Quality Control And Assurance In Advanced Surface Engineering:

Quality Control and Assurance in Advanced Surface Engineering Kenneth Norman Strafford, Chinnia Subramanian, 1997 A key to the successful exploitation of modern coating systems lies in the generation and acceptance of appropriate quality assurance and control QA and QC standards There is a proliferation of papers in the literature extolling the benefits of novel coatings and coating systems but there is still an urgent need to characterise understand and interpret the reported enhanced performance of such coatings This book addresses comprehensively quality issues Advanced Thermally Assisted Surface Engineering Processes Ramnarayan Chattopadhyay, 2004-02-29 Surfaces are the bounding faces of solids The interaction of component surface with the working environment results in wear and corrosion Estimated loss due to wear and corrosion in the USA is around 500 billion Engineered surfaces are the key to the reduction of losses due to wear and corrosion There are surface engineering books on specific processes such as thermal spraying and vapor phase deposition or about specific heat sources such as plasma or laser However there are few if any covering the whole range of advanced surface engineering processes Advanced Thermally Assisted Surface Engineering Processes has been structured to provide assistance and guidance to the engineers researchers and students in choosing the right process from the galaxy of newer surface engineering techniques using advanced heat sources *Surface Engineering* Ken N.
