Jacek Czepiel, Alicja Domagała, Mariusz Duplaga, Tomasz Grodzicki, Janusz Hałuszka, Grażyna Jasieńska, Justyna Klingemann, Iwona Kowalska-Bobko, Andrzej Ryś, Monika Ścibor, Marzena Tambor, Beata Tobiasz-Adamczyk, Piotr Tyszkowski, 2024-06-17. In Poland for almost three decades education in the field of public health has been provided in medical universities with the aim of creating an expert workforce to ensure appropriate action in this area. The book draws on the experience and knowledge of teachers associated with the School of Public Health of the Jagiellonian University, undoubtedly a leading institution in the country in this area, but experts from other centres also were invited in order to provide content of an appropriately high quality. The textbook on public health edited by professor Stanisława Golińska is highly recommended not only to medical university students but also to all persons involved in health protection activities in Poland. For all interested in public health this is a must read. Prof. Zbigniew Gaciong, MD, Medical University of Warsaw. This textbook perfectly addresses the health challenges of the contemporary stage of civilization development in which public health is becoming an extremely complex and at the same time dynamically evolving field. The scope of the textbook is clearly defined and its division into chapters and within them into sections dedicated to specific issues facilitates the search for the required content. The textbook also provides a wholesome understanding of public health which covers the theoretical foundations, an overview of problems and challenges as well as a description of the tools used both in research and in public policy at multiple levels: global, European, national and local. Prof. Andrzej M. Fal, Wrocław Medical University, President of the Polish Society of Public Health. **Public Health Research Methods for Partnerships and Practice**

Understanding Focus Group Discussions Monique M. Hennink, 2014 This volume guides readers on practical and theoretical considerations in conducting focus group research Separate chapters are devoted to writing focus group methods and presenting findings Strategies for assessing the quality of focus group research are included and case study examples of field research are provided throughout

Focus Group Discussions Monique M. Hennink, 2013-12-13 The Understanding Research series focuses on the process of writing up social research The series is broken down into three categories Understanding Statistics Understanding Measurement and Understanding Qualitative Research The books provide researchers with guides to understanding writing and evaluating social research Each volume demonstrates how research should be represented including how to write up the methodology as well as the research findings Each volume also reviews how to appropriately evaluate published research

Focus Group Discussions addresses the challenges associated with conducting and writing focus group research. It provides detailed guidance on the practical and theoretical considerations in conducting focus group discussions including designing the discussion guide, recruiting participants, training a field team, moderating techniques, and ethical considerations. Monique Hennink describes how a methodology section is read and evaluated by others such as journal reviewers or thesis advisors. She provides readers with guidance on specific aspects of presenting research findings such as structuring narrative accounts, developing an argument using quotations, reporting focus group interaction, visual presentation formats, and strategies for grounding study results. She describes the challenges in assessing focus groups and details practical strategies for assessing scientific rigor. The book includes case study examples of field research across a range of disciplines and international contexts. Hennink concludes the volume with an overview of current debates relating to the evaluation of qualitative research, suggesting ways to critique the research design, methodology, and results of focus group research. *Public Health* Pranee

Liamputtong, 2019-05-16. Provides students with an overview of Australian and international public health issues and contexts.

Qualitative Health Research Janice M. Morse, 2016-06-03. The leading figure in qualitative health research, QHR, Janice M. Morse asserts that QHR is its own separate discipline, distinct from both traditional health research and other kinds of qualitative research, and examines the implications of this position for theory, research, and practice. She contends that the health care environments transform many of the traditional norms of qualitative research and shape a new and different kind of research tradition. Similarly, the humanizing ethos of qualitative health research has much to teach traditional researchers and practitioners in health disciplines. She explores how the discipline of QHR can play out in practice, both in the clinic and in the classroom in North America and around the world. A challenging, thought-provoking call to rethink how to conduct qualitative research in health settings.

WHO guidance on research methods for health emergency and disaster risk management, revised 2022 World Health Organization, 2022-10-13. The WHO website has an introductory description for the Guidance. It states that the WHO Guidance on Research Methods for Health Emergency and Disaster Risk Management (HEDRM) was developed to address the need to promote high-quality research methods to those who commission and conduct research on health EDRM. The intended audience includes decision makers, practitioners, and community actors who need for evidence-based policy and practice to implement the Health EDRM Framework. Sendai Framework on Disaster Risk Reduction 2015-2030, the International Health Regulations 2005, the United Nations Sustainable Development Goals (SDGs), and other relevant global, regional, and national frameworks. Chapters have been written by more than 100 international authors with practical experience and expertise in a wide range of areas including research practice and policy making. The unique collection of chapters provides straightforward and practical guidance on how to plan, conduct, and report a wide variety of studies that can answer quantitative and qualitative questions in different emergency settings. Case studies of direct relevance to Health EDRM provide real-life examples of research to illustrate the methods and their

impact The book was revised in 2022 with an additional chapter on how to use this book in the context of COVID 19 pandemic
