Culture and Psychological Development Dabie Nabuzoka, Janet Empson, 2009-12-08

From infancy through to school age and beyond, most children are in constant contact with an array of social influences. Home, life, education, community, and the media all have some part to play in a child's development. In this absorbing book, the authors discuss the ways such diverse cultural settings impact on behaviour and how children are shaped by the world around them. They examine development from both a cultural and cross-cultural perspective, drawing on case studies to illuminate theoretical insights. Students of both developmental and cultural psychology will find this to be the perfect starting point from which to investigate this fascinating topic further.

Assessment of Young Developmentally Disabled Children Theodore D. Wachs, Robert Sheehan, 2013-06-29

Our knowledge of the cognitive and social-emotional functioning of developmentally disabled infants and preschoolers derives in large part from our assessment of such children. This book has been developed to familiarize readers with the characteristics of developmentally disabled children and to introduce to readers aspects of measurement that are of relevance to the assessment of atypical infants and preschoolers. The book has been developed with clinicians and prospective clinicians in mind. These are individuals who are committed to the care and education of developmentally disabled infants and preschoolers and the families of those children. The book has thus been written to provide support for the use of assessment data in planning early intervention programs. Of special note in the development of this edited book is that it is divided into four major parts with interrelated chapters in each part. The authors of chapters in Parts II and III had access to the chapters in Part I before writing their chapters. The summary chapters found in Part IV were similarly written by authors having access to all chapters in Parts I-III. This approach to the development of an edited book was chosen as a way of ensuring an integration of major concepts throughout the book. This process is also a reflection of our belief that assessment is an interdisciplinary process involving the synthesis of a number of diverse interests.
