Orca's Song Anne Cameron,1987 A legend explaining how the Orca whale came to be colored black and white **Orca** Jason M. Colby,2018-05-01 Since the release of the documentary Blackfish in 2013 millions around the world have focused on the plight of the orca the most profitable and controversial display animal in history Yet until now no historical account has explained how we came to care about killer whales in the first place Drawing on interviews official records private archives and his own family history Jason M Colby tells the exhilarating and often heartbreaking story of how people came to love the

ocean's greatest predator. Historically reviled as dangerous pests, killer whales were dying by the hundreds even thousands by the 1950s, the victims of whalers, fishermen, and even the US military. In the Pacific Northwest, fishermen shot them, scientists harpooned them, and the Canadian government mounted a machine gun to eliminate them. But that all changed in 1965 when Seattle entrepreneur Ted Griffin became the first person to swim and perform with a captive killer whale. The show proved wildly popular, and he began capturing and selling others, including Sea World's first Shamu. Over the following decade, live display transformed views of *Orcinus orca*. The public embraced killer whales as charismatic and friendly, while scientists enjoyed their first access to live orcas. In the Pacific Northwest, these captive encounters reshaped regional values and helped drive environmental activism, including Greenpeace's anti-whaling campaigns. Yet even as Northwesterners taught the world to love whales, they came to oppose their captivity and to fight for the freedom of a marine predator that had become a regional icon. This is the definitive history of how the feared and despised killer became the beloved orca, and what that has meant for our relationship with the ocean and its creatures.

[Song of the Whale](#) Rex Weyler, 1986 [The Killer Whale Journals](#) Hanne Strager, 2023-04-11

Experience the hauntingly beautiful world of orcas and discover the stories that unfold when humans enter oceans alongside them. Winner of the National Outdoor Book Award by the NOBA Foundation. Honorable mention for the Sigurd Olson Nature Writing Awards by the Northland College. When intrepid biology student Hanne Strager volunteered to be the cook on a small research vessel in Norway's Lofoten Islands, the trip inspired a decades-long journey into the lives of killer whales and an exploration of people's complex relationships with the biggest predators on earth. *The Killer Whale Journals* chronicles the now internationally renowned science writer's fascinating adventures around the world, documenting Strager's personal experiences with orcas in the wild. Killer whales' incredible intelligence, long life spans, and strong family bonds lead many people to see them as kindred spirits in the sea. But not everyone feels this way. Like wolves, orcas have been both beloved and vilified throughout human history. In this absorbing odyssey, Strager traces the complicated relationship between humans and killer whales while delving into their behavior, biology, and ecology. She brings us along in her travels to the most remote corners of the world, battling the stormy Arctic seas of northern Norway with fellow biologists intent on decoding whale song, interviewing First Nations conservationists in Vancouver, observing Inuit hunters in Greenland, and witnessing the dismantling of black market whale jails in the Russian wilderness of Kamchatka. Through these captivating stories, Strager introduces us to a diverse cast of characters, from Inuit elders to Australian Aboriginal whalers, and guides us through the world's wild waters, from fjords above the Arctic circle in Norway to the poaching-infested waters off Kamchatka. Featuring astonishing photographs from famed nature photographer and conservationist Paul Nicklen, *The Killer Whale Journals* reveals rare and intimate moments of connection with these fierce, brilliant predators.

Strangers to Relatives Sergei Kan, 2001-01-01 Strangers to Relatives is an intimate and illuminating look at a typical but misunderstood part of anthropological fieldwork in North America the adoption and naming of anthropologists by Native families and communities Adoption and naming have long been a common way for Native peoples in Canada and the United States to deal with strangers who are not enemies For over a century adoption and naming have also served as an important means for many Native American and First Nation communities to become connected to the

anthropologists visiting and writing about them In this outstanding volume leading anthropologists in the United States and Canada discuss this issue by focusing on the cases of such prominent earlier scholars as Lewis Henry Morgan and Franz Boas They also share personal experiences of adoption and naming and offer a range of stimulating perspectives on the significance of these practices in the past and today The contributors explore the impact of adoption and naming upon the relationship between scholar and Native community considering in particular two key issues How does adoption affect the fieldwork and subsequent interpretations by anthropologists and in turn how are Native individuals and communities themselves affected by adopting an outside scholar whose aim is to learn and write about them Strangers to Relatives not only sheds valuable light on how anthropology fieldwork is conducted but also makes a seminal contribution to our understanding of the ongoing often troubled relationship between the academy and Native communities
