Friendly, 2011-09-15 A visually intuitive approach to statistical data analysis Visual Statistics brings the most complex and advanced statistical methods within reach of those with little statistical training by using animated graphics of the data Using ViSta The Visual Statistics System developed by Forrest Young and Pedro Valero Mora and available free of charge on the Internet students can easily create fully interactive visualizations from relevant mathematical statistics promoting perceptual and cognitive understanding of the data's story An emphasis is placed on a paradigm for understanding data that is visual intuitive geometric and active rather than one that relies on convoluted logic heavy mathematics systems of algebraic equations or passive acceptance of results A companion Web site complements the book by further demonstrating the concept of creating interactive and dynamic graphics The book provides users with the opportunity to view the graphics in a dynamic way by illustrating how to analyze statistical data and explore the concepts of visual statistics Visual Statistics addresses and features the following topics Why use dynamic graphics A history of statistical graphics Visual statistics and the graphical user interface Visual statistics and the scientific method Character based statistical interface objects Graphics based statistical interfaces Visualization for exploring univariate data This is an excellent textbook for undergraduate courses in data analysis and regression for students majoring or minoring in statistics mathematics science engineering and computer science as well as for graduate level courses in mathematics The book is also ideal as a reference self study guide for engineers scientists and mathematicians With contributions by highly regarded professionals in the field Visual Statistics not only improves a student's understanding of statistics but also builds confidence to overcome problems that may have previously been intimidating *Statistical Methodology Reviews* Oscar Krisen Buros, 1951 *Industrial Statistics* Ron S.
