Reading Human Nature Joseph Carroll,2011-03-01 As the founder and leading practitioner of literary Darwinism Joseph Carroll remains at the forefront of a major movement in literary studies Signaling key new developments in this approach Reading Human Nature contains trenchant theoretical essays innovative empirical research sweeping surveys of intellectual history and sophisticated interpretations of specific literary works including The Picture of Dorian Gray Wuthering Heights The Mayor of Casterbridge and Hamlet Evolutionists in the social sciences have succeeded in delineating basic motives but have given far too little attention to the imagination Carroll makes a compelling case that literary Darwinism is not just another school or movement in literary theory It is the moving force in a fundamental paradigm change in the humanities a revolution Psychologists and anthropologists have provided massive evidence that human motives and emotions are rooted in human biology Since motives and emotions enter into all the products of a human imagination humanists now urgently need to assimilate a modern scientific understanding of human nature Integrating evolutionary social science with literary humanism Carroll offers a more complete and adequate understanding of human nature

The Faculties of the Human Mind and the Case of Moral Feeling in Kant's Philosophy Antonino Falduto,2014-04-02 In the past few decades a remarkable change occurred in Kant scholarship the other Kant has been discovered i e the one of the doctrine of virtue and the anthropology Through the rediscovery of Kant s investigations into the empirical and sensuous aspects of knowledge our understanding of Kant s philosophy has been enriched by an important element that has allowed researchers to correct supposed deficiencies in Kant s work In addition further questions concerning the nature of Kant s philosophy itself have been formulated the more the other Kant comes to the fore the stronger the question concerning the connection between pure philosophy and empirical investigation becomes The aim of this study is to show that the psychological and anthropological interpretations of Kant s pure philosophy are not convincing and at the same time to illustrate some connections between his critical and anthropological investigations by means of an analysis of the theory of the faculties Against both a transcendental psychological and an anthropological reading the book presents Kant s theory of the faculties as a constitutive part of his critical philosophy and shows that there is a close connection between Kant s pure philosophy and his moral aesthetic

Memories That Matter Christopher R. Madan,2024-03-28 What makes some experiences more memorable than others How can you better remember specific

information later Memories That Matter addresses these questions and more The book is divided into three main parts with each part focusing on a different aspect of memory After the introductory first part Part II discusses everyday uses of memory and why we remember establishing a foundation for how memory is structured and stored in the brain Part III dives into what makes us remember Emotional and rewarding experiences are both more memorable than mundane experiences but are often studied using different approaches Self relevance and objects we can interact with are remembered better than less relevant information The author explores these motivation related influences on memory and considers whether a common mechanism underlies them all Part IV changes the focus discussing how we sometimes want to remember specific information that does not automatically capture our attention The book considers evidence based learning strategies and memory strategies whilst also exploring real world applications with discussion of professions that accomplish amazing memory feats daily The book concludes with a reflection on how the role of memory is changing as our world makes information increasingly accessible particularly with the ever expanding influence of the internet Drawing from a variety of literatures and perspectives this important book will be relevant for all students of memory from psychology cognitive neuroscience and related health backgrounds

The Projective Use Of Mother-And- Child Drawings: A Manual Jacquelyn Gillespie,2013-08-21 A unique and powerful new projective technique is now available to mental health professionals Based on the most primary of human relationships that between mother and child this technique is able to foster projections and identify perceptions of self and others that carry an unusually strong component of unconscious material Strikingly clear and accessible The Projective Use of Mother and Child Drawings is one of the few books on projective techniques to provide a consistent theoretical outlook

and to address the very significant issues of transference and countertransference as they relate to this technique While firmly grounded in a psychodynamic view of personality development the volume also conveys a clinical outlook with applications suitable to a variety of theoretical paradigms The author comprehensively considers the theoretical and practical aspects of mother and child drawings and how to both use and assess them to gain insight into the most fundamental reaches of the self She consistently cautions against overly simplified interpretations of the drawings and stresses the importance of using conclusions drawn from them only as indications for further assessment confirmation or rejection The book is replete with examples of mother and child drawings from all age groups in both average populations and those with both mental and physical pathologies The volume opens with a careful discussion of the theoretical considerations behind mother and child drawings as well as the development and validation of projective drawing techniques in general The next section on research issues discourages diagnostic labeling in favor of making optimum use of the highly personal and idiosyncratic nature of these drawings This chapter features an interesting attempt to classify mother and child drawings in relation to size of the figures A particularly fascinating chapter on the impact of art on the therapist focuses on artwork done by professional artists who have addressed the mother and child theme The author explores and analyzes several thematic works of art from varying time periods and cultures It is her intent to help mental health professionals to explore their responses to pictorial art as individuals and thereby gain new understandings of related transference and countertransference issues with clients Chapter four provides clear instructions for administering mother and child drawings as a projective technique and guidelines for their interpretation This section provides samples and analyses of age typical drawings from the general population They vary greatly in style and artistic proficiency and are included to provide an idea of the usual developmental sequence of drawing characteristics from early childhood through the adult years Drawings of groups with demonstrated psychological pathologies or physical and developmental abnormalities comprise the final chapter This section approaches the interpretation of drawings by asking questions about how they communicate basic self and object relations issues This commanding volume of interest to students and professionals alike will provide art therapists school psychologists and mental health practitioners of all stripes with a powerful new projective technique to add to their professional
