

The background of the book cover is a surrealist painting. It features a grid of thin, golden-yellow lines that resemble a map's latitude and longitude. The background colors are a mix of light blue, pale yellow, and soft grey. In the lower-left quadrant, a face with voluminous, curly, golden-yellow hair emerges from the blue areas. The face is partially obscured by the grid lines. In the upper-right, there's a small, irregularly shaped landmass or island in shades of green and yellow. The overall style is dreamlike and artistic.

David Baud

Putting A Face On Things Studies In Imaginary Materials:

The Emergence of the Interior Charles Rice, 2006-11-22 Taking a radical position counter to many previous histories and theories of the interior domesticity and the home *The Emergence of the Interior* considers how the concept and experience of the domestic interior have been formed from the beginning of the nineteenth century It considers the interior's emergence in relation to the thinking of Walter Benjamin and Sigmund Freud and through case studies in architecture's trajectories toward modernism The book argues that the interior emerged with a sense of doubleness being understood and experienced as both a spatial and an image based condition Incorporating perspectives from architecture critical history and theory and psychoanalysis *The Emergence of the Interior* will be of interest to academics and students of the history and theory of architecture and design social history and cultural studies **Body Utopianism** Franziska Bork

Petersen, 2022-07-04 This book investigates how desires to transform our bodies can bring utopia to the present and how utopian practices often lead to distinctly dystopian or anti utopian outcomes It is the first comprehensive study to address the paradoxical relationship between bodies and utopianism Franziska Bork Petersen discusses doping bodybuilding and cosmetic surgery alongside practices such as retouching the body as image on social media and looks at how fashion modelling and performance estrange the body Techniques and technologies to transform our bodies are increasingly accessible and suggest an excessive identification of the body as lacking To be a body in a culturally meaningful way we incessantly improve our bodily appearance and capacity The book therefore addresses the utopianism inherent in a cultural understanding of bodies as increasingly controllable **Gods in the Bazaar** Kajri Jain, 2007-04-06 A theoretically informed cultural study of the design production and circulation of Indian calendar art

,1994 **Merleau-Ponty: An Ontology of the Imaginary** Annabelle Dufourcq,2024-11-19 This study brings to light the original concept of the imaginary that emerges from Merleau Ponty s thought It elucidates the main influences that contributed to shaping Merleau Ponty s theory of the imaginary and aims to show that this novel concept constitutes one of the most crucial yet challenging keys to his philosophy and ultimately his ontology This book develops the ontology of the imagery sketched by Merleau Ponty and examines its practical implications As its originally ambiguous and inseparable underside the imaginary is just as central to Merleau Ponty s philosophy as perception The author argues to enlarge the notion of reality by recognizing the imaginary dimension and texture of the real and that Merleau Ponty s ontology of the flesh cannot be separated from an ontology of the imaginary This monograph examines Merleau Ponty s conception of the imaginary against both his aesthetics and his political philosophy and appeals to students and researchers working in phenomenology and continental philosophy **Putting a Face on Things** Michael Carter,1997 Studies in Imaginary Things

Social Cognitive Psychology David F. Barone,James E. Maddux,C. R. Snyder,2012-11-19 A pragmatic social cognitive psychology covers a lot of territory mostly in personality and social psychology but also in clinical counseling and school psychologies It spans a topic construed as an experimental study of mechanisms by its natural science wing and as a study of cultural interactions by its social science wing To learn about it one should visit laboratories field study settings and clinics and one should read widely If one adds the fourth dimension time one should visit the archives too To survey such a diverse field it is common to offer an edited book with a resulting loss in integration This book is coauthored by a social personality psychologist with historical interests DFB Parts I II and IV in collaboration with two social clinical psychologists CRS and JEM Parts III and V We frequently cross reference between chapters to aid integration without duplication To achieve the

kind of diversity our subject matter represents we build each chapter anew to reflect the emphasis of its content area Some chapters are more historical some more theoretical some more empirical and some more applied All the chapters reflect the following positions

The Moment of Self-Portraiture in German Renaissance Art Joseph Leo Koerner, 1993 So foundational is this invention to modern aesthetics Koerner argues that interpreting it takes us to the limits of traditional art historical method Self portraiture becomes legible less through a history leading up to it or through a sum of contexts that occasion it than through its historical sight line to the present After a thorough examination of Durer s startlingly new self portraits the author turns to the work of Baldung Durer s most gifted pupil and demonstrates how the apprentice willfully disfigured Durer s vision Baldung replaced the master s self portraits with some of the most obscene and bizarre pictures in the history of art In images of nude witches animated cadavers and copulating horses Baldung portrays the debased self of the viewer as the true subject of art The Moment of Self Portraiture thus unfolds as passages from teacher to student artist to viewer reception all within a culture that at once deified and abhorred originality

Critical Terms for Religious Studies Mark C. Taylor, 2013-07-09 A century that began with modernism sweeping across Europe is ending with a remarkable resurgence of religious beliefs and practices throughout the world Wherever one looks today from headlines about political turmoil in the Middle East to pop music and videos one cannot escape the pivotal role of religious beliefs and practices in shaping selves societies and cultures Following in the very successful tradition of Critical Terms for Literary Studies and Critical Terms for Art History this book attempts to provide a revitalized self aware vocabulary with which this

bewildering religious diversity can be accurately described and responsibly discussed. Leading scholars working in a variety of traditions demonstrate through their incisive discussions that even our most basic terms for understanding religion are not neutral but carry specific historical and conceptual freight. These essays adopt the approach that has won this book's predecessors such widespread acclaim: each provides a concise history of a critical term, explores the issues raised by the term, and puts the term to use in an analysis of a religious work, practice, or event. Moving across Judaism, Christianity, Hinduism, Buddhism, Islam, and Native American and Mayan religions, contributors explore terms ranging from experience, territory, and image to God, sacrifice, and transgression. The result is an essential reference that will reshape the field of religious studies and transform the way in which religion is understood by scholars from all disciplines, including anthropology, sociology, psychology, cultural studies, gender studies, and literary studies.
