Putting Class In Its Place Worker Identities In East Asia:

Putting Class in Its Place Elizabeth J. Perry, 1996 **Organising Labour in Globalising Asia** Andrew Brown, Jane Hutchison, 2003-09-02 This book offers wide ranging insights into the organising capacities of workers in Asia today Nine case studies examine workers responses to class relations through independent unions non government organisations NGOs and more dis organised struggles Countering the notion that globalisation holds entirely negative consequences for labour organisation the authors reveal some of the openings for local activism which can arise from transnational production arrangements The volume covers the second tier industrializers China Thailand Malaysia the Philippines Indonesia India and Bangladesh Interdisciplinary in nature it will be of great interest to students and scholars of Asian studies development studies and international labour studies *Inside China's Automobile Factories* Lu Zhang, 2015 In *Inside China's Automobile Factories* Lu Zhang explores the current conditions subjectivity and collective actions of autoworkers in the world's largest and fastest growing automobile manufacturing nation Based on years of fieldwork and extensive interviews conducted at seven large auto factories in various regions of China Zhang provides an inside look at the daily factory life of autoworkers and a deeper understanding of the roots of rising labor unrest in the auto industry Combining original empirical data and sophisticated analysis that moves from the shop floor to national political economy and global industry dynamics the book develops a multilayered framework for understanding how labor relations in the auto industry and broader social economy can be expected to develop in China in the coming decades Contesting Citizenship in Urban China Dorothy J. Solinger, 1999-05-17 Post Mao market reforms in China have led to a massive migration of rural peasants toward the cities Denied urban residency this floating population provides labour but loses out on government benefits This study challenges the notion that markets promote rights and legal equality *Workers at War* Joshua H. Howard, 2004-09-29 This book focuses on the lives struggles and contrasting perspectives of the 60 000 workers military administrators and technical staff employed in the largest most strategic industry of the Nationalist government the armaments industry based in the wartime capital Chongqing The author argues that China's arsenal workers participated in three interlocked conflicts between 1937 and 1953 a war of national liberation a civil war and a class war The work adds to the scholarship on the Chinese revolution which has previously focused primarily on rural China showing how workers alienation from the military officers directing the arsenals eroded the legitimacy of the Nationalist regime and how the Communists mobilized working class support in Chongqing Moreover in emphasizing the urban working class and nationalist components of the 1949 revolution the author demonstrates the multiple sources of workers identities and thus challenges previous studies that have exclusively stressed workers particularistic or regional identities **The Limits Of Social Cohesion** Peter L. Berger, 2018-03-05 Normative conflicts center on fundamental disagreements over issues of public morality and the identity of a society In thinking about normative conflicts on a global scale two principal questions arise First are there common characteristics of such conflicts

worldwide Second which institutions polarize such conflicts and which can serve to mediate them This pathbreaking book edited by renowned sociologist Peter Berger examines both questions through findings gained from a study of normative conflicts in eleven societies located in different parts of the world and at different levels of economic development On both points the findings have proved surprising Although there are of course normative conflicts peculiar to individual societies two features emerged as common to most of the societies examined one concerns disputes over the place of religion in the state and in public life the other is a clash of values between a cultural elite and the broad masses of the population Often the two features coincide For instance in many countries the elite is the least religious group within the population and therefore resentments against the elite are often mobilized under religious banners On the institutional question the study started out with a bias toward the institutions of so called civil society that is the institutions that stand between the personal life of individuals and the vast mega structures of a modern society The finding is that the same institutions can either polarize or mediate normative conflicts The conclusion suggests one must ask not just what sort of institutions one looks to for social cohesion but what ideas and values inspire these institutions Comprising reports from some of the leading scholars dealing with normative conflict this book is an important contribution to understanding the cultural fault lines that threaten social cohesion Global Labour History Jan Lucassen,2008 Contains 18 essays on worldwide aspects and comparisons in labour history Covers mainly the period from the beginning of 19th century to 2000

Against the Law Ching Kwan Lee,2007-06-07 This powerful study opens a critical perspective on the slow death of socialism and the rebirth of capitalism in the world s most dynamic and populous country Based on remarkable fieldwork and extensive interviews in Chinese textile apparel machinery and household appliance factories *Against the Law* dissects the world of Chinese workers today and finds a rising tide of labor unrest mostly hidden from the world s attention Intense working class agitation is being spurred by massive unemployment of Mao s socialist proletariat in the northern rustbelt and by the exploitation of millions of young workers in the southern sunbelt Providing a broad comparative political and economic analysis of the vast mosaic of this labor struggle together with unprecedented fine grained ethnographic detail the book portrays the multi faceted humanity of the Chinese working class as their stories unfold in bankrupt state factories and global sweatshops in crowded dormitories and remote villages at heroic moments of street protests as well as in quiet disenchantment with the corrupt officialdom and the fledgling legal system **Proletarian Power** Elizabeth Perry,2018-05-04 This pathbreaking book offers the first in depth study of Chinese labor activism during the momentous upheaval of the Cultural Revolution Arguing that labor was working at cross purposes the authors explore three distinctive and different forms of working class protest rebellion conservatism and economism Drawing upon a wealth of heretofore inaccessible archival sources the authors probe the divergent political psychocultural and socioeconomic strains within the Shanghai labor movement convincingly illustrating the complexity of working class politics in contemporary China This pathbreaking book offers the first in depth study of

