product reliability and compliance in manufacturing Quality Improvement Through Statistical Methods Bovas Abraham, 2012-12-06 This book is based on the papers presented at the International Conference Quality Improvement through Statistical Methods in Cochin India during December 28-31 1996. The Conference was hosted by the Cochin University of Science and Technology Cochin India and sponsored by the Institute for Improvement in Quality and Productivity IIQP at the University of Waterloo Canada, the Statistics in Industry Committee of the International Statistical Institute ISI and by the Indian Statistical Institute. There has been an increased interest in Quality Improvement (QI) activities in many organizations during the last several years since the airing of the NBC television program *If Japan Can, Why Can't We*. Implementation of QI methods requires statistical thinking and the utilization of statistical tools; thus, there has been a renewed interest in statistical methods applicable to industry and technology. This revitalized enthusiasm has created worldwide discussions on Industrial Statistics Research and QI ideas at several international conferences in recent years. The purpose of this conference was to provide a forum for presenting and exchanging ideas in Statistical Methods and for enhancing the transference of such technologies to quality improvement efforts in various sectors. It also provided an opportunity for interaction between industrial practitioners and academia. It was intended that the exchange of experiences and ideas would foster new international collaborations in research and other technology transfers.
