Organizing The Breathless Cotton Dust Southern Politics The Brown Lung Association:

Organizing the Breathless Robert E. Botsch, 2021-12-14 In the 1970s textile workers joined forces with a small band of grassroots activists and organizers and challenged the most powerful industrial interest in the heart of Dixie the cotton textile manufacturers They located disabled workers and organized them employing the full range of interest group tactics and they creatively engaged in legislative administrative and judicial lobbying as well as protest actions with remarkable success Robert E Botsch recounts the history of the Brown Lung Association and details the interaction of the major participants in the rise and ultimately the failure of the organization A once all powerful and politically dominant textile industry lost its public relations battle as it lost business to cheaper labor markets abroad Medical researchers policy makers and regulators had difficulty communicating State government regulations often cost workers their health and their means of support Organizers allowed their followers to become too dependent on their ability to raise grant monies Working class southerners found energy and courage in the face of age and sickness but were incapable of the self discipline necessary for successful long term organization Organizing the Breathless reveals the dramatic negative impact of the Reagan years on the disabled workers and their organization and draws lessons from the experience of other interest groups Botsch examines central issues the value of membership incentives the complexities of relationships with organizers and the perennial question of the relative importance of organization versus protest This book will interest political scientists and historians as a strong study of labor issues interest groups and the South

Southern Workers and the Search for Community George Calvin Waldrep, 2000 *Southern Workers and the Search for Community* is the first major effort to interpret the enduring legacy of the southern textile industry company owned mill villages and the union struggles of the 1930s Focusing on Spartanburg County South Carolina G C Waldrep offers an eloquent study of the hopes and fears that define patterns of labor activism Revealing a complex meshing of community ties and traditions with the goals and ideals of unionism Waldrep shows how unions fed into a social vision of mutuality equality and interdependency already established in mill villages This powerful sense of community however ultimately rested on sand Because the villages themselves were the property of management any labor conflict involved not only issues of wages hours and working conditions inside the mill but also virtually every other aspect of life Most important the mill owners held the trump card of eviction Waldrep looks beyond official versions of union activity in Spartanburg County to explain the episodic and apparently erratic eruptions of labor tensions and intervening periods of calm Drawing on private records of textile workers their employers and their unions during the 1930s and 1940s as well as more than a hundred oral interviews with workers Waldrep reinterprets the periods of quiescence that have long puzzled historians Documenting the high stakes of labor protest in mill villages Waldrep shows how the erosion or outright destruction of community systematically undermined the ability of workers to respond to the assaults of employers overwhelmingly supported by government agencies and agents Beautifully written and persuasively

argued *Southern Workers and the Search for Community* opens the gates of southern company towns to illuminate the human issues behind the mechanics of labor

The Cotton Dust Papers Charles Levenstein, Gregory Delaurier, Mary Lee Dunn, 2018-02-06 *The Cotton Dust Papers* is the story of the 50 year struggle for recognition in the U S of this pernicious occupational disease The authors contend that byssinosis could have and should have been recognized much sooner as a great deal was known about the disease as early as the 1930s Using mostly primary sources the authors explore three instances from the 1930s to the 1960s in which evidence suggested the existence of brown lung in the mills yet nothing was done What the story of byssinosis makes clear is that the economic and political power of private owners and managers can hinder and shape the work of health investigators

Encyclopedia of White-Collar & Corporate Crime Lawrence M. Salinger, 2005 In a thorough reappraisal of the white collar and corporate crime scene this Second Edition builds on the first edition to complete the criminal narrative in an outstanding reference resource

