Berelson on Population John A. Ross, W. Parker Mauldin, 2012-12-06 Bernard Barney Berelson had a major influence in the application of social science concepts and methods to population policy during the period from 1962 to 1980 This was the period when concern with population problems spread from a relatively small group of scholars and population activists to a much larger diverse international group of political and intellectual leaders and to the general public as well There was an exponential growth in the number of scholars and service personnel in various population and family specialties in this period Barney came into the field with his appointment as Director of the Communication Research Program of The Population Council in 1962 He had no previous training or experience in demography Frank Notestein President of The Population Council at the time had the wisdom to appreciate the value and relevance of Barney's impressive background in communication research and other social science areas as well as his creative mind and leadership qualities His influence on the Council's rapidly expanding program was so immediate and impressive that within a year he was named Vice President When Frank Notestein retired in 1968 Barney became President a post he held for 6 very productive years **The**

No-Growth Society Mancur Olsen, Hans H. Landsberg, 2013-08-21 First Published in 1975 Two policy proposals are particularly notable and owe nothing to the long standing controversies between left and right Rather they suggest new perceptions of reality and a changing sense of values They are thoroughly radical and indeed subversive since they attack two fundamental features of modern society its tendency to exponential growth and its assumption of continuous progress The two proposals are zero economic growth and zero population growth Quite apart from the question of the desirability of a no growth society or even the possibility that it may even be a necessity what properties should it have How would its social

political and economic systems function What would people be like in such a society What sort of culture or consciousness would be appropriate in it A careful examination of the no growth proposals helps to reveal a number of the most fundamental failings and fears of modern life

Population Growth and Economic Development National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on Population, Working Group on Population Growth and Economic Development, 1986-02-01 This book addresses nine relevant questions Will population growth reduce the growth rate of per capita income because it reduces the per capita availability of exhaustible resources How about for renewable resources Will population growth aggravate degradation of the natural environment Does more rapid growth reduce worker output and consumption Do rapid growth and greater density lead to productivity gains through scale economies and thereby raise per capita income Will rapid population growth reduce per capita levels of education and health Will it increase inequality of income distribution Is it an important source of labor problems and city population absorption And finally do the economic effects of population growth justify government programs to reduce fertility that go beyond the provision of family planning services

Transforming Agrarian Economies Thomas P. Tomich, Peter Kilby, Bruce F. Johnston, 2018-05-31 The world's 58 poorest countries are diverse in many respects but they share the characteristic of a labor force overwhelmingly dependent on agriculture Challenging the assumption that mass poverty and chronic hunger are insoluble problems this book systematically explores the multiple aspects of economic development in these countries which are home to 60 percent of the world's population The authors offer a broad based development strategy to raise incomes through agricultural productivity growth and expanded rural employment They present rich new information on the rural informal sector and on agriculture industry interactions and they

analyze the impact of macroeconomic and social policies on the rural economy Policy instruments aimed at bringing about broad based development are carefully assessed from fiscal policy to development of new seeds and farm implements The book includes detailed case studies of countries that have seized or missed development opportunities Comparison of the successful economic transformations of Japan and the United States shows how key ideas which the authors call strategic notions have enabled policymakers to act with foresight Analyses of strategic choices in China the Soviet Union Taiwan Mexico Kenya and Tanzania also show how development strategies that emerge from the real world political economy reflect a mix of individual interests and strategic notions The Poverty Curtain Mahbub ul Haq,1976 Monograph on development policy choices for developing countries suffering from poverty and underdevelopment finds that traditional economic development strategies have failed to cater to basic needs of the vast masses and recommends a new international economic order accompanied by new international relationships and development aid measures role of developed countries References and statistical tables
