National Geographic Traveler, 1997 Ghosts of the Farm Nicola Chester, 2025-09-30 From the Wainwright Nature Prize Highly Commended author Nicola Chester a rural narrative between two women in two different eras who both wanted to become farmers Nicola Chester will come to be seen as a Nan Shepherd of our time Nick Acheson author of *The Meaning of Geese* This is the story of Miss White a woman who lived in the author's village 80 years ago a pioneer who realised her ambition to become a farmer during the Second World War and how she worked to become accepted within this community Nicola Chester too dreamed of becoming a farmer but working with horses was the only path open to her Was it easier for women to become farmers in the 1940s than it is now Moving between Nicola's own attempts to work outdoors and Miss White's desire to farm a generation earlier Nicola explores the parallels between their lives and the differences Miss White buys a derelict farm and begins to renovate and modernize it As ghost barn owls flit between these two worlds Nicola draws connections with farming and rural life in both times from the role of women in rural communities in the modern day to Miss White's experience in the 1940s And how those farming modernizations have left the modern day with both a denuded landscape and farming community and a disconnect from nature Increasingly Nicola's research into past and present interlinks and illuminates her own battles to raise awareness of rural communities outdoor work and the ongoing loss of farmland birds that were so familiar to Miss White An absolutely fascinating insight into women and farming Nicola Chester really knows how to bring the past alive Claire Fuller author of *The Memory of Animals* Ghost Stories Peter J. of the Brave Kevin J. Crisman, 2014-01-30 In *Coffins of the Brave* Lake Shipwrecks of the War of 1812 archaeologist Kevin J. Crisman and his fellow contributors examine sixteen different examples of 1812 era naval and commercial shipbuilding. They range from four small prewar vessels to four 16 or 20 gun brigs, three warships of much greater size, a steamboat hull converted into an armed schooner, two gunboats, and two postwar schooners. Despite their differing degrees of preservation and archaeological study, each vessel reveals something about how its creators sought the best balance of strength, durability, capacity, stability, speed, weatherliness, and seaworthiness for the anticipated naval struggle on the lakes along the US-Canadian border. The underwater archaeology reported here has guided a new approach to understanding the events of 1812: one that blends the evidence in contemporary documents and images with a wealth of details derived from objects lost, discarded, and otherwise left behind. This heavily illustrated volume balances scholarly findings with lively writing, interjecting the adventure of working on shipwrecks and archaeological finds into the investigation and interpretation of a war that continues to attract interest two centuries after it was fought.
