Making Choices A Recasting Of Decision Theory:

Making Choices Frederic Schick,1997 Making Choices Frederic Schick,1997-02-13 This volume provides an introductory overview of decision theory It is completely non technical excluding all formulae from the text It covers the full range of philosophical issues of rationality and decision theory including game theory social choice theory prisoners dilemma and much else Judgment and Decision Making Peter Juslin, Henry Montgomery,2007-09-26 Research on human judgment and decision making has been strongly guided by a normative descriptive approach according to which human decision making is compared to the normative models provided by decision theory statistics and the probability calculus A common empirical finding has been that human behavior deviates from the prescriptions by normative models that judgments and decisions are subject to cognitive biases It is interesting to note that Swedish research on judgment and decision making made an early departure from this dominating mainstream tradition albeit in two different ways The Neo Brunswikian research highlights the relationship between the laboratory task and the adaptation to a natural environment The process tracing approach attempts to identify the cognitive processes before during and after a decision This volume summarizes current Swedish research on judgment and decision making covering topics such as dynamic decision making confidence research the search for dominance structures and differentiation and social decision making Rational Choice and Democratic Deliberation Guido Pincione, Fernando R. Tesón,2006-07-24 This book offers a comprehensive and sustained critique of theories of deliberative democracy **Decision Making: Social and Creative Dimensions** C.M. Allwood, M. Selart,2013-04-17 Decision making is a complex phenomenon which normally is deeply integrated into social life At the same time the decision making process often gives the decision maker an opportunity for conscious planning and for taking a reflective stance with respect to the action considered This suggests that decision making allows creative solutions with a potential to change the course of events both on an individual and a collective level Given these considerations we argue that in order to more fully understand decision making the perspectives of different disciplines are needed In this volume we have attempted to draw together contributions that would provide a broad view of decision making Much work has been carried out in the writing and editing of this volume First of all we would like to thank the contributors for their efforts in producing interesting and important texts and for their patience in the editorial process Each chapter was edited by two or three reviewers These reviewers are listed on a separate page in this book Our heartfelt thanks go to them for their time and for their incisive and constructive reviews We are also grateful to the publishing editors at Kluwer Academic Publishers Christiane Roll and Dorien Francissen who have been generous with their encouragement and patience throughout the editorial process Beyond Empiricism Joan McCord,2017-10-19 Beyond Empiricism expands the discourse on theories of criminal behavior It considers institutional social and individual issues related to criminal behavior while individually each raises questions about the adequacy of current theoretical claims The topics have significant implications both for policy and

research in criminology Per Olof Wikstrom introduces a cross level action theory of crime He suggests that better understanding of causal mechanisms can lead to a situational theory of action based on perception of alternatives and the process of choice David Wolcott and Steven Schlossman provide new perspectives on the issues of racial disparity and the incarceration of adolescents in adult prisons These authors highlight gaps in our understanding of early twentieth century juvenile justice and negate some popular claims about recent changes in the criminal law Peter Grabosky spotlights privatization policies in the criminal justice system suggesting a framework for analyzing the balance of advantage resulting from three basic forms of institutional relationships in policing Steven Messner and Richard Rosenfeld discuss why institutional analysis has been seriously underdeveloped in etiological analyses of crime Jordan Pederson and Matthew Shane scrutinize the concept of aggression Their descriptions of aggressive behavior among non human animals provide a fascinating backdrop for understanding human actions Joan McCord emphasizes the intentionality of crimes as she argues that to understand what causes crime one must have a theory about what it means to act intentionally After critically appraising prior theories McCord introduces and defends a new theory of motivation based on a post empiricist theory of language This latest volume in the distinguished Advances in Criminological Theory series continues to add to the theoretical underpinnings of the field and will be important to all collections of social science research on criminology

Beyond Individual Choice Michael Bacharach,2018-06-05 Game theory is central to modern understandings of how people deal with problems of coordination and cooperation Yet ironically it cannot give a straightforward explanation of some of the simplest forms of human coordination and cooperation most famously that people can use the apparently arbitrary features of focal points to solve coordination problems and that people sometimes cooperate in prisoner s dilemmas Addressing a wide readership of economists sociologists psychologists and philosophers Michael Bacharach here proposes a revision of game theory that resolves these long standing problems In the classical tradition of game theory Bacharach models human beings as rational actors but he revises the standard definition of rationality to incorporate two major new ideas He enlarges the model of a game so that it includes the ways agents describe to themselves or frame their decision problems And he allows the possibility that people reason as members of groups or teams each taking herself to have reason to perform her component of the combination of actions that best achieves the group s common goal Bacharach shows that certain tendencies for individuals to engage in team reasoning are consistent

with recent findings in social psychology and evolutionary biology As the culmination of Bacharach's long standing program of pathbreaking work on the foundations of game theory this book has been eagerly awaited Following Bacharach's premature death Natalie Gold and Robert Sugden edited the unfinished work and added two substantial chapters that allow the book to be read as a coherent whole

