**Applying Theory and Research to Learning Japanese as a Foreign Language** Masahiko Minami, 2009-03-26 Complex issues surround second language acquisition and foreign language learning in any language There is no doubt that individuals are capable of acquiring two or more languages at different stages of human development particularly in childhood Research investigating how adults acquire two languages also carries important insights into what takes place during later stages of human development From the fact that early and late bilinguals are faced with two languages in diverse stages of cognitive development we can predict differences in language processing between these two groups In the case of the Japanese language unfortunately far fewer studies particularly those written in English have been presented on foreign language learners and bilingual children Designed to address some of these gaps in the literature the chapters included in this book discuss various issues with regard to adult learners of Japanese as an L2 and English Japanese bilingual children This book provides the reader with an overview of the field of Japanese linguistics and its current concerns One of the main purposes of the book is to provide a forum in which to examine contributions in a variety of areas of Japanese linguistics to the teaching and learning of Japanese in the L2 classroom This book has at least two interrelated areas of benefit First both researchers and teachers benefit from each other's expertise and receive new insights that apply to their respective fields Second and more important the book serves as a forum to promote ways in which we can apply linguistic theory to the learning of Japanese as an L2 That is what researchers have learned from both theory and practice can suggest what is important for the teaching of language conversely language educators have a great deal to offer linguists

regarding the phenomenon of language. Thus the goal of this book is to integrate theoretical concepts and empirical research findings in L2 development in order to apply them to educational practice. **Learning Japanese for Real** Senko K.

Maynard, 2011-03-02 Concise descriptions of grammar use and genres make *Learning Japanese for Real* indispensable for adult learners of the language. The volume presents a holistic view of the knowledge required for proficiency in Japanese. Following introductory chapters on the language's background, sound system and scripts, word types and grammatical categories, it introduces readers to simple then complex sentences. A chapter on emotive expressions contains highly useful entries on attitudinal adverbs, exclamatory phrases, interjections and rhetorical questions, all of which carry emotive meanings. *Learning Japanese for Real* then goes beyond grammar to discuss how the language is used in interaction. The author discusses communication strategies such as requesting, apologizing and inviting, as well as how to interact when participating in a conversation with behaviors such as hand signals, bowing and nodding. She considers metaphor, tautology, puns and the lingering effect of *yojoo* before addressing the organization of Japanese discourse, including the four-part organizational principle of *ki shoo ten ketsu* and the structure of staging. The final sections feature authentic examples of popular culture discourse from manga, television, advertising, magazines and cell phone novels, and a host of practical suggestions, methods, tools and resources for learning Japanese. *Learning Japanese for Real* will become a key source for Japanese language students during their elementary, intermediate and advanced training. As an essential anthology of grammar use and genres of the Nihongo world, teachers of Japanese will also find it invaluable. **Identity and Second Language Learning** Miguel

Mantero, 2006-12-01 This collection of research has attempted to capture the essence and promise embodied in the concept of identity and built a bridge to the realm of second language studies. However, the reader will notice that we did not build just one link. This volume brings to light the diversity of research in identity and second language studies that are grounded in the notions of community, instructors and students, language immersion and study abroad, pop culture and music, religion, code switching and media. The chapters reflect the efforts of contributors from Canada, Japan, Norway, New Zealand, the United Arab Emirates and the United States, who performed their research in the countries just mentioned and in other regions around the world. Because of this, this volume truly offers an international perspective. Modulators of Cross-Language
