Scott Bryson, 2005-04-01 In contrast to nature poets of the past who tended more toward the bucolic and pastoral many contemporary nature poets are taking up radical environmental and ecological themes In the last few years interesting and evocative work that examines this poetry has begun to lay the foundation for studies in ecopoetics Informed in general by current thinking in environmental theory and specifically by the work of cultural geographer Yi Fu Tuan *The West Side of Any Mountain* participates in and furthers this scholarly attention by offering an overarching theoretical framework with which to approach the field One area that contemporary theorists have found problematic is the dualistic civilization wilderness binary that focuses on the divisions between culture and nature thereby increasing the modern sense of alienation Tuan's place space framework offers a succinct vocabulary for describing the attitudes of

ecological poets and other nature writers in a way that avoids setting up an adversarial relationship between place and space Scott Bryson describes the Tuanian framework and employs it to offer fresh readings of the work of four major ecopoets Wendell Berry Joy Harjo Mary Oliver and W S Merwin The West Side of Any Mountain will be of great interest to scholars and teachers working in the field of contemporary nature poetry It is recommended for nature writing courses as well as classes dealing with 20th century poetry contemporary literary criticism and environmental theory

Me-Search and Re-Search DeMethra LaSha Bradley,Robert Nash,2011-03-01 From the Foreword Robert and DeMethra s book Me Searching and Re Search has caught my fancy in a number of ways The book title cleverly captures what SPN is all about it is about self narratives the me search part and about scholarly meaning making the re search part This eye catching title also illuminates the authors intent to turn this seemingly intimidating method of self inquiry into something very accessible and doable Their jargon free language is friendly and inviting Although they don t intend to make their many methodological tips and tools too prescriptive their practical suggestions provided in this guide book are indeed helpful and useful I believe that Robert and DeMethra have demonstrated admirable talents as effective educators by unpacking the complex method of SPN writing into bite sized steps I am fully convinced that the steps will help both novices and the experienced researcher to reach the ultimate height of producing engaging and scholarly significant SPN s The book is also fun to read The authors intersperse throughout their own SPN s pedagogical insights from their doing and teaching and real life stories in order to illustrate the methodological process challenges and triumphs
