Cohen, 2014-05-01 Gary Indiana was founded in 1906 and was part of the US Steel Corporation's plan to build the world's largest steel mill. The city's school system became world famous as a progressive educational experiment until the 1930s when a changing political and economic climate led to an erosion of the system which faced a serious overcrowding crisis in the 1950s. Blending social and intellectual history Ronald Cohen examines the economic political and cultural context of the unique educational experience developed in this urban industrial center. Cohen demonstrates that while various interest groups local as well as national helped mold educational policies and practices the Gary schools operated within the framework of corporate capitalism. Despite their early experimental nature the Gary schools exemplified the rise of mass education in a multi racial multi ethnic class structure and urban setting Castro-communist Subversion in the Western Hemisphere , 1963 **Alternative Schools** Brenda Edgerton Conley, 2002-11-22 An examination of the growth and development of alternative schools in American society and their role in the public school environment. In *Alternative Schools: A Reference Handbook* educator Brenda Edgerton Conley surveys the emerging alternatives to our conventional educational system a system that is not only costly but ineffective for many children. In a resource aimed at a broad audience school administrators politicians and most important parents Conley offers both a historical and a present day perspective on alternative educational programs. What sets the alternative education movement apart she argues is its acknowledgment that we all learn differently. That knowledge has given rise to an explosion of exciting alternatives from open schools to home schooling from charter schools to church schools. These alternative schools are smaller and less bureaucratic more responsive to the community and more receptive to change *Hearings* United States. Congress. Anderson,1964 **Rediscovering the Democratic Purposes of Education** Lorraine McDonnell,P. Michael
Timpone,Roger W. Benjamin,2000 Why do America s public schools seem unable to meet today s social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today s education system seems more concerned with producing good employees than good citizens Meanwhile our country s diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education Nine original articles by some of today s leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey A second group identifies flaws in how schools are currently governed and offers models for change A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy Spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America s future Bulletin of the International Bureau of Education ,1957
