approaches to understanding how and why Japan made the transition from a relatively low income country mainly focused on agriculture to a high income nation centered on manufacturing and services Making a case for over determination in economic behaviour the authors argue that individual firm level and governmental behavior is simultaneously determined by the interaction of markets norms and structures and that change over time is rarely if ever limited to the economy operating in isolation from social norms and structures **Nationalism and Economic Development in Modern Eurasia** Carl

Mosk, 2013 This book advances a new theory of why nationalism emerged in the modern world In particular it explains why nationalism and economic development are closely linked and why warfare plays a crucial role in the spread of the nation state system It is based on qualitative and quantitative evidence over the period 1600 to 2000 for seven countries Great Britain France Germany Yugoslavia the United States Japan and China **A Sustainability Challenge** National Research

Council, Policy and Global Affairs, Science and Technology for Sustainability Program, Committee on Food Security for All as a Sustainability Challenge, 2012-02-28 The National Research Council's Science and Technology for Sustainability Program hosted two workshops in 2011 addressing the sustainability challenges associated with food security for all. The first workshop, Measuring Food Insecurity and Assessing the Sustainability of Global Food Systems, explored the availability and quality of commonly used indicators for food security and malnutrition, poverty and natural resources and agricultural productivity. It was organized around the three broad dimensions of sustainable food security: 1. availability, 2. access, and 3. utilization. The workshop reviewed the existing data to encourage action and identify knowledge gaps. The second workshop, Exploring Sustainable Solutions for Increasing Global Food Supplies, focused specifically on assuring the availability of adequate food supplies. How can food production be increased to meet the needs of a population expected to reach over 9 billion by 2050? Workshop objectives included identifying the major challenges and opportunities associated with achieving sustainable food security and identifying needed policy, science, and governance interventions. Workshop participants discussed long-term natural resource constraints, specifically water, land, and forests, soils, biodiversity, and fisheries. They also examined the role of knowledge, technology, modern production practices, and infrastructure in supporting expanded agricultural production and the significant risks to future productivity posed by climate change. This is a report of two workshops.

South Korea Daniel J. Schwegendiek, 2017-07-05 During the second half of the twentieth century, an economic boom driven by advances in technology has led South Korea to become the world's fastest growing economy. But there were also social factors associated with this shift. In this book, Daniel J. Schwegendiek examines South Korea's socioeconomic evolution since the 1940s. After a brief introduction to Korean history from the late Joseon Dynasty to the division of the Korean peninsula into two occupied zones in 1945, the focus of the book shifts to the rapid socioeconomic development and change that took place in South Korea in the twentieth century. Topics covered include demography, rural urban development, economic planning, and international trade, in addition to lower and higher education. Important but understudied areas such as social capital, nutritional improvements, the rise of capitalist consumerism, and recent nation branding issues are also addressed. Rarely has a resource incorporated such unique macro-historical perspectives of South Korea, especially in the context of social development. Throughout the book, the author corroborates historical events with empirical data. With over one hundred figures and illustrations, suggested readings at the end of each chapter, and comparisons with North Korea, South Korea will be a crucial reference work for scholars and advanced students in Korean and East Asian Studies.

An East Asian Route of Industrialization? The Case of Japan, 1868-1937 Peer Vries, 2022-08-01 In this book, Peer Vries is the first scholar to provide an extensive test of the claim that industrialization in East Asia, in particular in Japan between the Meiji Restoration and World War Two, would have been much more labour-intensive than industrialization in the West. He does this by systematically comparing the role and importance of labour and capital in Japan

