Civilizations Beyond Earth Douglas A. Vakoch,Albert A. Harrison,2011-09-01 Astronomers around the world are pointing their telescopes toward the heavens searching for signs of intelligent life If they make contact with an advanced alien civilization how will humankind respond In thinking about first contact the contributors to this volume present new empirical and theoretical research on the societal dimensions of the Search for Extraterrestrial Intelligence SETI Archaeologists and astronomers explore the likelihood that extraterrestrial intelligence exists using scientific insights to estimate such elusive factors as the longevity of technological societies Sociologists present the latest findings of novel surveys tapping into the public s attitudes about life beyond Earth to show how religion and education influence beliefs about extraterrestrials Scholars from such diverse disciplines as mathematics chemistry journalism and religious studies offer innovative solutions for bridging the cultural gap between human and extraterrestrial civilizations while recognizing the tremendous challenges of communicating at interstellar distances At a time when new planets are being discovered around other stars at an unprecedented rate this collection provides a much needed guide to the human impact of discovering we are not alone in the universe [Rocket Dreams](#) Marina Benjamin,2003-05-25 In 1958 mankind s centuries long flirtation with space flight became a torrid love affair For a decade tens of millions of people were enraptured first by the U S Soviet race to the moon and finally as America outstripped its rival by Project Apollo alone It is now more than three decades since the last man walked on the moon more time than between the first moonwalk and the beginning of World War II Apollo did not as had been promised by a generation of visionaries herald the beginning of the Space Age but its end Or did it Project Apollo like a cannonball reached its apogee and returned to earth but the trajectory of that return was complex America s

atmosphere its economic scientific and cultural atmosphere made for a very complicated reentry that produced many solutions to the trajectory problem Rocket Dreams is about those solutions about the places where the space program landed In Rocket Dreams an extraordinarily talented young writer named Marina Benjamin will take you on a journey to those landing sites A visit with retired astronauts at a celebrity autograph show is a starting point down the divergent paths taken by the pioneers including Edgar Mitchell founder of the church of No tic Sciences Roswell New Mexico is a landing site of a different order the magnetic north of UFO belief in the United States a belief that began its most dramatic growth precisely at the time that the path of the space program began its descent In the vernacular the third law of motion states that what goes up must come down Thus the tremendous motive force that energized the space program didn t just vanish it was conserved and transformed making bestsellers out of fantasy literature spawning Gaia and giving symbolism to the environmental movement Everything from the pop cultural boom in ufology to the worldwide Search for Extra Terrestrial Intelligence SETI feeds on the energy given off by America s leap toward space Rocket Dreams is an eloquent tour of this Apollo scarred landscape It is also an introduction to some of the most fascinating characters imaginable Some long dead like the crackpot visionary Alfred Lawson who saw in space flight a new stage of human evolution Alti Man or Robert Goddard the father of rocketry whose workshop in Roswell stands only half a mile from shops selling posters of alien visitors Others are very much alive like Stewart Brand creator of the Whole Earth Catalog and partner with Gerard O Neill in the drive to build free floating space colonies and SETI astronomer Seth Shostak who has spent decades listening to the skies hoping for the first contact with another intelligent species Perceptive original and wonderfully written informed by history science and an acute knowledge of popular culture Rocket Dreams is a brilliant book by a remarkable talent *New York Magazine* ,1978-11-27 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea
