Quantum Jump A Survival Guide For The Next Renaissance:

Quantum Jump W. R. Clement, 1998 Quantum Jump was written for individuals trying to make sense of the rapid social and political changes overtaking their lives Clement explains how our civilization is undergoing a translation similar to the European Renaissance the development of managed agriculture or the invention of writing Each of these eras brought about new world views and broadened the intellectual scope through which we perceive our world The Renaissance was triggered by the discovery of perspective OCo the means to manipulate three dimensions OCo and implemented by the bill of exchange and new mathematics Our newest era began in 1900 with the discovery that the universe exists in many more than three dimensions Exploration of this realm via mathematics and computers will drive the immediate future This is a guide to surviving the jump from the industrial age to the onrushing era of hyperspace The changes wrought by this era transition are already formidable OCo the rise of global capitalism and new industries the collapse of the Soviet Union OCo but they are only the beginning History shows that era transitions are juggernauts imposing massive individual cultural and social adaptation Clement analyzes current responses from retreats into tribalism to the erection of a New World Order of global corporatism and trading blocs he concludes that neither is viable Instead he points to skills like tangential and lateral thinking that will better equip individual readers with the points of view required in tomorrow s world

Revolution or Renaissance D. Paul Schafer, 2008-04-29 In Revolution or Renaissance D Paul Schafer subjects two of the most powerful forces in the world economics and culture to a detailed and historically sensitive analysis He argues that the economic age has produced a great deal of wealth and unleashed tremendous productive power however it is not capable of coming to grips with the problems threatening human and non human life on this planet After tracing the evolution of the economic age from the publication of Adam Smith s The Wealth of Nations in 1776 to the present he turns his attention to culture examining it both as a concept and as a reality What emerges is a portrait of the world system of the future where culture is the central focus of development According to Schafer making the transition from an economic age to a cultural age is imperative if global harmony environmental sustainability economic viability and human well being are to be achieved Published in English

Making the Scene Stuart Henderson, 2011-04-30 Making the Scene is a history of 1960s Yorkville Toronto s countercultural mecca It narrates the hip Village s development from its early coffee house days when folksingers such as Neil Young and Joni Mitchell flocked to the scene to its tumultuous drug fuelled final months A flashpoint for hip youth politicians parents and journalists alike Yorkville was also a battleground over identity territory and power Stuart Henderson explores how this neighbourhood came to be regarded as an alternative space both as a geographic area and as a symbol of hip Toronto in the cultural imagination Through recently unearthed documents and underground press coverage Henderson pays special attention to voices that

typically aren't heard in the story of Yorkville including those of women working class youth business owners and municipal authorities Through a local history Making the Scene offers new exciting ways to think about the phenomenon of counterculture and urban manifestations of a hip identity as they have emerged in cities across North America and beyond