and in a number of Western countries at a similar stage of their industrial development He uses macro economic data as well as specific observations by people at the time It turns out that there is no reason to distinguish a specific labour intensive Japanese route of industrialization His comparative analysis provides us with a better understanding of the logic of industrialization in both West and East How Much Have Global Problems Cost the World? Bjørn Lomborg,2013-10-10 There are often blanket claims that the world is facing more problems than ever but there is a lack of empirical data to show where things have deteriorated or in fact improved In this book some of the world s leading economists discuss ten problems that have blighted human development ranging from malnutrition education and climate change to trade barriers and armed conflicts Costs of the problems are quantified in percent of GDP giving readers a unique opportunity to understand the development of each problem over the past century and the likely development into the middle of this century and to compare the size of the challenges For example how bad was air pollution in 1900 How has it deteriorated and what about the future Did climate change cost more than malnutrition in 2010 This pioneering initiative to provide answers to many of these questions will undoubtedly spark debate amongst a wide readership Trade and Migration in the Modern World Carl Mosk,2007-05-07 Revolutionized by the growing use of fossil fuels and electricity and the reduced costs of transportation and communications international trade and migration has received an unprecedented boost in recent years Using a theory of economic and political gravitation backed up with both quantitative analysis and qualitative description Mosk argues that the tendency for trade and migration to flow together is tempered by market forces and political resistance to diversity in migration This results in a glaring paradox the political arenas of nation states are divided between embracing and opposing diversity in immigration the same immigration flows their own policies helped create A remarkable volume this book will be invaluable to students of economics demographic historians policy makers and political scientists **The Political Economy of Japanese Financial Markets** R. Beason,J. James,1999-01-19 The authors examine various aspects of Japanese financial markets This analysis is interspersed with the relevant institutional historical background on Japanese financial markets necessary for the non specialist Principal chapters include an institutional overview a chapter on comparative cost of capital both internationally and among Japanese firms causes and implications of the high degree of financial intermediation in Japan and an invaluable analysis of the most recent trends in the Japanese Asian financial markets Averting a Great Divergence Peer Vries,2019-08-08 The most significant debate in global economic history over the past twenty years has dealt with the Great Divergence the economic gap between different parts of the world Thus far this debate has focused on China India and north western Europe particularly Great Britain This book shifts the focus to ask how Japan became the only non western county that managed at least partially to modernize its economy and start to industrialize in the 19th century Using a range of empirical data Peer Vries analyses the role of the state in Japan s economic growth from the Meiji Restoration to World War II and asks whether Japan s economic success can be attributed to the rise of state power Asserting

that the state's involvement was fundamental in Japan's economic catching up he demonstrates how this was built on legacies from the previous Tokugawa period In this book Vries deepens our understanding of the Great Divergence in global history by re-examining how Japan developed and modernized against the odds Handbook of Cliometrics Claude Diebolt, Michael Haupt, 2024-05-22 This handbook is a milestone in the field of historical economics and econometric history through its emphasis on the concrete contribution of cliometrics to our knowledge in economics and history The articles in the handbook authored by the leading scholars in the fields stress the usefulness of cliometrics for economists historians and social scientists in general The handbook offers a comprehensive coverage of topics with each article providing an overview of the contributions of cliometrics to a particular topic The handbook has set a new standard of quality in the field by offering a world wide forum of discussion in cliometrics This updated and extended third edition of the handbook of cliometrics offers a substantially enlarged collection of articles and thus stresses its unique position as authoritative reference work in this field **Japanese Industrial History** Carl Mosk, 2016-09-16 A detailed examination of the industrial development of Japan since the Meiji Restoration **Rising Life Expectancy** James C. Riley, 2001-06-04 This book traces the global history of rising life expectancy in the last 200 years **Sport and Body Politics in Japan** Wolfram Manzenreiter, 2013-08-15 There is more to Japanese sport than sumo karate and baseball This study of social sport in Japan pursues a comprehensive approach towards sport as a distinctive cultural sphere at the intersection of body culture political economy and cultural globalization Bridging the gap between Bourdieu and Foucault it explains the significance of the body as a field of action and a topic of discourse in molding subject and society in modern Japan More specifically it provides answers to questions such as how and to what purposes are politics of the body articulated in Japan particularly in the realm of sport What is the agenda of state actors that develop politics aiming at the body and to what degree are political and societal objectives impacted by commercial and non political actors How are political decisions on the allocation of resources made and what are their consequences for sporting opportunities and practices of the body in general Without neglecting the significance of sport spectatorship this study takes a particular angle by looking at sport as a field of practice pain and pleasure Gender and Family in Japan Nobuko Okuda, Tetsuhiko Takai, 2019-11-30 This book is the 6th volume of the Monograph Series of the Socio Economic History Society Japan The book focuses on how economic developments changed the everyday lives of ordinary women in early modern and modern Japan Different from precedent gender studies the spotlight here is on the daily activities and structural positions of women rather than feminist movements or activities of elite women Using demography anthropometrics and labour economics this book explicates childcare physical development of girls and women's labour migration The dynamics of ordinary women in prewar Japan may change deep rooted images of women as oppressed beings Using quantitative data multi dimensionally with the latest statistical analysis methods this book shows how Japanese economic historians can contribute to historians of gender and family who are interested in early

modern and modern Japan The first part consists of four chapters that discuss women migrant workers in the Tokugawa period women s work and family strategies in the underdeveloped regions of the country conflicts between child rearing and women s work on family farms and living standards of teenaged girls in early twentieth century Japan Those chapters provide a bridge between economic historians and feminist historians and articulate new research fields for both The second part comprising four book reviews illustrates how the gender concept has been adopted in family and gender historiography in Japan *Making services work for poor people* World Bank,
