**Quark Matter '84** K. Kajantie, 2005-06-29      **Phenomenology Of Ultra-relativistic Heavy-ion Collisions** Wojciech Florkowski, 2010-03-24 This book gives an introduction to main ideas used in the physics of ultra relativistic heavy ion collisions The links between basic theoretical concepts discussed gradually from the elementary to more advanced level and the results of experiments are outlined so that experimentalists may learn more about the foundations of the models used by them to fit and interpret the data while theoreticians may learn more about how different theoretical ideas are used in practical applications The main task of the book is to collect the available information and establish a uniform picture of ultra relativistic heavy ion collisions The properties of hot and dense matter implied by this picture are discussed comprehensively In particular the issues concerning the formation of the quark gluon plasma in present and future heavy ion experiments are addressed      Fermilab Report, 1984      **Introduction To High-energy Heavy-ion Collisions** Cheuk-yin Wong, 1994-09-30 Written primarily for researchers and graduate students who are new in this emerging field this book develops the necessary tools so that readers can follow the latest advances in this subject Readers are first guided to examine the basic informations on nucleon nucleon collisions and the use of the nucleus as an arena to study the interaction of one nucleon with another A good survey of the relation between nucleon nucleon and nucleus nucleus collisions provides the proper comparison to study phenomena involving the more exotic quark gluon plasma Properties of the quark gluon plasma and signatures for its detection are discussed to aid future searches and exploration for this exotic matter Recent experimental findings are summarised      Relativistic Aspects Of Nuclear Physics - Proceedings Of The Third International Workshop Takeshi Kodama, Kai Cheong Chung, Yojiro Hama, 1995-02-17 This book contains invited review papers and short notes presented at the International Conference on Physics Chemistry and Application of Nanostructures Nanomeeting 2003      **Proceedings of the Sixth International Workshop on Relativistic Aspects of Nuclear Physics** Takeshi Kodama, 2001 This volume deals mainly with physics related to the RHIC It contains one of the first reports on the results of RHIC experiments
