Tracking the Texas Rangers Bruce A. Glasrud, 2012 Tracking the Texas Rangers The Twentieth Century is an anthology of fifteen previously published articles and chapter excerpts covering key topics of the Texas Rangers during the twentieth century The task of determining the role of the Rangers as the state evolved and what they actually accomplished for the benefit of the state is a difficult challenge The actions of the Rangers fit no easy description There is a dark side to the story of the Rangers during the Mexican Revolution for example some murdered with impunity Others sought to restore order in the border communities as well as in the remainder of Texas It is not lack of interest that complicates the unveiling of the mythical force With the possible exception of the Alamo probably more has been written about the Texas Rangers than any other aspect of Texas history Tracking the Texas Rangers covers leaders such as Captains Bill McDonald Lone Wolf Gonzallas and Barry Caver accomplished Rangers like Joaquin Jackson and Arthur Hill and the use of Rangers in the Mexican Revolution Chapters discuss their role in the oil fields in riots and in capturing outlaws Most important the Rangers of the twentieth century experienced changes in investigative techniques strategy and intelligence gathering Tracking looks at the use of Rangers in labor disputes in race issues and in the Tejano civil rights movement The selections cover critical aspects of those experiences organization leadership cultural implications rural and urban life and violence In their introduction editors Bruce A Glasrud and Harold J Weiss Jr discuss various themes and controversies surrounding the twentieth century Rangers and their treatment by historians over the years They also have added annotations to the essays to explain where new research has shed additional light on an event to update or correct the original article text *Expedient Shelter Construction* Cresson H. Kearny, 1976-03-01 Simple shelters that you can build quick Research was undertaken to evaluate how average citizens could create their own shelters in the case of a political crisis that could lead to a nuclear attack It was known that at this time in the mid 1970s after Civil Defense planning and spending had waned since the 1950 s 60 s that both the Soviet Union and China had more preparations for their citizens in major urban areas This book was created under the auspices of the U S ERDA an agency created in 1974 when the Atomic Energy Commission was split into the Nuclear Regulatory Commission and the ERDA This practical field research study became the original basis for Cresson Kearny s more extensive book Nuclear War Survival Skills What makes this report interesting and different is the wealth of extra info and photos that were NOT included in the book mentioned above Simple shelters that can be built in 1 to 3 days and are outlined in this book are The Need for Improved Expedient Shelters Door Covered Trench Shelter Stress test of Door Covered Trench Shelter Log covered Trench Shelter Occupancy test of Log Covered Shelter Above Ground Door Covered Shelter Car Over Trench Shelter Large Log Covered Trench Shelter Overall conclusions and recommendations From the Introduction This report strongly indicates the practicality of tens of millions of Americans evacuating into rural areas and building and occupying high protection factor expedient shelters during an escalating international crisis This concept was

successfully tested by untrained families who built expedient shelters during winter in Colorado summer in Utah and spring in Florida Their efforts are presented in this report primarily by the captioned photographs showing these typical American families evacuating their homes driving to rural shelter building sites and then with hand tools constructing their own shelters These average mostly urban American families were guided only by step by step well illustrated written instructions given to them at the start of each experiment Crisis conditions were simulated and adequate motivation was provided by the promise of a cash bonus for completion of the shelter within 36 or 48 hours depending on the difficulty of construction All families or groups of families succeeded in winning the bonus with one exception The shelters built by the test families included the Door Covered Trench Shelter the Log Covered Trench Shelter which the building family occupied for 77 hours without emerging and the Car Over Trench Shelter Also families are pictured while building four above ground shelters designed for high water table or shallow soil areas the Above Ground Door Covered Shelter the Crib Walled Shelter the Ridge Pole Shelter and the A Frame Pole Shelter These four above ground shelters have protection factors PF in the range of 250 to 500 Keywords Civil defense shelter nuclear war fallout survival improvised radioactivity Infantry ,1994
