**Living in the Global Society** Roberto Papini, Antonio Pavan, Stefano Zamagn, 2019-01-04 First published in 1997 *Living in the Global Society* reflects on the fundamental concept of global economy as the driving force for development and examines how ethical values can direct this towards the welfare of humankind in a future where peace will reign The contributions stem from an international conference held in Rome on Economic Growth for What Kind of Future The book examines four main themes development and underdevelopment globalization in the fields of economics finance trade migration and culture the shape of the world to

come through management of resources and goods and finally the challenge of globalization moving from fragmentation towards social growth based on cooperation and integration It is suggested that only a civil society that is also developed at an international level can provide the basis for a true global democracy and true peace This book asks how far are we along the path towards its creation     **Deep Change and Emergent Structures in Global Society** Andrea M.

Maccarini,2019-03-01 This book addresses the problem of the transition to new forms of social order in the global world As a haunting sense of historical discontinuity pervades Western societies it offers a fresh perspective on the issue focusing on two basic coordinates to pinpoint the developmental path of rapidly changing societies one is the mechanism of unfettered social morphogenesis and the other is the specific kind of societal unification brought about by globalization with the related closure of the world The book draws on the theoretical work produced in the five volumes of the Springer series Social Morphogenesis and applies it in a sustained and concerted approach to the empirical examination of macro social change The first part of the book presents the social ontology of the morphogenetic approach and discusses its capacity to interpret macrosocial transitions The second part then draws a prospective outline of the social formation known as the morphogenic society showing how unbound morphogenesis in a globalized world shapes such crucial phenomena as social norms war and violence openness and closure as adaptive responses from social organizations Lastly the third part examines the anthropological consequences of these societal trends focusing on self and character as well as on human fulfillment and the good life
