Interpreting the Environment at Museums and Historic Sites Debra A. Reid, David D. Vail, 2019-09-19 Interpreting the Environment at Museums and Historic Sites is for anyone who wants to better understand the environment that surrounds us and sustains us who wants to become a better steward of that environment and who wants to share lessons learned with others The process starts by focusing attention on the environment the physical space that constitutes the largest three dimensional object in museum collections It involves conceptualizing spaces and places of human influence spaces that contain layer upon layer documenting human struggles to survive and thrive This evidence exists in natural environments as well as city centers The process continues by adopting an environment centric view of the spaces destined to be interpreted This mind set forms the basis for devising research plans that document how humans have changed destroyed conserved and sustained spaces over time and the ways that the environment reacts Interpretation built on this evidence then becomes the basis for minds on engagement with the places

that humans inhabit and the spaces that they have changed and continue to manipulate Interpreting the Environment at Museums and Historic Sites provides a tool kit designed to help you research environmental history document evidence of human influence on land and the environment over time and tailor that knowledge to new public engagement It proposes a multi disciplinary approach that requires expertise in the humanities as well as the sciences and social sciences to best understand space and place over time It incorporates case studies of the theory and method of environmental history to explore how human goals take lasting shape in the environment creating working environments getting water generating and harnessing power growing food traveling and trading building things and preserving natural landscapes Features include the Interpreting the Environment Tool Kit to help you launch the good work of interpreting the environment Raw Materials the evidence landscape ecosystems artifacts and the built environmentPreparation methods thinking like a naturalist scientist thinking like a historian combining approachesPlanning envisioning the goal proactive message stewardship sustainabilityPartnerships sharing work strength in numbers allying across disciplinary divides united in efforts to inform the public about their individual and collective effects on the landscape and the environmentPotential educating the public about people and places is part of a world wide goal with the cumulative effect of saving the planet one story at a time A Timeline and Bibliographic essay round out the book s resources

exclusive essay by Kate Haulman examines the evolution of the field of women's history and the state of women's history today New Chapter 2 now focuses on Native American women while a new Chapter 3 covers witches and their accusers in New England and the Salem witch trials New Chapter 6 draws on recent scholarship on the roles of ordinary and elite women in the numerous reform movements of the Early Republic Revised Chapter 7 rethinks and refocuses the text's coverage of women's roles in slavery and the Civil War and more directly addresses the lives of African American women during and after slavery New Post 1960 coverage in Chapters 15-16 has been thoroughly revised to highlight the women's movement women's health recent immigration and economic changes affecting women **Guide to U.S. Environmental**

Policy Sally K. Fairfax, Edmund Russell, 2014-08-14 Guide to U.S. Environmental Policy provides the analytical connections showing readers how issues and actions are translated into public policies and persistent institutions for resolving or managing environmental conflict in the U.S. The guide highlights a complex decision-making cycle that requires the cooperation of government, business, and an informed citizenry to achieve a comprehensive approach to environmental protection. The book's topical, operational, and relational essays address development of U.S. environmental policies, the federal agencies and public and private organizations that frame and administer environmental policies, and the challenges of balancing conservation and preservation against economic development, the ongoing debates related to turning environmental concerns into environmental management, and the role of the U.S. in international organizations that facilitate global environmental governance. Key Features: 30 essays by leading conservationists and scholars in the field investigate the fundamental political, social, and economic processes and forces driving policy decisions about the protection and future of the environment. Essential themes traced through the chapters include natural resource allocation and preservation, human health, rights of indigenous peoples, benefits of recycling, economic and other policy areas impacted by responses to green concerns, international cooperation, and immediate and long-term costs associated with environmental policy. The essays explore the impact made by key environmental policymakers, presidents, and politicians, as well as the topical issues that have influenced U.S. environmental public policy from the colonial period to the present day. A summary of regulatory agencies for environmental policy, a selected bibliography, and a thorough index are included. This must-have reference for political science and public policy students who seek to understand the forces that U.S. environmental policy is suitable for academic, public, high school, government, and professional libraries **The Environment and World History** Edmund Burke, Kenneth

Pomeranz, 2009-04-08 In 11 essays, the contributors examine the connections between environmental change and other major topics of early modern world history: population growth, commercialization, imperialism, industrialization, the fossil fuel revolution, and more **Major Problems in American History** Elizabeth Cobbs Hoffman, Jon Gjerde, 2002 [Encyclopedia of Historians and Historical Writing](#) Kelly Boyd, 2019-10-09 The Encyclopedia of Historians and Historical Writing contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama. Over

300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like Jürgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate. Additionally, the Encyclopedia includes some 200 essays treating the development of national, regional, and topical historiographies from the Ancient Near East to the history of sexuality. In addition to the Western tradition, it includes substantial assessments of African, Asian, and Latin American historians and debates on gender and subaltern studies. *Major Problems in American Colonial History* Karen Ordahl Kupperman, 2000

Introduces students to both primary sources and analytical essays on topics in US history. **Rachel Carson and Her Sisters** Robert K. Musil, 2014-04-01. In *Rachel Carson and Her Sisters*, Robert K. Musil redefines the achievements and legacy of environmental pioneer and scientist Rachel Carson, linking her work to a wide network of American women activists and writers and introducing her to a new contemporary audience. Rachel Carson was the first American to combine two longstanding but separate strands of American environmentalism: the love of nature and a concern for human health. Widely known for her 1962 best seller *Silent Spring*, Carson is today often perceived as a solitary great woman whose work single-handedly launched a modern environmental movement. But as Musil demonstrates, Carson's life's work drew upon and was supported by already existing movements, many led by women in conservation and public health. On the fiftieth anniversary of her death, this book helps underscore Carson's enduring environmental legacy and brings to life the achievements of women writers and advocates such as Ellen Swallow Richards, Dr. Alice Hamilton, Terry Tempest Williams, Sandra Steingraber, Devra Davis, and Theo Colborn, all of whom overcame obstacles to build and lead the modern American environmental movement.

