Problems of Identity, Consciousness and Mind Jonathan O. Chimakonam, Uti Ojah Egbai, Samuel T. Segun, Aribiah D.

Attoe, 2019-02-23 This book introduces concepts in philosophy of mind and neurophilosophy Inside three scholars offer

approaches to the problems of identity consciousness and the mind In the process they open new vistas for thought and raise

fresh controversies to some of the oldest problems in philosophy The first chapter focuses on the identity problem The author

employs an explanatory model he christened sense phenomenalism to defend the thesis that personal identity is something or

a phenomenon that pertains to the observable perceptible aspect of the human person The next chapter explores the problem

of consciousness It deploys the new concept equiphénoménalism as a model to show that mental properties are not by

products but necessary products of consciousness Herein the notion of qualia is a fundamental and necessary product that

must be experienced simultaneously with neural activities for consciousness to be possible The last chapter addresses the

mind body problem It adopts the new concept proto phenomenalism as an alternative explanatory model This model

eliminates the idea of a mind As such it approaches the mind body problem from a materialistic point of view with many

implications such as the meaning lessness of our existence the possibility of thought engineering as well as religious

implications **Biosemiotic Medicine** Farzad Goli, 2016-08-02 This book presents an interpretation of pharmaceutical

surgical and psychotherapeutic interventions based on a univalent metalanguage biosemiotics It proposes that a

metalanguage for the physical mental social and cultural aspects of health and medicine could bring all parts and aspects of

human life together and thus shape a picture of the human being as a whole made up from the heterogeneous images of the

vast variety of sciences and technologies in medicine discourse The book adopts a biosemiotics clinical model of thinking

because similar to the ancient principle of alchemy *tam ethice quam physice* everything in this model is physical as much as

it is mental Signs in the forms of vibrations molecules cells words images reflections and rites conform cultural mental

physical and social phenomena The book decodes healing dealing with health illness and therapy by emphasizing the first

person experience as well as objective events It allows readers to follow the energy information flows through and between

embodied minds and to see how they form physiological functions such as our emotions and narratives Appearance in

Reality John Heil, 2021-09-16 In Appearance in Reality John Heil addresses a question at the heart of metaphysics how are the

appearances related to reality how does what we find in the sciences comport with what we encounter in everyday

experience and in the laboratory Objects for instance appear to be colourful noisy self contained and massively interactive

Physics tells us they are dynamic swarms of colourless particles or disturbances in fields or something equally strange Is what we experience illusory present only in our minds But then what are minds Do minds elude physics Or are the physicist s depictions mere constructs with no claim to reality Perhaps reality is hierarchical physics encompasses the fundamental things the less than fundamental things are dependent on but distinct from these Heil s investigation advances a fourth possibility the scientific image what we have in physics affords our best guide to the nature of what the appearances are appearances of
