utility This is where qualitative work can make a difference to the field and where this book makes its mark Robin Holt International Journal of Entrepreneurial Behaviour and Research The Handbook of Qualitative Research Methods in Entrepreneurship is an unusually solid and multifaceted book on what qualitative methods have done are doing and will do in entrepreneurship research Every serious entrepreneurship scholar should read it It points at the future Bjørn Bjerke University of Kalmar Sweden I would warmly recommend this unique collection of qualitative methods of entrepreneurship research to both mature and beginning researchers as a menu to choose from for their planned empirical studies For those who try to get away from only quantitative studies in both business practice and academic research this book is their chance to find a rich inspiration in reflecting on entrepreneurship as a lived experience using grounded theory and ethnographic discourse and narrative approaches It might convince editors of top journals of entrepreneurship research to welcome qualitative research submissions as an indispensable complement to quantitative only submissions This domain is not physics In bringing together such a variety of experts from so many nationalities in this Handbook our Danish colleagues are making entrepreneurship research a realistic global venture Jan Ulijn Eindhoven University of Technology The Netherlands Helle Neergaard and John Parm Ulhøi have compiled a remarkable

collection of work that both represents the range of methods and demonstrates the depth of insight that can be achieved through qualitative approaches This book is not simply a handbook of qualitative research methods though it well achieves this aim it is also an important contribution towards the field of entrepreneurship research From the Foreword by Sara Carter This expansive and practical Handbook introduces the methods currently used to increase the understanding of the usefulness and versatility of a systematic approach to qualitative research in entrepreneurship It fills a crucial gap in the literature on entrepreneurship theory and just as importantly illustrates how these principles and techniques can be appropriately and fruitfully employed The Handbook is underpinned by the belief that qualitative research has the potential to charter hitherto unexplored waters in the field of entrepreneurship and thus contribute significantly to its further advancement The contributors seek to assist entrepreneurship researchers in making more informed choices and designing more rigorous and sophisticated studies They achieve this by providing concrete examples of research experiences and tangible how to advice By clarifying what these research methods entail how they are currently being used and how they can be evaluated this Handbook constitutes a comprehensive and highly accessible methodological toolbox Dealing with both well accepted qualitative approaches and lesser known rarer and more novel approaches to the study of entrepreneurship this Handbook will be invaluable to those studying researching and teaching entrepreneurship
