perspectives on digital scholarship that speak to today's computational realities. Scholars across the humanities, social sciences, and information sciences are grappling with how best to study virtual environments, use computational tools in their research, and engage audiences with their results. Classic work in science and technology studies (STS) has played a central role in how these fields analyze digital technologies, but many of its key examples do not speak to today's computational realities. This groundbreaking collection brings together a world-class group of contributors to refresh the canon for contemporary digital scholarship. In twenty-five pioneering and incisive essays, this unique digital field guide offers innovative new approaches to digital scholarship, the design of digital tools and objects, and the deployment of critically grounded technologies for analysis and discovery. Contributors cover a broad range of topics, including software development, hackathons, digitized objects, diversity in the tech sector, and distributed scientific collaborations. They discuss methodological considerations of social networks and data analysis, design projects that can translate STS concepts into durable scientific work, and much more. Featuring a concise introduction by Janet Vertesi and David Ribes and accompanied by an interactive microsite, this book provides new perspectives on digital scholarship that will shape the agenda for tomorrow's generation of STS researchers and practitioners. Social Media and the Armed Forces Eva Moehlecke de Baseggio, Olivia Schneider, Tibor Szvircsev Tresch, 2020-09-07. Social media has fundamentally changed communication and interaction in today's society. Apart from being used by individuals, it is also omnipresent in public sector organizations such as the armed forces. This book examines the opportunities and risks associated with social media in the context of the armed forces from an international, social scientific perspective. It discusses the impact of social media in the everyday life of military personnel and analyses the extent to which social media influences their performance, be it as a distraction or as a source of perceived appreciation. It particularly highlights the representation of masculinity and femininity in military social media channels, since the way gender is portrayed on social media has an effect on how future recruits and, at the other end of the military career spectrum, veterans feel they are approached. The book also focuses on the new form of follow-up discussion, which enables the armed forces to interact with the population. On social media, the armed forces are publicly presented, and this shapes the public's opinions on them. Further, the armed forces can use debates as a monitoring tool of society's attitudes towards them or towards events that have an effect on society. Conversely, social media can lend a voice to military personnel, allowing them to be publicly heard. As discussions on social media can only be controlled to a limited extent, the context in which the armed forces are discussed alters their sphere of influence and potentially leads to a loss of control. An extreme example of this is the use of social media as a tool to strategically distribute misinformation in order to shape public opinion and threaten national security. Moreover, the use of social media to demoralize adversaries or to harm their credibility results in social media being considered a cyber weapon that affects politics and military activities. [Families Under Stress](#) Benjamin R. Karney, John S. Crown, 2007. Recent

demands on the military have raised concerns about the impact of extended deployments on military marriages To evaluate this impact the authors draw on marital status data in service personnel records to estimate trends in marriage and marital dissolution between 1996 and 2005 and the specific effects of time deployed to Afghanistan and Iraq on subsequent risk of ending a marriage The results generally run counter to expectations Although rates of marital dissolution have increased since 2001 for most services and components they had declined in the five years prior to 2001 As a result marital dissolution rates across the services and components are currently similar to those observed in 1996 when the demands on the military were measurably lower In most cases service members who were deployed had a lower risk of subsequently ending their marriages than service members who did not deploy or deployed fewer days *Air University Library Index to Military Periodicals*, 1999

The Art of Moral Protest James M. Jasper, 2008-04-15 In *The Art of Moral Protest* James Jasper integrates diverse examples of protest from nineteenth century boycotts to recent movements into a distinctive new understanding of how social movements work Jasper highlights their creativity not only in forging new morals but in adopting courses of action and inventing organizational forms A provocative perspective on the cultural implications of political and social protest *Library Journal*

Peace Operations and Restorative Justice Peter Reddy, 2016-05-13 With a bold vision and a distinctive message Reddy stipulates that international peacekeeping can be designed and implemented using the principles of restorative justice To prove this Reddy discusses the congruence of crime armed conflict and violent disorder critiquing restorative justice and its nuanced character as a suitable application to complex civil wars This book provides a comprehensive survey of peace operations and then focuses on the cases of Somalia and Bougainville The comparison between their societal contexts their conflicts peace operations and final outcomes are crucial to this argument Furthermore this shows how the constraining maximising and emergent values of restorative justice can be applied in a peacekeeping setting from the overall command level through to the behaviours of deployed peacekeepers with direct contemporary application This sharp study makes for evocative reading as it introduces the new concept of regeneration as key to any restoratively arranged peace operation Military police NGO and civilian peacekeeper practitioners as well as academic theorists can use this unique work to produce better and more lasting results for conflict ridden communities

Organizational Reaction to Social Deviance Robert Joseph Stevenson, 2010 This study in criminology sociology and the US Military explores changes in the meaning and production of deviant populations in American military settings since 1941 It is designed to highlight the operation of an ethos of control as armed forces and society undergo historically unstable accommodation and conflict The author examines time series data on organizational reaction to deviance in military settings Bad Paper Discharges courts martial and administrative controls in light of central characteristics of military settings the social composition of officer and enlisted ranks force levels technological changes in war hardware and the distribution of risks faced by various kinds of soldiers Propositions from the deviance literature concerning 1 the constancy of punishment 2

the duration intensity and priority of sanctioning and 3 cohesion and stress are examined in military contexts to discern the changing social control climates therein Some sources of the shift are located in the role that risk plays in the system and the function of the officer corps as agents of social control In short the character of social institutions is knowable in part by studying the manner in which deviants therein are controlled stigmatized and expelled An extensive bibliography is provided
