Metaphor And The Logic Of Language Use:

Metaphor and the Logic of Language Use Alan Bailin, 1998-01-01 The Philosophy and Practice of Medicine and Bioethics Barbara Maier, Warren A. Shibles, 2010-11-03 This book challenges the unchallenged methods in medicine such as evidence based medicine which claim to be but often are not scientific It completes medical care by adding the comprehensive humanistic perspectives and philosophy of medicine No specific or absolute recommendations are given regarding medical treatment moral approaches or legal advice Given rather is discussion about each issue involved and the strongest arguments indicated Each argument is subject to further critical analysis This is the same position as with any philosophical medical or scientific view The argument that decision making in medicine is inadequate unless grounded on a philosophy of medicine is not meant to include all of philosophy and every philosopher On the contrary it includes only sound practical and humanistic philosophy and philosophers who are creative and critical thinkers and who have concerned themselves with the topics relevant to medicine These would be those philosophers who engage in practical philosophy such as the pragmatists humanists naturalists and ordinary language philosophers A new definition of our own philosophy of life emerges and it is necessary to have one Good lifestyle no longer means just abstaining from cigarettes alcohol and getting exercise It also means living a holistic life which includes all of one s thinking personality and actions This book also includes new ways of thinking In this regard the Metaphorical Method is explained used and exemplified in depth for example in the chapters on care egoism and altruism letting die etc **The Logic of Metaphor** Eric Steinhart, 2013-06-29 1 Metaphors and Logic Metaphors are among the most vigorous offspring of the creative mind but their vitality springs from the fact that they are logical organisms in the ecology of l guage I aim to use logical techniques to analyze the meanings of metaphors My goal here is to show how contemporary formal semantics can be extended to handle metaphorical utterances What distinguishes this work is that it focuses intensely on the logical aspects of metaphors I stress the role of logic in the generation and int pretation of metaphors While I don t presuppose any formal training in logic some familiarity with philosophical logic the propositional calculus and the predicate c culus is helpful Since my theory makes great use of the notion of structure I refer to it as the structural theory of m etaphor STM STM is a semant ic theory of m etaphor if STM is correct then metaphors are cognitively meaningful and are n trivially logically linked with truth I aim to extend possible worlds semantics to handle metaphors I ll argue that some sentences in natural languages like English have multiple meanings Juliet is the sun has at least two meanings the literal meaning Juliet is the sun IT and the metaphorical meaning Juliet is the sun MET Each meaning is a function from possible worlds to truth values I deny that these functions are identical I deny that the metaphorical function is necessarily false or necessarily true **The Educated Mind** Kieran Egan, 2007-12-01 The Educated Mind offers a bold and revitalizing new vision for today s uncertain educational system Kieran Egan reconceives education taking into account how we learn He proposes the use of particular intellectual tools such

as language or literacy that shape how we make sense of the world These mediating tools generate successive kinds of understanding somatic mythic romantic philosophical and ironic Egan s account concludes with practical proposals for how teaching and curriculum can be changed to reflect the way children learn A carefully argued and readable book Egan proposes a radical change of approach for the whole process of education There is much in this book to interest and excite those who discuss research or deliver education Ann Fullick New Scientist A compelling vision for today s uncertain educational system Library Journal Almost anyone involved at any level or in any part of the education system will find this a fascinating book to read Dr Richard Fox British Journal of Educational Psychology A fascinating and provocative study of cultural and linguistic history and of how various kinds of understanding that can be distinguished in that history are recapitulated in the developing minds of children Jonty Driver New York Times Book Review

The Logic of Invention Roy Wagner,2019-02-15 In this long awaited sequel to *The Invention of Culture* Roy Wagner tackles the logic and motives that underlie cultural invention Could there be a single logical factor that makes the invention of the distinction between self and other possible much as specific human genes allow for language Wagner explores what he calls the reciprocity of perspectives through a journey between Euro American bodies of knowledge and his in depth knowledge of Melanesian modes of thought This logic grounds variants of the subject object transformation as Wagner works through examples such as the figure ground reversal in Gestalt psychology Lacan s theory of the mirror stage formation of the Ego and even the self recursive structure of the aphorism and the joke Juxtaposing Wittgenstein s and Leibniz s philosophy with Melanesian social logic Wagner explores the cosmological dimensions of the ways in which different societies develop models of self and the subject object distinction The result is a philosophical tour de force by one of anthropology s greatest mavericks

