García,2022-09-01 There has been a recent upsurge of red legged partridge research in most countries where the species is distributed but no comprehensive review of that fresh and relevant multidisciplinary and international knowledge is available In fact this is probably the first scientific book on this important species apart from Dick Potts excellent works on British introduced population or ONCFS s Office Nationale de la Chasse et le Faune Sauvage France older technical reports This is in strong contrast with a plethora of literature in hunting magazines or non academic books not often precise realistic or well informed Thus the book fills a great bibliography gap that could have important social impact The common thread of the book is the prominent role a species like this may play for

research from basic physiological or ecological knowledge to socio economics of hunting and the rural world The general framework of the book I1 is the important role that hunting and game management may play in both rural economies and biodiversity conservation with the partridge as flag species and also in identifying the dark drift that industrial incorrectly deployed management or hunting vision may have on both sustainability of resources and nature conservation at large The final aim of the book is identifying the best future scenario both for partridge hunters and managers as well as the general public
