Newman, 1989      **Gödel's Proof** Ernest Nagel, James R. Newman, 1964      **Machine Proofs In Geometry: Automated Production Of Readable Proofs For Geometry Theorems** Shang-ching Chou, Xiaoshan Gao, Jing-zhong Zhang, 1994-04-06 This book reports recent major advances in automated reasoning in geometry The authors have developed a method and implemented a computer program which for the first time produces short and readable proofs for hundreds of geometry theorems The book begins with chapters introducing the method at an elementary level which are accessible to high school students latter chapters concentrate on the main theme the algorithms and computer implementation of the method This book brings researchers in artificial intelligence computer science and mathematics to a new research frontier of automated geometry reasoning In addition it can be used as a supplementary geometry textbook for students teachers and geometers By presenting a systematic way of proving geometry theorems it makes the learning and teaching of geometry easier and may change the way of geometry education      *Proof checking metamathematics* Natarajan Shankar, 1987      *Proof Theory* Gaisi Takeuti, 1975      **A Study in Metamathematics** John J. Hackett, 1963      *Gentzen's Centenary* Reinhard Kahle, Michael Rathjen, 2015-09-15 Gerhard Gentzen has been described as logic's lost genius whom Gödel called a better logician than himself This work comprises articles by leading proof theorists attesting to Gentzen's enduring legacy to mathematical logic and beyond The contributions range from philosophical reflections and re evaluations of Gentzen's original consistency proofs to the most recent developments in proof theory Gentzen founded modern proof theory His sequent calculus and natural deduction system beautifully explain the deep symmetries of logic They underlie modern developments in computer science such as automated theorem proving and type theory      *Checking proofs in the metamathematics of first order logic* M. Aiello, R. W. Weyhrauch, 1974 This is a report on some of the first experiments of any size carried out using the new first order proof checker FOL The authors present two different first order axiomatizations of the metamathematics of the logic which FOL itself checks and show several proofs using each one The difference between the axiomatizations is that one defines the metamathematics in a many sorted logic the other does not      **Metamathematics and the Role of a Random-choice Element in Theorem-proving Machines** Morton Nadler, Bull-General Electric, 1967      **Machine Verification of Mathematical Proof** Paul W..