Logical and Computational Aspects of Model-Based Reasoning L. Magnani,N.J. Nersessian,Claudio Pizzi,2012-12-06 Information technology has been in recent years under increasing commercial pressure to provide devices and systems which help replace the human in his daily activity This pressure requires the use of logic as the underlying foundational workhorse of the area New logics were developed as the need arose and new foci and balance has evolved within logic itself One aspect of these new trends in logic is the rising importance of model based reasoning Logics have become more and more tailored to applications and their reasoning has become more and more application dependent In fact some years ago I myself coined the phrase direct deductive reasoning in application areas advocating the methodology of model based reasoning in the strongest possible terms Certainly my discipline of Labelled Deductive Systems allows to bring pieces of the application areas as labels into the logic I therefore heartily welcome this important book to Volume 25 of the Applied Logic Series and see it as an important contribution in our overall coverage of applied logic

Metaphor and Artificial Intelligence John A. Barnden,Mark G. Lee,2001-03-01 This special issue arose out of a symposium on metaphor and artificial intelligence in which the main orientation was computational models and psychological processing models of metaphorical understanding The

papers in this issue discuss implemented computational systems for handling different aspects of metaphor understanding how metaphor can be accommodated in accepted logical representational frameworks psychological processes involved in metaphor understanding and the cross linguistic cognitive reality of conceptual metaphors *Metaphor* Eva Feder Kittay,1990 This book provides a comprehensive philosophical theory explicating the cognitive contribution of metaphor Metaphor effects a transference of meaning not between two terms but between two structured domains of content or semantic fields Semantic fields construed as necessary to a theory of word meaning provide the contrastive and affinitive relations that govern a term s literal use In a metaphoric use these relations are projected into a second domain which is thereby reordered with significant cognitive effects The book is a detailed revision and refinement of the semantic theory of metaphor Taking into account pragmatic considerations and recent linguistic and psychological studies the author forges a new understanding of the relation between metaphoric and literal meaning She amply illustrates her thesis with sensitive and systematic analyses of metaphors found in literature philosophy science and everyday language Metaphorical Metaphysics in Chinese Philosophy Derong Chen,2011-08-16 In *Metaphorical Metaphysics in Chinese Philosophy* Illustrated with Feng Youlan s New Metaphysics Derong Chen explores Chinese philosophy through a comprehensive study and critical analysis of Feng Youlan s new metaphysics proposing a systematic analysis of meaning that differs from the approach of the comparative linguistic analysis that A C Graham and Chad Hasen employed in their studies of Chinese philosophy This detailed analysis of Feng Youlan s new metaphysics demonstrates that Feng s system is not the completely Westernized philosophical system many scholars identify it as nor is it the pure logical and analytical system Feng himself intended to construct Rather the essence and characteristics of the new metaphysics at the core of Feng s philosophical system expose his philosophy as a continuation of the Chinese philosophical tradition in a new era This approach is most applicable to scholars of comparative philosophy and of any era of Chinese philosophy The Self-Conscious, Thinking Subject Robert Abele,2021-08-18 This book argues that the primary function of human thinking in language is to make judgments which are logical normative connections of concepts Robert Abele points out that this presupposes cognitive conditions that cannot be accounted for by empirical linguistic analyses of language content or social conditions alone Judgments rather assume both reason and a unified subject and this requires recognition of a Kantian type of transcendental dimension to them Judgments are related to perception in that both are syntheses defined as the unity of representations according to a rule form Perceptual syntheses are simultaneously pre linguistic and proto rational and the understanding Kant s Verstand makes these syntheses conceptually and thus self consciously explicit Abele concludes with a transcendental critique of postmodernism and what its deflationary view of ontological categories such as the unified and reasoning subject has done to political thinking He presents an alternative that calls for a return to normativity and a recognition of reason objectivity and the universality of principles **What is Literature?** Arthur Gibson,2007 The answer to the question what is literature has

not been found This is the first book length attempt to find the answer by one author since Sartre in his 1948 book with the same title The book addresses issues such as how does literature speak to the world what is great writing what is originality what sorts of truths are there if any in creative writing The book uses hundreds of literary examples and confronts them with philosophy The book also explores some big questions about the meaning of life and sets them against a range of literature It asks questions like how does great science relate to literature The book advances the concept of counter intuition as part of the basis for answering the question what is literature The book is also concerned with practical matters such as the ways literature is involved with war corruption rights suffering and hope Metaphysics and Transcendence Arthur