General Technical Report RMRS, 1998. *After the Death of Nature* Kenneth Worthy, Elizabeth Allison, Whitney Bauman, 2018-11-09. Carolyn Merchant's foundational 1980 book *The Death of Nature: Women, Ecology, and the Scientific Revolution* established her as a pioneering researcher of human-nature relations. Her subsequent groundbreaking writing in a dozen books and over one hundred peer-reviewed articles have only fortified her position as one of the most influential scholars of the environment. This book examines and builds upon her decades-long legacy of innovative environmental thought and her critical responses to modern mechanistic and patriarchal conceptions of nature and women, as well as her systematic taxonomies of environmental thought and action. Seventeen scholars and activists assess, praise, criticize, and extend Merchant's work to arrive at a better and more complete understanding of the human place in nature today and the potential for healthier and more just relations with nature and among people in the future. Their contributions offer personal observations of Merchant's influence on the teaching, research, and careers of other environmentalists. *Creation, God, and Humanity* Catherine Wright, 2017. Examines the history and development of ecological theological anthropology and how it engages human suffering so that people of faith can better understand the suffering inherent to earth's creative processes and that inflicted by human sin. **Environmental Issues in American History** Chris J. Magoc, 2006-04-30. Uses textual

analysis primary source documents and an issues centered approach to introduce American environmental history **Game in the Garden** George Colpitts,2010-10-01 Frontier and pioneer societies provide numerous unexplored avenues of social history Game in the Garden identifies the imaginative use of wild animals in early western society In what is now western Canada humans have long used wildlife in order to survive their surroundings better understand their natural world and form aspects of their identity The shared use of wild animals has helped to determine social relations between Native peoples and newcomers In later settlement periods controversy about subsistence hunting and campaigns of local conservation associations drew lines between groups in communities particularly Native peoples immigrants farmers and urban dwellers In addition to examining grassroots conservation activities Colpitts identifies early slaughter rituals iconographic traditions and subsistence strategies that endured well into the interwar years in the twentieth century Drawing primarily on local and provincial archival sources he analyzes popular meanings and booster messages discernible in taxidermy work city nature museums and promotional photography Environmental historians Native studies specialists history students conservationists nature enthusiasts and general readers alike will find fascinating how western attitudes to wild animals changed according to subsistence and economic needs and how wildlife helped to determine the social relations among people in western Canada

Leaders from the 1960s David De Leon,1994-06-22 The throngs at Woodstock Jane Fonda in Hanoi I Have a Dream burning draft cards fire in the streets these images of the 1960s are still very much alive today What happened to the people and principles that dominated that decade Which leaders from those turbulent years had the most lasting effect on our lives today How well have the principles for which those leaders fought so strongly withstood the test of time This thought provoking biographical dictionary allows the reader to study the leaders both conservative and liberal their ideals and their enduring influence With major sections on racial democracy peace and freedom sexuality and gender the environment radical culture and visions of alternative societies Leaders from the 1960s includes entries on a wide selection of nationally prominent activists of the 1960s In addition to those who dominated only the sixties the volume includes earlier activists who came into prominence in the 1960s and activists of the era who came into prominence since the 1960s Each entry provides a biographical sketch but the focus of the entries is on the person s basic concepts or the essence of his or her work and the public response it generated Included are extensive bibliographies on the individuals and the period **Natural Disasters,**

Cultural Responses Christof Mauch,Christian Pfister,2009-03-16 Catastrophes it seems are becoming more frequent in the twenty first century According to UN statistics every year approximately two hundred million people are directly affected by natural disasters_seven times the number of people who are affected by war Discussions about global warming and fatal disasters such as Katrina and the Tsunami of 2004 have heightened our awareness of natural disasters and of their impact on both local and global communities Hollywood has also produced numerous disaster movies in recent years some of which have become blockbusters This volume demonstrates that natural catastrophes_earthquakes hurricanes floods etc _have

exercised a vast impact on humans throughout history and in almost every part of the world It argues that human attitudes toward catastrophes have changed over time Surprisingly this has not necessarily led to a reduction of exposure or risk The organization of the book resembles a journey around the globe—from Europe to North Africa the Middle East and Asia and from the Pacific through South America and Mexico to the United States While natural disasters appear everywhere on the globe different cultures societies and nations have adopted specific styles for coping with disaster Indeed how humans deal with catastrophes depends largely on social and cultural patterns values religious belief systems political institutions and economic structures The roles that catastrophes play in society and the meanings they are given vary from one region to the next they differ—and this is one of the principal arguments of this book—from one cultural political and geographic space to the next The essays collected here help us to understand not only how people in different times throughout history have learned to cope with disaster but also how humans in different parts of the world have developed specific cultural social and technological strategies for doing so
