Quality Transforming Postsecondary Education:

Quality Ellen Earle Chaffe, Lawrence A. Sherr, 1992-04-14 A look at TQM and higher education The Quality Management Sourcebook Christine Avery, Diane Zabel, 2002-09-11 The concept of Quality Management began in the manufacturing sector but a growing concern with quality in other areas of the economy has led to its wider application in service industries government education and other not for profit agencies A great quantity of material related to quality management has been produced in recent years much of it by small presses professional and trade associations and consultants The Quality Management Sourcebook is the first in depth international guide to the most useful material and sources of information The book begins with the origins of quality management explains how it evolved examines its current situation and explores the future The book is divided into five main sections Introduction General sources for information Applications of total quality management Focus on specific aspects of quality management Quality in the future Resource materials The Quality Management Sourcebook is an essential reference for everybody involved in either the theory or practice of quality management in manufacturing retail banking and insurance the utilities industry the transportation industry health education and other public services Over 900 citations cover books journal articles technical reports video training materials and software Each is followed by a descriptive annotation Resource materials include strategies for locating additional information training materials organizations and consultants The book concludes with a glossary of quality management terms a name index a title index and a detailed subject index *Catalog of ERIC Clearinghouse Publications*, 1997 Resources in Education, 2001-10 Managing for Quality in Higher Education, *The ERIC Review*, 1991 Provides information on programs research publications and services of ERIC as well as critical and current education information *Teaching Democracy by Being Democratic* Ted Becker, Richard A. Couto, 1996-10-30 The best way to teach democracy has been the subject of an ongoing debate for 2 500 years Unlike most books about teaching democracy this one spends more time on how to teach democracy than the what and why of teaching democracy It punctures the irony of teaching democracy by lectures and superior teachers In its place this book provides a variety of illustrations for the teaching of democracy in an experiential and egalitarian fashion The introduction presents a theoretical and analytical framework of democracy and democratic pedagogy The six chapters cover topics such as structuring a democratic classroom democratic practices that empower students problem solving and community service that make the classroom a laboratory for democracy and university based programs of democratic alternatives that serve the community The volume s treatment of community organization students as collaborators personal empowerment the community of need and response and the democratic organization expresses its preference for direct democratic participation Leading the eLearning Transformation of Higher Education Gary E. Miller, Kathleen S. Ives, 2023-07-03 Published in Association with eLearning has entered the mainstream of higher education as an agent of strategic change This transformation requires eLearning leaders

to develop the skills to innovate successfully at a time of heightened competition and rapid technological change In this environment eLearning leaders must act within their institutions as much more than technology managers and assume the prime role of helping their institutions understand the opportunities that eLearning presents for faculty for students and for client organizations in the community They need to prepare to participate in policy development around these opportunities They must understand the multiple dimensions of practice in the field operations administration and working within the complex culture of a higher education institution while also functioning as scholars of the field who can bring the best ideas from other institutions to help shape policy around eLearning The second edition builds on the success of the first edition and presents both the collective expertise of veterans who have pioneered the field for 20 years and of a rising generation of eLearning leaders that are transforming online programs at their own institutions to address these challenges This edition has been updated and expanded to reflect the increasing complexity of the field with seven new chapters and the revision of eight chapters that appeared in the first edition New and updated topics include The evolving role of the chief online learning officer Issues of diversity as more women and minorities enter leadership roles in the field The increasing role of learning analytics and data based decisions The potential tensions involved in cohort based versus individualized instruction The increasing need for faculty professional development The affordances of cloud computing adaptive learning artificial intelligence the internet of things and mobile learning to the field The open educational resources movement and the implications for institutional policy and practice The challenges of an increasingly complex competitive environment Accessibility There are few comparable positions in higher education than that of eLearning leaders who work across multiple academic and support units and whose work fundamentally affects the institution as a whole This volume is written for them

Quality Assurance and Institutional Transformation Shuiyun Liu, 2016-05-03 This book illustrates the higher education quality assurance system and its impact on institutional transformation in China It starts by describing the higher education system in China and its quality assessment schemes It discusses in detail the Quality Assessment of Undergraduate Education QAUE and the Subject Evaluation two of the most influential external quality assessment schemes which are conducted on the institutional and subject levels respectively In the second part of this book QAUE is taken as an example for the impact analysis Using case studies it explores the impact of the QAUE on various dimensions of quality provisions in universities with different statuses and presents the views of various stakeholders Based on the empirical findings from the Chinese schemes and the theories on organizational change and the mechanism of external quality assessment it proposes a model to describe how quality assessment interacts with the evaluated universities and causes them to change **Total**

Strategic Transformation of Higher Education Stewart E. Sutin, W. James Jacob, 2016-09-23 *Strategic Transformation of Higher Education* examines the broken revenue driven business model characteristic of higher education in an environment

that demands greater access more affordable tuition accountable leaders and faculty who deliver a consistently high quality of relevant education The authors demonstrate that enduring business models must support institutional academic missions and that they are integral to systemic and strategic transformation by diagnosing the case for change and offering a practitioners guide for reform This book surveys deficient government education policies practices and funding formulas of select countries and offers remedies It identifies impediments to change along with ways to develop and deliver evidence based solutions to improve institutional effectiveness and operating efficiencies and it cites exemplars of change in these areas Special attention is given to leadership attributes requisite of driving institutional redesign and to a paradigm shift that calls for transition from knowledge creation to plan implementation Strategic Transformation of Higher Education emphasizes a collective need for reflection a will to consistently question prevailing assumptions and the courage to afford practical application to innovation VI Congreso Internacional Tecnología y Educación a la Distancia : compartiendo experiencias alrededor del mundo : memoria ,1995 Debatable Diversity Raymond V. Padilla,Miguel Montiel,1998-03-12 In this timely and thought provoking book the authors engage each other and the reader in an ongoing dialogue questioning the purpose and role of the contemporary university as bureaucratic corporate and diversified Written as a series of conversations between the authors two Chicano scholars at a western university Debatable Diversity chronicles their own experiences as academic activists who struggled for decades to transform an American university system based more on entrepreneurship and the business model than on a dedication to the ideals set forth by a social awareness and support for civil rights that came out of the 1960s and early 1970s a time when hope and faith in social change permeated college campuses Instead as Padilla and Montiel reveal this commitment was never realized and the lack of responsiveness of most American universities to the realities of shifting demographics and cultural diversity is the rule rather than the exception Posing a challenge for all of those interested in transforming the university into a place that reflects the realities of the American cultural landscape including growing minority populations the challenge of maintaining a sense of humanity in the face of the information age socioeconomic and class inequality and the growing presence of minorities on campus Debatable Diversity challenges readers to reexamine the purposes goals and functions of the American university in light of the ongoing social transformation from modernity to postmodernity Not only do the authors offer an insider s look at the inner workings of academia but also of academic activism with the goal of renewal and reconfiguration of the contemporary multiversity