Gibson,2004-05-05 This author presents new metaphysics with a genealogy based on counter intuition and locates counter intuition and complexity at the foundations of truth This book stimulates future philosophical and religious discussion

Emerson's English Traits and the Natural History of Metaphor David LaRocca,2013-09-26 Metaphors are ubiquitous and yet or for that very reason go largely unseen We are all variously susceptible to a blindness or blurry vision of metaphors yet even when they are seen clearly we are left to situate the ambiguities connotations and contradictions they regularly present logically aesthetically and morally David LaRocca's book serves as a set of reminders of certain features of the natural history of our language especially the tropes that permeate and define it As part of his investigation LaRocca turns to Ralph Waldo Emerson's only book on a single topic English Traits 1856 which teems with genealogical and generative metaphors blood birth plants parents family names and race In the first book length study of English Traits in over half a century LaRocca considers the presence of metaphors in Emerson's fertile text a unique work in his expansive corpus and one that is regularly overlooked As metaphors are encountered in Emerson's book and drawn from a long history of usage in work by others a reader may realize or remember what is inherent and encoded in our language but rarely seen how metaphors circulate in speech and through texts to become the lifeblood of thought Metaphor and Its Moorings M. Elaine Botha,2007 Human knowledge and language reflect the metaphorical nature of the human experiential and conceptual system The author shows that metaphor and its underlying analogical structure are significant keys to the understanding of the metaphorical nature of reality and cognition and provide a better understanding of the relationship between science and religion This study builds critically on the insights of Lakoff and Johnson by introducing a new angle to the discussions concerning conceptual metaphor and its basis in human embodiment In her proposed alternative to the traditional view of knowledge the author argues that the distinction between literal and metaphorical language ought to be revisited and replaced with a view in which the idea of proper analogy and necessary metaphors are acknowledged The insights gained in this respect are also applied to the changing views concerning theory and observation in scientific theorizing A case study on the relationship between religion and science in the work of Michael Faraday illustrates that scientific observation is impregnated with theoretical convictions and that metaphors play a decisive role in the models developed to understand

reality *Routledge Handbook of Medicine and Poetry* Alan Bleakley, Shane Neilson, 2024-05-02 The Routledge Handbook of Medicine and Poetry draws on an international selection of authors to ask what the cultures of poetry and medicine may gain from reciprocal critical engagement The volume celebrates interdisciplinary inquiry critique and creative expansion with an emphasis upon amplifying provocative and marginalized voices This carefully curated collection offers both historical context and future thinking from clinicians poets artists humanities scholars social scientists and bio scientists who collectively inquire into the nature of relationships between medicine and poetry Importantly these can be both productive and unproductive How for example do poet doctors reconcile the outwardly antithetical approaches of bio scientific medicine and poetry in their daily work where typically the former draws on technical language and associated thinking and the latter on metaphors How does non narrative lyrical poetry engage with narrative based medicine How do poets writing about medicine identify as patients Central to the volume is the critical investigation of the consequences of varieties of medical pedagogy for clinical practice Presenting a vision of how poetic thinking might form a medical ontology this thought provoking book affords an essential resource for scholars and practitioners from across medicine health and social care medical education the medical and health humanities and literary studies *Metaphors of ANGER across Languages: Universality and Variation* Zoltan Kövecses, Réka Benczes, Veronika Széld, 2024-11-04 Anger is one of the basic emotions of human emotional experience informing and guiding many of our choices and actions Although it has received considerable scholarly attention in a number of disciplines including linguistics a basic question has still remained unresolved why do variations in the folk model of anger exist across languages if it is indeed a basic emotion rooted in largely universal bodily experience By drawing on a wide selection of comparable linguistic data from dozens of languages including a number of less researched languages this volume provides the most comprehensive account of what is universal and what is variable in the folk model of anger and why It also investigates the role that metonymies might play in the emergence of anger related metaphors and in what ways context influences or shapes anger metaphors and thereby the resulting folk model of anger No such volume exists in the cognitive linguistic literature on anger or on emotions for that matter The book is thus an essential contribution to the study of anger and will serve as basic reading for any researcher interested in how the conceptualization of anger is constructed via the interplay of bodily experience language and the larger cultural context **Foundations: Logic, Language, and Mathematics** Hugues Leblanc, Elliott Mendelson, A. Orenstein, 2013-04-17 The more traditional approaches to the history and philosophy of science and technology continue as well and probably will continue as long as there are skillful practitioners such as Carl Hempel Ernest Nagel and their students Finally there are still other approaches that address some of the technical problems arising when we try to provide an account of belief and of rational choice These include efforts to provide logical frameworks within which we can make sense of these notions This series will attempt to bring together work from all of these approaches to the history and philosophy of science and technology in the belief that

