philosophy theology and a more loosely conceived category which has here been designated literature and aesthetics This first tome treats the German philosophical influences on Kierkegaard The dependence of Danish philosophy on German philosophy is beyond question In a book review in his Hegelian journal *Perseus* the poet playwright and critic Johan Ludvig Heiberg laments the sad state of philosophy in Denmark while lauding German speculative philosophy Moreover Kierkegaard's lifelong enemy the theologian Hans Lassen Martensen claims without exaggeration that the Danish systems of philosophy can be regarded as the disjecta membra of earlier German systems All of the major German idealist philosophers made an impact in Denmark Kant Fichte Schelling and most significantly Hegel Kierkegaard was widely read in the German philosophical literature which he made use of in countless ways throughout his authorship *Administrative Notes*, 2005

communities today *China's Civil Service Reform* Wang Xiaoqi, 2012-05-04 A market economy and a more liberal society have brought great challenges to China's outdated governance structure and personnel management. To improve decision making in government and reshape the management system in face of a more complex economy post Mao authorities have implemented a number of administrative reforms including civil service reform which emphasized on selecting and promoting public officials based on their capability and work performance. Thousands of positions have been filled since the civil service system was implemented nationwide in 1993. The Chinese civil service reform is of far reaching significance because it had the potential to be a departure from the established structure of cadre personnel management system developed in the 1950s. However after several years of policy development scholars observe that the new reforms have done little to undermine the old cadre system. Is this true? Or does this conclusion oversimplify the complicated implementation of the reforms? This book examines the implementation and performance of the on going civil service reforms in China. Using the principal agent framework the author draws upon key case studies showing how the reforms affect civil servants incentives and behavior in the local context and the Chinese leadership's control over the bureaucracy. China's reform experience speaks directly to many Asian countries facing urgent need to improve state capacity as the global financial crisis unfolds.

Impacts of Cultural Capital on Student College Choice in China Lan Gao, 2011-08-16 Educational researchers have long been concerned about the factors that influence the patterns of attendance in higher education and the extent to which higher education has been accessible to all students regardless of their socioeconomic status. Extensive research has indicated that a variety of class related factors such as cultural capital, social capital and economic capital exert remarkable impacts on the amount and type of education that one receives. Drawing on cultural capital theory this study aims at analyzing how students' college choice process varies by social class in China. By exploring different cultural and financial factors that influence different stages of students' college choice process this study hopes to contribute to identifying the most appropriate policies and practices for raising the representation of students from the lowest social class among college participants.

Social Policy Reform in Hong Kong and Shanghai: A Tale of Two Cities Linda Wong, Lynn T. White, III, Gui Shixun, 2016-07-22 As the richest cities in the world's most populous nation Hong Kong and Shanghai have recently experienced dynamic growth spurred by more and better managed capital. These cities also have social problems whose solutions will cost money. Their urban populations are aging. Health finance at the level these First World cities demand threatens to consume a large portion of the municipal budgets. Eldercare and social security are now less well covered by traditional Chinese families. Education has become more complex and public tuition where it occurs brings with it official plans for schools. Immigrants have flocked to Shanghai from inland China and Hong Kong's border has become a protector of the former colony's high productivity jobs. Housing problems also have deeply affected both cities albeit in somewhat different ways. This book provides a comprehensive overview of the similarities and differences between social policies in the

two cities Each chapter covers a different issue health finance housing education labor poverty and social security eldercare and migration and competitiveness The contributors explore pertinent developments in each city and analyze the similarities and differences between the two cities approaches to social policies They focus on policy reform and the interface between social policy and its environment One main theme throughout the book is the extent to which spending for capital accumulation is in conflict with spending for social policies
