Congressional Research Service, 1981 **American Medical Schools and the Practice of Medicine** William G. Rothstein, 1987 In this extensively researched history of medical schools William Rothstein a leading historian of American medicine uses both contemporary and historical perspectives to show how education policies have developed and changed since the 18th century His analysis provides an unparalleled general history and modern analysis of medical education in the United States **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), *Current Catalog* National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 **Resources in education**, 1987-02 **Statistical Reference Index**, 1980 **From Residency to Retirement** Terry Mizrahi, 2021-04-16 From Residency to Retirement tells the stories of twenty American doctors over the last half century which saw a period of continuous turbulent and transformative changes to the U S health care system The cohort s experiences are reflective of the generation of physicians who came of age as presidents Carter and Reagan began to focus on costs and benefits of health services Mizrahi observed and interviewed these physicians in six timeframes ending in 2016 Beginning with medical school in the mid 1970s these physicians reveal the myriad fluctuations and uncertainties in their professional practice working conditions collegial relationships and patient interactions In their own words they provide a view from the front lines both in academic and community settings They disclose the satisfactions and strains in coping with macro policies enacted by government and insurance companies over their career trajectory They describe their residency in internal medicine in a large southern urban medical center as a siege mentality which lessened as they began their careers in Getting Rid of Patients the title of Mizrahi s first book 1986 As these doctors moved on in their professional lives more of their experiences were discussed in terms of dissatisfaction with financial remuneration emotional gratification and intellectual fulfillment

Such moments of career frustration however were also interspersed with moments of satisfaction at different stages of their medical careers Particularly revealing was whether they were optimistic about the future at each stage of their career and whether they would recommend a medical career to their children Mizrahi s subjects also divulge their private feelings of disillusionment and fear of failure given the malpractice epidemic and lawsuits threatened or actually brought against so many doctors Mizrahi s work covering almost fifty years provides rarely viewed insights into the lives of physicians over a professional life span

Medical Education in the Millennium Brian Jolly, Lesley H. Rees, 1998 As the 21st century approaches what will be the roles and responsibilities of a doctor in the next century and how can we prepare young doctors for the future in a world which is rapidly changing Medical education has entered a new era at all levels led the way by changes in the undergraduate curricula and medical educators are asking what change is necessary to prepare future physicians for practice in the 21st century This book charts recent developments in medical education that are withstanding the test of time and establishes a baseline for development in the next century It deals with many important issues in medical education covering the new developments at the prequalification stage of medical training Specific examples of successful models and ideas for basic clinical training are included and there are chapters on curriculum design use of the internet assessment and clinical teaching and aims for the year 2000 Written by current leaders and researchers in the field it is an invaluable reference and guide for all those interested in medical education

Making Medical Decisions for the Profoundly Mentally Disabled Norman L. Cantor, 2009-08-21 A legal and moral analysis of medical decision making on behalf of those with such severe cognitive impairments that they cannot exercise self determination In this book Norman Cantor analyzes the legal and moral status of people with profound mental disabilities those with extreme cognitive impairments that prevent their exercise of medical self determination He proposes a legal and moral framework for surrogate medical decision making on their behalf The issues Cantor explores will be of interest to professionals in law medicine psychology philosophy and ethics as well as to parents guardians and health care providers who face perplexing issues in the context of surrogate medical decision making The profoundly mentally disabled are thought by some moral philosophers to lack the minimum cognitive ability for personhood Countering this position Cantor advances both theoretical and practical arguments for according them full legal and moral status He also argues that the concept of intrinsic human dignity should have an integral role in shaping the bounds of surrogate decision making Thus he claims while profoundly mentally disabled persons are not entitled to make their own medical decisions respect for intrinsic human dignity dictates

their right to have a conscientious surrogate make medical decisions on their behalf Cantor discusses the criteria that bind such surrogates He asserts contrary to popular wisdom that the best interests of the disabled person are not always the determinative standard the interests of family or others can sometimes be considered Surrogates may even consistent with the intrinsic human dignity standard sometimes authorize tissue donation or participation in nontherapeutic medical research by profoundly disabled persons Intrinsic human dignity limits the occasions for such decisions and dictates close attention to the preferences and feelings of the profoundly disabled persons themselves Cantor also analyzes the underlying philosophical rationale that makes these decision making criteria consistent with law and morals **Assessment in Higher**