Existential Eroticism Shay Welch, 2015-08-13 Existential Eroticism A Feminist Approach to Understanding Women's Oppression Perpetuating Choices offer a unique lens aimed at the underbelly of the lady through which feminists can reorient discourses on rationality and moral responsibility related to women's oppression perpetuating choices Shay Welch utilizes feminist ethics broadly construed as feminist philosophy concerned with the ethical commitment to eliminate oppression to scrutinize how women regard and judge one another and to offer a more representative account of restriction rationality and responsibility to begin the healing process between diverse and divergent women The book aims not only to construct an analysis of self-perpetuated oppression that will broaden feminist understandings of experiences that motivate many women to choose as they do it serves as a means of understanding the marginalized

Thomas Gilovich,Dale Griffin,Daniel Kahneman,2002-07-08 This book first published in 2002 compiles psychologists best attempts to answer important questions about intuitive judgment **The Importance of Being Understood** Adam

Morton,2005-06-29 The Importance of Being Understood is an innovative and thought provoking exploration of the links between the way we think about each other s mental states and the fundamentally cooperative nature of everyday life Adam Morton begins with a consideration of folk psychology the tendency to attribute emotions desires beliefs and thoughts to human minds He takes the view that it is precisely this tendency that enables us to understand predict and explain the actions of others which in turn helps us to decide on our own course of action This relection suggests claims Morton that certain types of cooperative activity are dependent on everyday psychological understanding conversely that we act in such a way as to make our actions easily intelligible to others so that we can benefit from being understood This idea of beneficial circularities is at the core of Morton s investigation of the interdependencies between folk psychology and social behaviour we understand each other because we have learned to make ourselves intelligible Using examples of cooperative activities such as car driving and playing tennis Adam Morton analyses the concepts of belief and simulation the idea of explanation by motive and the causal force of psychological explanation In addition to argument and analysis Morton also includes more speculative explorations of topics such as moral progress and presents a new point of view on how and why cultures differ The Importance of Being Understood forges new links between ethics and the philosophy of mind and will be of interest to anyone in either field as well as developmental psychologists *Preferences* Christoph Fehige,Ulla Wessels,2011-07-20 No detailed description available for Preferences

The Explanation of Crime Per-Olof H. Wikström, Robert J. Sampson, 2006-11-30 Integration of disciplines theories and research orientations has assumed a central role in criminological discourse yet it remains difficult to identify any concrete discoveries or significant breakthroughs for which integration has been responsible Concentrating on three key concepts context mechanisms and development this volume aims to advance integrated scientific knowledge on crime causation by bringing together different scholarly approaches Through an analysis of the roles of behavioural contexts and individual differences in crime causation The Explanation of Crime seeks to provide a unified and focused approach to the integration of knowledge Chapter topics range from individual genetics to family environments and from ecological behaviour settings to the macro level context of communities and social systems This is a comprehensive treatment of the problem of crime causation that will appeal to graduate students and researchers in criminology and be of great interest to policy makers and practitioners in crime policy and prevention

The Oxford Handbook of Criminology Alison Liebling, Shadd Maruna, Lesley McAra, 2017 Beginning with the history of criminology this updated and revised edition deals with topics as diverse as policing substance abuse juvenile crime statistics prisons victims and organised crime in Britain

The Social Sciences and Rationality Hudson Meadwell, 2017-10-19 In recent

decades rational choice theory has emerged as the single most powerful controversial claimant to provide a unified theoretical framework for all the social sciences In its simplest form the theory postulates that humans are purposive beings who pursue their goals in a rational efficient manner seeking the greatest benefit at the lowest cost This volume brings together prominent scholars working in several social science disciplines and the philosophy of science to debate the promise and problems of rational choice theory As rational choice theory has spread from its home base in economics to other disciplines it has come under fierce criticism To its critics the extension of the explanatory model mistakenly assumes that the logic of economic rationality can explain non economic behavior and at its worst commits the ethnocentric error of imposing Western concepts of rationality on non Western societies and cultures This volume includes strong advocates as well as forceful critics of the rational choice approach However in contrast to previous debates all the contributors share a commitment to open constructive and knowledgeable dialogue Well known advocates of rational choice theory Michael Hechter Michael Smith Chris Manfredi explicitly ponder some of its serious limitations while equally well known critics Ian Shapiro Mario Bunge strike a surprisingly conciliatory tone in contemplating its legitimate uses Vociferous critics of neoclassical economics Bunge favorably discuss sociological proponents of rational choice theory while two economists who are not particularly anti mainstream Robin Rowley George Grantham critically assess the problems of such assumptions in their discipline Philosophers Storrs McCall and sociologists John Hall alike reflect on the variable meaning of rationality in explaining social behavior In the introduction and conclusion the editors survey the current state of the debate and show how open constructive dialogue enables us to move beyond hackneyed accusations and dismissals that have characterized much previous debate

Becoming oneself Käthe Schneider, 2012-06-12 The basic concern of the volume is to determine the preconditions of personality development and to show their significance and their perspectives for educational science and for pedagogical practice First these basic preconditions of becoming oneself are collected in a single volume and discussed in terms of their significance for science and for educational practice In all fundamental dimensions are understood as precondition of becoming oneself Bildung is here for the first time understood as the formation of the overall individual personality which the OECD postulates to be the key qualification of the Twenty first Century From a pedagogical perspective it is a matter of furthering the personality It provides research with a new perspective in that it makes the furthering of the overall personality the object of education