When the Air Became Important Janet Greenlees, 2019-03-15 In *When the Air Became Important* medical historian Janet Greenlees examines the working environments of the heartlands of the British and American cotton textile industries from the nineteenth to the late twentieth centuries Greenlees contends that the air quality within these pioneering workplaces was a key contributor to the health of the wider communities of which they were a part Such enclosed environments where large numbers of people labored in close quarters were ideal settings for the rapid spread of diseases including tuberculosis bronchitis and pneumonia When workers left the factories for home these diseases were transmitted throughout the local population yet operatives also brought diseases into the factory Other aerial hazards common to both the community and workplace included poor ventilation and noise Emphasizing the importance of the peculiarities of place as well as employers balance of workers health against manufacturing needs Greenlees s pioneering book sheds light on the roots of contemporary environmentalism and occupational health reform Her work highlights the complicated relationships among local business local and national politics of health and community priorities

Fighting Toxic Ignorance Alan Derickson, 2025-04-15 *Fighting Toxic Ignorance* explores conflict over access to information regarding health hazards encountered in the US workplace during the first three quarters of the twentieth century Alan Derickson considers risks posed by toxic chemicals and physical and biological agents of disease By the 1970s occupational disease was estimated to kill up to 100 000 Americans a year Derickson unravels the social and political forces and the conflictual process that gave rise to a sustained social movement for a workers right to know about often insidious threats He argues that the decades prior to the emergence of this movement were not a dark age of victimization brought about by enforced ignorance but a time of recurrent battles over the disclosure of needed facts Workplace warnings informative signs labels and instructions often saved lives *Fighting Toxic Ignorance* covers a broad range of dangerous substances deals with a large share of the

national workforce and illuminates the many ways that activists endeavored to see that warnings reached workers especially immigrants and workers of color

Black Lung Alan Derickson, 2014-04-11 In the definitive history of a twentieth century public health disaster Alan Derickson recounts how for decades after methods of prevention were known hundreds of thousands of American miners suffered and died from black lung a respiratory illness caused by the inhalation of coal mine dust The combined failure of government medicine and industry to halt the spread of this disease and even to acknowledge its existence resulted in a national tragedy the effects of which are still being felt The book begins in the late nineteenth century when the disorders brought on by exposure to coal mine dust were first identified as components of a debilitating and distinctive illness For several decades thereafter coal miners dust disease was accepted in both lay and professional circles as a major industrial disease Derickson describes how after the turn of the century medical professionals and industry representatives worked to discredit and supplant knowledge about black lung with such success that this disease ceased to be recognized Many authorities maintained that breathing coal mine dust was actually beneficial to health Derickson shows that activists ultimately forced society to overcome its complacency about this deadly and preventable disease He chronicles the growth of an unprecedented movement from the turn of the century miners union to the social medicine activists in the mid twentieth century and the black lung insurgents of the late sixties which eventually won landmark protections and compensation with the enactment of the Federal Coal Mine Health and Safety Act in 1969 An extraordinary work of scholarship *Black Lung* exposes the enormous human cost of producing the energy source responsible for making the United States the world's preeminent industrial nation

A Fabric of Defeat Bryant Simon, 2000-11-09 In this book Bryant Simon brings to life the politics of white South Carolina millhands during the first half of the twentieth century His revealing and moving account explores how this group of southern laborers thought about and participated in politics and public power Taking a broad view of politics Simon looks at laborers as they engaged in political activity in many venues at the polling station on front porches and on the shop floor and examines their political involvement at the local state and national levels He describes the campaign styles and rhetoric of such politicians as Coleman Blease and Olin Johnston himself a former millhand who eagerly sought the workers votes He draws a detailed picture of mill workers casting ballots carrying placards marching on the state capital writing to lawmakers and picketing factories These millhands politics reflected their public and private thoughts about whiteness and blackness war and the New Deal democracy and justice gender and sexuality class relations and consumption Ultimately the people depicted here are neither romanticized nor dismissed as the stereotypically racist and uneducated rednecks found in many accounts of southern politics Southern workers understood the political and social forces that shaped their lives argues Simon and they developed complex political strategies to deal with those forces

Making Democracy Work Better Richard A. Couto, 1999 The decade of the 1980s marked a triumph for market capitalism As politicians of all stripes sought to reinvent government in the image of private enterprise they looked to the

voluntary sector for allies to assuage the human costs of reductions in publ
