Stephens,2016-06-01 China s traditional system of dispute resolution and maintenance of order in society has been treated by Western scholars as legal history but because the Chinese

system is radically different from European systems in its conceptual structure and therefore does not fit into the familiar categories and models of Western law and jurisprudence such treatment has been inadequate and often misleading In *Order and Discipline in China* Thomas B Stephens provides a new approach methodology and theoretical framework for the interpretation of traditional Chinese law Stephens argues convincingly that Chinese society has always operated according to the disciplinary system of order in which hierarchy is established by actual power and he provides a thorough methodology and framework for understanding disciplinary theory He discusses the system showing it not the random or even unjust tyranny it may sometimes appear to the Western legally oriented mind but an effective system that successfully guided China for centuries The study is not merely historical but provides insights into Chinese ways of thinking about social relationships dispute resolution and the enforcement of civil obligations that are vital to intercultural understanding today His study is based on the activities of the Mixed Court of the International Settlement at Shanghai which dealt with legal problems concerning Chinese people within the representative or assessor The Mixed Court conventionally has been looked upon as a disciplinary tribunal enforcing a system of dispute resolution and the maintenance of social order upon the principles of disciplinary theory The Mixed Court is a convenient point from which to measure the legal and disciplinary systems against each other and to study them in conflict Although Western powers tried to interpret the court in legal terms it responds much more convincingly to analysis according to the disciplinary system it provided its right to rule by the ability to enforce its decisions and it decided cases not as claimed by Chinese laws which actually did not exist but according to those principles established by the Western consuls *Order and Discipline in China* will be of interest not only to legal scholars and students of Chinese history and society but also to students of social order and international relations throughout the world It also offers practical assistance to Westerners dealing with Chinese business relations social and political affairs or dispute settlement

*Asia-Pacific Legal Development* Gerry Ferguson, 1998-11-01 In this age of globalization many legal experts see evidence of swift global movement toward an eventual single world legal system Yet the trend to political and economic integration in some parts of the world is matched by the trend to disintegration in others where strong cultural and political resistance to external influences exists *Asia Pacific Legal Development* traces current and prospective developments in several legal systems of the Asia Pacific region to make sense of these trends and counter trends The contributing authors represent a

wide variety of specialist expertise both public and private and together they encompass the three sectors that constitute a modern system of formal law the economic the behavioural and the civic Taking into account the opinions and perspectives of both indigenous and non indigenous experts on topics ranging from prostitution to constitutional law the book surveys how several ASEAN nations as well as Canada Australia and New Zealand are confronting social economic and legal change In the first three parts chapters are grouped along general sectoral lines to cover economic civic and behavioural themes while in the fourth cross sectoral contexts are addressed With the introduction and concluding chapter the editors provide an overall integrating framework as well as provocative insights into trends in legal development in the Asia Pacific region and on comparative legal research and writing in general Asia Pacific Legal Development is not only an exemplary model for cooperative and comparative legal research and scholarly pluralism but also a rich study of the increasingly relevant issue of convergence and divergence of legal systems with a unique Asian focus
