Finding Metaphor in Grammar and Usage Gerard Steen, 2007 Cognitive linguists have proposed that metaphor is not just a matter of language but of thought and that metaphorical thought displays a high degree of conventionalization In order to produce converging evidence for this theory of metaphor a wide range of data is currently being studied with a large array of methods and techniques Finding Metaphor in Grammar and Usage aims to map the field of this development in theory and research from a methodological perspective It raises the question when exactly evidence for metaphor in language and thought can be said to count as converging It also goes into the various stages of producing such evidence conceptualization operationalization data collection and analysis and interpretation The book offers systematic discussion of eight distinct areas of metaphor research that emerge as a result of approaching metaphor as part of grammar or usage language or thought and symbolic structure or cognitive process

The Cambridge Handbook of Metaphor and Thought Raymond W. Gibbs, Jr., 2008-09-22 A comprehensive collection of essays in multidisciplinary metaphor scholarship that has been written in response to the growing interest among scholars and students from a variety of disciplines such as linguistics philosophy anthropology music and psychology These essays explore the significance of metaphor in language thought culture and artistic expression There are five main themes of the book the roots of metaphor metaphor understanding

metaphor in language and culture metaphor in reasoning and feeling and metaphor in non verbal expression Contributors come from a variety of academic disciplines including psychology linguistics philosophy cognitive science literature education music and law **Motivation in Language** Hubert Cuyckens,Thomas Berg,René Dirven,Klaus-Uwe Panther,2003-07-17

This volume contributes to the now one century old question Is the link between forms and meanings in language essentially arbitrary as Saussure put it or is it on the contrary also considerably motivated The greater part of the papers Sections 1 3 analyze linguistic phenomena in which not arbitrary but cognitively motivated links between form and meaning play a role As such the contributions in Section 1 examine selected aspects of motivation in the continuum between lexicon and grammar the contributions in Section 2 study the factors underlying the range of semantic variants that attach to a particular lexical item and papers in Section 3 look at motivating factors in linguistic items situated in and conceptualizing the socio cultural domain A smaller set of papers in Section 4 point to the role which learner motivation and attitudinal motivation may play in applied linguistics domains **Metaphors of ANGER across Languages: Universality and Variation** Zoltan

Kövecses,Réka Benczes,Veronika Szelid,2024-11-04 Anger is one of the basic emotions of human emotional experience informing and guiding many of our choices and actions Although it has received considerable scholarly attention in a number of disciplines including linguistics a basic question has still remained unresolved why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why It also investigates the role that metonymies might play in the emergence of anger related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience language and the larger cultural context **Routledge Encyclopedia of Narrative**

Theory David Herman,Manfred Jahn,Marie-Laure Ryan,2010-06-10 The past several decades have seen an explosion of interest in narrative with this multifaceted object of inquiry becoming a central concern in a wide range of disciplinary fields and research contexts As accounts of what happened to particular people in particular circumstances and with specific consequences stories have come to be viewed as a basic human strategy for coming to terms with time process and change However the very predominance of narrative as a focus of interest across multiple disciplines makes it imperative for scholars teachers and students to have access to a comprehensive reference resource **Specialized Communication**

Thorsten Roelcke,Ruth Breeze,Jan Engberg,2025-06-02 Specialized communication in science technology or institutions is one of the most important and exciting fields of applied linguistics The handbook captures the current and relevant

knowledge of specialized languages and professional communication It promotes international communication on central issues where dialogue is urgently needed concerning both their intellectual underpinning and the day to day practices associated with them

Metaphor in Specialist Discourse J. Berenike Herrmann, Tony Berber Sardinha, 2015-12-15 Metaphor in Specialist Discourse presents multiple perspectives on metaphor use in specialist and popularized discourse contexts Using genre and register as starting parameters for deeper exploration and pushing the boundaries further to open up new areas and possibilities ten independent articles investigate metaphor use across a range of specialist domains of discourse such as biology research articles psychological counseling soccer commentaries workflow communication and penal policy documents Framed by two theoretical chapters the book is a contribution to the study of metaphor use in distinct discourse settings that will be of value to linguists and metaphor scholars of different persuasions graduate students of linguistics and related disciplines and practitioners of specialized areas with an interest in verbal or gestural language use in their areas of expertise It shows that aspects of discourse variation are the beginning of not an afterthought to accurate empirical metaphor studies

Metaphor and Writing Philip Eubanks, 2010-11-04 This volume explains how metaphors metonymies and other figures of thought interact

cognitively and rhetorically to tell us what writing is and what it should do Drawing on interviews with writing professionals and published commentary about writing it argues that our everyday metaphors and metonymies for writing are part of a figurative rhetoric of writing a pattern of discourse and thought that includes ways we categorize writers and writing stories we tell about people who write conceptual metaphors and metonymies used both to describe and to guide writing and familiar yet surprisingly adaptable conceptual blends used routinely for imagining writing situations The book will give scholars a fresh understanding of concepts such as voice self clarity power and the most basic figure of all the writer

Visual Metaphor and Embodiment in Graphic Illness Narratives Elisabeth El Refaie,2019 Metaphors help us understand abstract concepts emotions and social relations through the concrete experience of our own bodies Conceptual Metaphor Theory CMT which dominates the field of contemporary metaphor studies is centered on this claim According to this theory correlations in the way the world is perceived in early childhood e g happy good is up understanding is seeing persist in our conceptual system influencing our thoughts throughout life at a mostly unconscious level What happens though when ordinary embodied experience is disrupted by illness In this book Elisabeth El Refaie explores how metaphors change according to our body s alteration due to disease She analyzes visual metaphor in thirty five graphic illness narratives book length stories about disease in the comics medium re examining embodiment in traditional CMT and proposing the notion of dynamic embodiment Building on recent strands of research within CMT and engaging relevant concepts from phenomenology psychology semiotics and media studies El Refaie demonstrates how the experience of our own bodies is constantly adjusting to changes in our individual states of health socio cultural practices and the modes and media by which we communicate This fundamentally interdisciplinary work also proposes a novel classification system of visual metaphor based on a three way distinction between pictorial spatial and stylistic metaphors This approach will enable readers to advance knowledge and understanding of phenomena involved in shaping our everyday thoughts interactions and behavior

insights from social theories and various strands of pragmatics he proposes a motivation model of pragmatics MMP contending that language use can be adequately coherently and elegantly studied via the motivation behind it in its varied and dynamic contexts The model with its well laid out components is then applied to im politeness research cross cultural pragmatics diachronic pragmatics discourse and genre analysis conversation analysis identity construction and the study of metaphor sarcasm parody and lying MMP is thus a framework aimed at accounting for fluidity with stable notions specificity with general principles and differences with similar underlying factors As such the book should appeal to students of pragmatics im politeness conversation analysis sociolinguistics applied linguistics communication sociology and psychology
