Making Motherhood Safe:

Making Motherhood Safe Anne G. Tinker, 1993-01-01 This collection reviews national policies that critically influence economic performance in developing countries. It describes principles that shape good economic policy and illustrates them with case studies. In an overview that draws together insights from the essays, the volume editor explains why poor countries need sound government policies to offset unfavorable conditions including scant natural resources, adverse problems that occur with monetary and exchange rate policies, and financial sector reform. The basic rules for monetary policy in an open economy are developed along with the different ways in which financial reform and financial repression affect an economy. Practical ways to deal with foreign exchange markets are described. They include such arrangements as multiple exchange rates for commercial transactions and dual rates that separate commercial and financial transactions. Also examined are the ways in which trade liberalization and trade restrictions impede economic development. Advice is given on developing a uniform structure that balances the administration of taxes with the efficiency of a tax structure. The book examines the relationship between budget deficits and money creation and suggests management strategies for developing sound economic policy that include advice on inflation control, international trade, import restrictions, income tax rates, and price and wage controls. Published for the World Bank by Oxford University Press. **Making motherhood safe** TINKER

Anne, KOBLINSKY Marjorie A., MERODE Janet (de) (Av.-pr.), Et al, 1993 *Managing Motherhood, Managing Risk* Denise Allen, 2009-10-22 In *Managing Motherhood Managing Risk* Denise Roth Allen persuasively argues that development interventions in the Third World often have unintended and unacknowledged consequences. Based on twenty-two months of fieldwork in the Shinyanga Region of west central Tanzania, this rich and engaging ethnography of women's fertility-related experiences highlights the processes by which a set of seemingly well-intentioned international maternal health policy recommendations go awry when implemented at the local level. An exploration of how threats to maternal health have been defined and addressed at the global, national, and local levels, *Managing Motherhood Managing Risk* presents two contrasting and oftentimes competing definitions of risk: those that form the basis of international recommendations and national maternal health policies, and those that do not. The effect that these contrasting definitions of risk have on women's fertility-related experiences at the local level are explored throughout the book. This study employs an innovative approach to the analysis of maternal health risk: one that situates rural Tanzanian women's fertility-related experiences within a broader historical and sociocultural context. Beginning with an examination of how maternal health risk was defined and addressed during the early years of British colonial rule in Tanganyika and moving to a discussion of an internationally conceived maternal health initiative that was launched on the world stage in the late 1980s, the author explores the similarities in the language used and solutions proposed by health development experts over time. This set of official maternal health risks is then compared to an alternative set of risks that emerge when attention is focused on women's experiences of pregnancy and

childbirth at the local level Although some of these latter risks are often spoken about as deriving from spiritual or supernatural causes the case studies presented throughout the second half of the book reveal that the concept of risk in the context of pregnancy and childbirth is much more complex involving the interplay of spiritual physical and economic aspects of everyday life

Acute Gynaecology and Early Pregnancy Davor Jurkovic, Roy

Farquharson, 2011-03-01 Acute gynaecological problems are among the most common reasons for women of reproductive age to seek medical help. Emergency outpatient visits now outnumber elective clinical appointments in gynaecology. With a growing number of patients increasingly complex diagnostic algorithms and a wide range of management options, the participation and training of senior doctors in this field is vital to ensure women receive the best possible treatment. This book provides a thorough overview of acute gynaecology and early pregnancy and has been designed to reflect the syllabus of the RCOG's Advanced Training Skills Module (ATSM) in Early pregnancy and emergency gynaecology. It covers the diagnosis and management of routine clinical problems such as miscarriage and tubal pregnancy as well as less frequently seen presentations such as uncommon forms of ectopic pregnancy and trophoblastic disease. The use of drugs in early pregnancy and management organisational aspects of care are also addressed.

Censored 2012 Mickey Huff, Project

Censored, 2011-10-04 Every year since 1976 Project Censored, our nation's oldest news monitoring group, a university-wide project at Sonoma State University founded by Carl Jensen, directed for many years by Peter Phillips and now under the leadership of Mickey Huff, has produced a Top 25 list of underreported news stories and a book, *Censored*, dedicated to the stories that ought to be top features on the nightly news but that are missing because of media bias and self-censorship. Seven Stories Press has been publishing this yearbook since 1994, featuring the top stories listed democratically in order of importance according to students, faculty, and a national panel of judges. Each of the top stories is presented at length alongside updates from the investigative reporters who broke the stories. Beyond the Top 25 stories, additional chapters delve further into timely media topics. The *Censored News and Media Analysis* section provides annual updates on Junk Food News and News Abuse. *Censored* DJ Vu signs of hope in the alternative and news media and the state of media bias and alternative coverage around the world. In the *Truth Emergency* section, scholars and journalists take a critical look at the US NATO military industrial media empire. And in the *Project Censored International* section, the meaning of media democracy worldwide is explored in close association with Project Censored affiliates in universities and at media organizations all over the world. A perennial favorite of booksellers, teachers, and readers everywhere, *Censored* is one of the strongest life signs of our current collective desire to get the news we citizens need despite what Big Media tells us.

Reproductive Health,

Economic Growth and Poverty Reduction in Africa Olu Ajakaiye, Germano Mwabu, 2010-12-29 This volume contains framework papers prepared for a collaborative research project on Reproductive Health, Economic Growth and Poverty Reduction in Africa, an initiative of the African Economic Research Consortium (AERC). Taken together, the chapters in this book make a compelling argument that improvement in reproductive health is key to raising household incomes and to reducing poverty. The book reveals that the triple phenomena of better reproductive health, economic growth, and declining poverty are likely to be found in an environment in which labour and product markets function. Further, a macroeconomic

framework that encourages domestic and foreign investments and promotes social protection for current and future generations is essential
