Slow Growth and the Service Economy

Pascal Petit, 2013-11-07 The slow down in economic growth and the rise in unemployment in the 1970s revived some of the uncertainties experienced by industrialized economies during the inter war period After more than a decade of stagnation the period of sustained growth in the thirty years following the Second World War now seems increasingly to have been an exceptional phase in an overall development process still dominated by wide fluctuations in economic growth rates Slow Growth and the Service Economy examines what it means to live in a period of economic recession and analyses social patterns in response to the slowing down of financial and economic growth

Great Britain. Parliamentary and Health Service Ombudsman, 2009 In 2007/08 the Parliamentary Ombudsman received 7 341 complaints about government departments and a range of other public bodies Of these 2 574 were about the Department for Work and Pensions DWP This is not surprising given the size and nature of DWP's business serving as they do over 20 million customers at any one time It is understandable even inevitable that mistakes will happen What is important is how DWP dealt with the complaints arising from mistakes Many but by no means all of the complaints received could have been resolved much sooner and by DWP themselves if the complaint handling had been more customer focused This report contains an anonymised digest of selected cases highlighting poor information delays poor record keeping poor communication Local

resolution of complaints should be the most efficient way to secure an appropriate outcome It is hoped the report will encourage DWP to seek ways to improve the service they provide to citizens *Computerworld* ,1974-09-25 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network **Mind Matters** David M.