Chinese labor activism during the momentous upheaval of the Cultural Revolution The authors explore three distinctive forms of working class protest rebellion conservatism and economism Labor they argue was working at cross purposes through these three modes of militancy promoted by different types of leaders with differing agendas and motivations Drawing upon a wealth of heretofore inaccessible archival sources the authors probe the divergent political psychocultural and socioeconomic strains within the Shanghai labor movement As they convincingly illustrate the multiplicity of worker responses to the Cultural Revolution cautions against a one dimensional portrait of working class politics in contemporary China

Disenfranchised Joel Andreas, 2019-08-01 In the decades following World War II factories in many countries not only provided secure employment and a range of economic entitlements but also recognized workers as legitimate stakeholders enabling them to claim rights to participate in decision making and hold factory leaders accountable In recent decades as employment has become more precarious these attributes of industrial citizenship have been eroded and workers have increasingly been reduced to hired hands As Joel Andreas shows in *Disenfranchised* no country has experienced these changes as dramatically as China Drawing on a decade of field research including interviews with both factory workers and managers Andreas traces the changing political status of workers inside Chinese factories from 1949 to the present carefully analyzing how much power they have actually had to shape their working conditions

Popular China Perry Link, Richard P. Madsen, Paul G. Pickowicz, 2001-12-11 Using ingenious research methods the contributors to this book explore the search for meaning among ordinary people in China today The subjects of these vivid essays span the social spectrum from hip young entrepreneurs to sweatshop workers and homeless beggars The issues are equally diverse ranging from domestic violence to homosexuality to political corruption The culture of popular China emerges as a mixture of exhilarating new aspirations as seen in the basketball fans who dream of flying like Michael Jordan or Kobe Bryant rueful cynicism as bitingly conveyed in the many satirical jingles that circulate by word of mouth and painful ambivalence The people depicted here have built their popular culture out of ideas and symbolic practices drawn from old cultural traditions from concepts about modernity debated during the early twentieth century republican era from the legacies of Maoist socialism and from contemporary global culture Throughout the book shows how economic and social changes caused by globalization in combination with the continuing Party dictatorship have presented ordinary Chinese with a new array of moral and cultural challenges that they have met in ways that have changed the face of China Contributions

The Politics of Economic Reforms in India Jos Mooij, 2005-03-24 The economic reforms that were initiated in India in the early nineties are the subject of intense debate Much of this debate centres around the scope of the reforms their progress and their impact on growth poverty reduction and sectoral development In contrast this volume focuses on the various political dimensions of the Indian economic reform process The contributors emphasize the political shaping of the reforms the politics of implementation and the impact of reforms on political structures and processes Two major themes run through the book the relationship between policy reforms and democratic politics and the impact of reforms on the quality of governance Bringing together both theoretical contributions and case studies pertaining to particular states or sectors this volume provides insights into various important questions including How was a radical shift in policy possible in a democracy where the opposition can easily mobilize resistance How can reforms be sustained in a context where the majority of the voters are poor and attracted by handouts and where political parties are accustomed to attracting voters through populist policies Do the reforms contribute to more efficient and inclusive administrative and political governance or do they lead to new forms of corruption bureaucratic mismanagement and or undemocratic politics

The Making of the Chinese Industrial Workplace Mark W. Frazier, 2002-01-24 State workers in China have until recently enjoyed the iron rice bowl of comprehensive cradle to grave benefits and lifetime employment This central institution in Chinese politics emerged over the course of various crises that swept through China's industrial sector prior to and after revolution in 1949 Frazier explores critical phases in the expansion of the Chinese state during the middle third of the twentieth century to reveal how different labour institutions reflected state power While the iron rice bowl is usually seen as an outgrowth of Communist labour policy Frazier's account shows that it has longer historical roots As a product of the Chinese state the iron rice bowl's dismantling in the 1990s has raised sensitive issues about the way in which the contemporary Chinese state exerts control over urban industrial society This book sheds light on state and society relations in China under the Nationalist and Communist regimes

Taiwan and The 'China Impact' Gunter Schubert, 2015-12-14 There can be no doubt that China's economic and political rise is having a stronger effect on Taiwan than on any other country given the Chinese government's claim to sovereignty over Taiwan and Taiwan's quest to maintain its democratic achievements and political identity as a sovereign state Against this background this volume deals with the bigger picture of evolving relations across the Taiwan Strait departing from the observation that China's impact on Taiwan has become stronger over the last 20 years This book analyses the China impact on Taiwan in terms of its social political and security space from both an empirical and conceptual point of view It is the first comprehensive account of China's multifaceted impact on the politics and society of contemporary Taiwan written by renowned scholars from Taiwan Europe and the U S The book covers a wide range of topics including Taiwan's party alignment elections generational politics cross strait political economy immigration policy and security The contributors political scientists and sociologists highlight both the dangers and the opportunities of the China impact for Taiwan and draw a realistic picture of the island republic's current situation and future options in the shadow of its giant neighbour Based on qualitative and quantitative data this volume intends to fill a gap in the Taiwan studies field by studying the China impact on Taiwan's politics and society systematically

and from a comparative perspective By doing so it will be of great interest to students and scholars of Taiwan studies and East Asian politics and society more generally *Americanization and Its Limits* Jonathan Zeitlin, Gary Herrigel, 2000-03-23

This book develops a new and conceptually distinctive analysis of Americanization in European and Japanese industry after the Second World War based on a rich set of sectoral and firm based studies by an international group of distinguished scholars The authors highlight the autonomous and creative role of local actors in selectively adapting US technology and management methods to suit local conditions and strikingly in creating new hybrid forms that combined indigenous and foreign practices in unforeseen and often remarkably competitive ways Their findings will be of compelling interest not only to historians and social scientists concerned with the dynamics of post war economic growth and industrial development but also to those engaged in contemporary debates about the cross national transfer and diffusion of productive models