each has something to add to our understanding The volumes of this series have emerged either from lectures given by authors while they served as honorary visiting professors at the City College of New York or from conferences sponsored by that institution The City College Program in the History and Philosophy of Science and Technology oversees and directs these lectures and conferences with the financial aid of the Association for Philosophy of Science Psychotherapy and Ethics

MARTIN TAMNY RAPHAEL STERN PREFACE The papers in this collection stem largely from the conference Foundations of Logic Language and Mathematics held at the Graduate Center of the City University of New York on 14-15 November 1980

Metaphorical Landscapes and the Theology of the Book of Job Johan de Jooke, 2018-10-22 Metaphorical Landscapes and the Theology of the Book of Job demonstrates how spatial metaphors play a crucial role in the theology of the book of Job Themes as pivotal as trauma illness being retribution and divine character are conceptualized in terms of space its imagery is thus dependent on spatial configurations such as boundaries distance direction containment and contact Not only are spatial metaphors ubiquitous in the book of Job possibly the most frequent conceptual metaphors in the book they are essential to its theological reasoning Job's spatial metaphors form a metaphorical landscape in which God's character and his creation are challenged in unprecedented ways In the theophany God reacts to that landscape This book introduces a pragmatic synthesis of both conceptual metaphor theory and spatial semantics and it demonstrates their exegetical and hermeneutic potential

Metaphors Dead and Alive, Sleeping and Waking Cornelia Müller, 2009-10-15 Traditional thinking on metaphors has divided them into two camps dead and alive Conventional expressions from everyday language are classified as dead while much rarer novel or poetic metaphors are alive In the 1980s new theories on the cognitive processes involved with the use of metaphor challenged these assumptions but with little empirical support Drawing on the latest research in linguistics semiotics philosophy and psychology Cornelia Müller here unveils a new approach that refutes the rigid dead-alive dichotomy offering in its place a more dynamic model sleeping and waking To build this model Müller presents an overview of notions of metaphor from the classical period to the present studies in detail how metaphors function in speech text gesture and images and examines the way mixed metaphors sometimes make sense and sometimes do not This analysis leads her to conclude that metaphors may oscillate between various degrees of sleeping and waking as their status changes depending on context and intention Bridging the gap between conceptual metaphor theory and more traditional linguistic theories this book is a major advance for the field and will be vital to novices and initiates alike

Researching Metaphors Michele Prandi, Micaela Rossi, 2022-09-07 This collection advocates for a more holistic picture of metaphor extending the field's focus beyond the cognitive paradigm and conventional metaphorical concepts to illustrate the possibilities afforded by the study of living metaphors The volume brings together a diverse range of researchers in the discipline towards critically examining the presuppositions of the cognitive approach The book shines a light on living metaphors creative interpretations of conflictual meaning specific to a text or communicative act with their own unique

functions to throw into relief long held tenets in existing metaphor research Chapters reflect on the notion that creative metaphors spring from independent sources not merely from metaphorical concepts and the subsequent implications for our understanding of the relationship between linguistic forms and conceptual structures and the role of creative metaphors in organizing thought and action Taken together the book offers a complementary vision of languages and figures which integrates disparate lines of study within the cognitive paradigm with alternative perspectives for a more comprehensive portrait of metaphors This book will be of interest to students and scholars interested in the study of metaphor including such disciplines as theoretical linguistics cognitive linguistics semantics literary studies and philosophy of language
