criticism of imperial maneuvers by proto human rights activists including George Washington Williams Mark Twain Olive Schreiner and E D Morel **Archives of Empire** Mia Carter, Barbara Harlow, 2003 A collection of original writings and documents from British colonialism in Africa The Political Economy of a Plural World Robert W. Cox, Michael G. Schechter, 2003-08-29 Building on his seminal contributions to the field Robert W Cox engages with the major themes that have characterized his work over the past three decades and the main topics which affect the globalized world at the start of the twentieth century This new volume by one of the world s leading critical thinkers in international political economy addresses such core issues as global civil society power and knowledge the covert world multilateralism and civilizations and world order With an introductory essay by Michael Schechter which addresses current critiques of Coxian theory the author enters into a stimulating dialogue with critics of his work Timely provocative and original this book is a major contribution to international political economy and is essential reading for all students and academics in the field *Cimboa* ,1996 Revista caboverdiana de letras artes e estudos a journal of letters arts and studies *Savage Constructions* Wendy C. Hamblet, 2008-03-26 *Savage Constructions* composes a critical examination of the popular assumption that violence is an essential quality of certain ethnic or racial populations Wendy Hamblet challenges the supposition all too common in the West that darker skinned peoples are inherently violent To challenge this myth *Savage Constructions* offers a theory of subjectivity transformed by historical violence It rethinks how African peoples once living in simple neighborly communities more democratic and egalitarian than modern states have come to the condition of abjection misery and fierce aggression in which we find them today This rethinking she argues that Western affluence is built upon slaughter slavery and colonial oppression and suggests that prosperous nations of the West owe a great debt to the societies they trampled en route to their prosperity This work is important because Newly independent nations of Africa are a primary example of a much vaster phenomenon Western powers continue to sack poorer weaker countries through covert intrigue outright war crippling debts and unfair global labor and trade policies The violences continue because many Westerners still harbor metaphysical assumptions about the supremacy of white Christians over less civilized darker skinned peoples These assumptions depress the possibilities of ethnic minorities within the West continue to influence foreign policy and frustrate global relations and ensure that the overwhelming collateral damage of modern wars is color conscious *Savage Constructions* will appeal to all levels of scholars and students **Across Cultural Borders** Eckhardt Fuchs, Benedikt Stuchtey, 2002 This innovative work offers the first comprehensive transcultural history of historiography The contributors transcend a Eurocentric approach not only in terms of the individual historiographies they assess but also in the methodologies they use for comparative analysis Moving beyond the traditional national focus of historiography the book offers a genuinely comparative consideration of the commonalities and differences in writing history Distinguishing among distinct cultural identities the contributors consider the ways and means of intellectual transfers and assess the strength of local historiographical traditions as they are

challenged from outside The essays explore the question of the utility and the limits of conceptions of modernism that apply Western theories of development to non Western cultures Warning against the dominant tendency in recent historiographies of non Western societies to define these predominantly in relation to Western thought the authors show the extent to which indigenous traditions have been overlooked The key question is how the triad of industrialization modernization and the historicization process which was decisive in the development of modern academic historiography also is valid beyond Europe Illustrating just how deeply suffused history writing is with European models the book offers a broad theoretical platform for exploring the value and necessity of a world historiography beyond Eurocentrism **Beyond the Political**

Spider, 2023-01-10 Beyond the Political Spider Critical Issues in African Humanities by Kwesi Yankah is the first title in the newly established African Humanities Association AHA publication series By integrating his own biography into a critique of the global politics of knowledge production Yankah through a collection of essays interrogates critical issues confronting the Humanities that spawn intellectual hegemonies and muffle African voices Using the example of Ghana he brings under scrutiny amongst others endemic issues of academic freedom gender inequities the unequal global academic order and linguistic imperialism in language policies in governance In the face of these challenges the author deftly navigates the complex terrain of indigenous knowledge and language in the context of democratic politics demonstrating that agency can be liberatory when emphasising indigenous knowledge especially expressed through the idiom of local languages and symbols including Ananse the protean spider folk hero in Ghana and most parts of the pan African world Unveiling

Traditions Anouar Majid, 2000-11-29 Questions the intellectual assumptions that prevent an understanding of potential Islamic contributions toward a more egalitarian world civilization The Global Resistance Reader Louise Amoore, 2005 The Global Resistance Reader provides the first comprehensive collection of work on the phenomenal rise of transnational social movements and resistance politics from the visible struggles against the financial economic and political authority of large international organizations such as the World Trade Organization World Bank and International Monetary Fund to the much less visible acts of resistance in everyday life The conceptual debates substantive themes and case studies have been selected to open up the idea of global resistance to interrogation and discussion by students and to provide a one stop orientation for researchers journalists policymakers and activists *Making Good the Claim* Rufus Burrow, 2016-02-16 The Church of God

Reformation Movement founded in 1881 has the distinction of having been founded on the two core principles of holiness and visible unity Standard histories of the group proudly argue that the founder and pioneers exhibited a zeal for interracial unity that began to wane only in the early years of the twentieth century This book rejects that claim and argues instead that little to no extant hard evidence supports that view Moreover Making Good the Claim argues that while blacks eagerly joined the group they did so not because whites expended much energy evangelizing among them but because they heard something deeper in the message of holiness and visible unity than God's expectation that members achieve spiritual and church unity

Unlike most whites blacks interpreted the message to call for unity along racial lines as well This book challenges members of the Church of God to begin forthwith to make good their historic claim about holiness and visible unity particularly as it applies to interracial unity

Poverty From The Wealth of Nations M. Alam,2016-02-05 In Poverty from the Wealth of Nations the author presents an analysis of the evolution of global disparities that goes beyond the earlier neo Marxist critiques of global capitalism He moves beyond their narrative by inserting two additional asymmetries into the global economy those created by unequal races and unequal states The author analyzes not only the power of markets but the powers that shaped these markets More importantly he marshals cross country evidence to show that loss of sovereignty retarded industrialization human capital formation and economic growth
